

# Innovative Parts Cart A

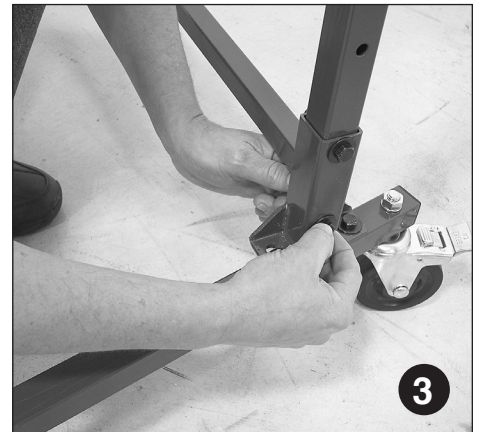

## Assembly Instructions

1 Install wheels to leg support tubes.

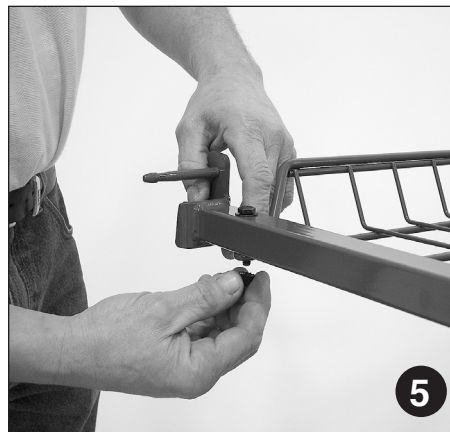

2 Bolt leg support tubes to lower frame support. If you want to nest the SuperStorage Parts Cart, move leg support to outward position.

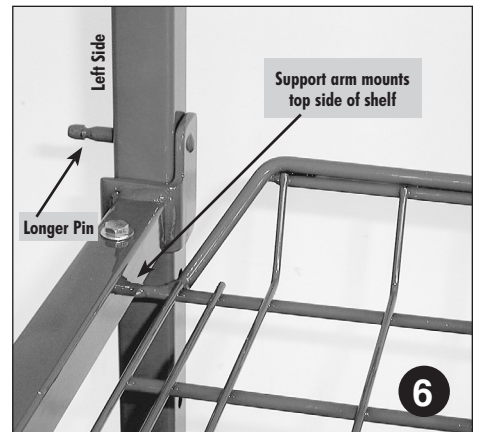

3 Slide side rail tube into lower base support. Insert bolts. *Note: do not tighten bolts until frame is completed.*

4 Install upper frame support, then tighten all bolts.

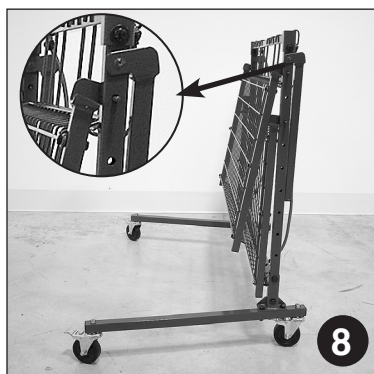

5 Mount support arms on top of basket.

6 **Shelf assembly**  
Put longer pin on the left side of all shelves.

7 Put shelves in desired positions. Always put heavier objects on lower shelves. Bungee cords work well to secure larger boxes and other awkward parts.

8 **Nesting instructions**  
Using the dedicated nesting holes, store one shelf on back of cart and one on front (as shown).

9 For restoring shelves, always mount lower shelf first.
