

# 360 NEO

## Efficient print speeds, high capacity and enhanced quality.

The 360 NEO is a powerful way to create secure ID cards in high volumes. Each full colour, single-sided card with HoloKote®, can be printed in under 19 seconds giving the 360 NEO the ability to print up to 190 cards per hour.

### Features

---	---	--------------------------------	---	---

### HoloKote® – built-in visual security

HoloKote® technology was pioneered by Magicard to apply a secure watermark to each card during the printing process. The 360 NEO comes complete with 10 standard designs which are selectable from the printer driver.

If you so choose, you have the option to add a custom design to reflect your brand identity. In addition you can opt to add in an extra layer of security in the form of a HoloPatch® which has a highly reflective gold 'super diffuser' seal. When the HoloKote® watermark is printed on to the seal, the watermark becomes clearly visible under all lighting conditions. HoloKote® with HoloPatch® has a similar appearance to hologram seals. It provides a distance visible security mark allowing a security guard or colleague to easily verify badge authenticity from a distance of six feet or more.

### HoloKotes® for 360 NEO

# 360 NEO

## The NEO range - Secure ID cards for every budget, industry and application

Cards have become a part of everyday life. Used for gaining access to buildings and facilities, verifying that individuals are who they say they are or simply being used to purchase goods or services, cards have become the ubiquitous global standard for identity.
