

Intestaclear

Herbal Digestive Tract Support

Orthoplex Green Intestaclear has uniquely been third party tested to ensure its essential oil ingredients contain clinically relevant levels of active constituents. Not only does the formulation contain standardised essential oils, but they have complete traceability and are authenticated from seed to shelf. This ensures the essential oils are guaranteed to be free of adulteration, providing prescribing confidence against a range of common gut - related clinical presentations.

Combining the best of traditional herbal medicine with the latest scientific discoveries, we have uniquely encapsulated the formula in Delayed Release (DR) vegan-friendly capsules to ensure the essential oils are transported in tact to the small intestine, and do not become degraded in the stomach.

This formulation contains ingredients traditionally used in European herbal medicine to help remove intestinal threadworm and maintain healthy digestion. Along with the use of standardised essential oils with complete traceability, and a specific low-exciipient profile, Intestaclear provides peace of mind when helping your patients in a notoriously complex clinical field.

Orthoplex Green Intestaclear provides a powerful blend of five botanicals, including Black walnut, Wormwood, Pau d'arco, Garlic and Barberry, along with three standardised essential oils.

- ✓ Unrivalled purity and traceability
- ✓ Demonstrated break down of essential oil composition
- ✓ Vegan and vegetarian friendly
- ✓ DR capsule to protect essential oils
- ✓ Traceable capsule ingredients
- ✓ No chemical solvents commonly found in tablets

Excipients

Colloidal anhydrous silica, calcium hydrogen phosphate dihydrate, ascorbyl palmitate, microcrystalline cellulose, natural DR vegetable capsule.

Warnings

If symptoms persist consult your healthcare practitioner. Not suitable for use in pregnancy or breastfeeding.

<i>Berberis vulgaris</i> stem bark	360mg
<i>Allium sativum</i> bulb	720mg
Thyme Oil	50mg
Clove bud Oil	50mg
Origanum Oil Spanish	50mg

Technical Information

Standardised essential oils

Here at BioConcepts, we are committed to sourcing the highest quality ingredients. The clinical efficacy of essential oils is the result of their active chemical components, but how can you, as clinicians, be sure that the essential oils in the products you prescribe contain standardised active ingredients? The only way is to test each batch specifically for its individual components. That is what we have done, and we are committed to transparency, so you can see the results (below). This demonstrated attention to detail for every single ingredient is aimed at providing you with the greatest confidence that the products you prescribe will be clinically effective. In addition, we have chosen essential oils that have complete transparency and traceability, adding an extra layer of quality and certainty.

Essential oils are highly volatile and can be destroyed in the acidic environment of the stomach, so we have used a Delayed Release vegetable capsule to ensure the highly active components arrive, unaltered, to the small intestine. We have also ensured the critique of every active and excipient ingredient, ensuring we can trace each component, for example, the vegetable capsules are made from southern softwood trees found in the south-east of the United States.

100% pure and natural authenticated essential oils:

Origanum Oil Spanish	50mg
Carvacrol	71.7%
Gamma-terpinene	4.4%
Linalool	3.5%
Caryophyllene	3.3%
