We never had a new home built for us, let alone a custom design. We did not know what to expect. We both agree that working with Natalie and her team was an exciting and positive experience. Attention to detail, quick and pleasant response to ideas, changes, and concerns gave us a feeling of satisfaction and security. Our first new home is everything we had hoped for, and we are envied by many of our friends and family.

~ Joan Murray

- Designed and built for a retired couple, this one level slab-on-grade not only provides a comfortable and stable thermal environment, but was also designed with rigorous attention to the needs of homeowners aging-in-place.
- The home-owners came with a well-defined idea of interior finishes and colors, and we worked with them to express their distinct style in a unified, beautiful way.
- By contracting us as both designer and builder of this project, the clients can work with a single team through the entire process of conceiving and realizing their home.
