## Chignon No.8

### DESCRIPTION

Chignon no.8 with its fluid elongated body, can live in your space, both vertically and horizontally. This body of work, aptly named Chignon, evokes a sense of tactile fluidity following the sweeping contours of a woman's chignon. HENRII masterfully crafted abstract interpretations of these shapes using clay, then was translated into our engineered polymer.

"We wanted to capture the quiet and strong beauty behind the ritual of a woman placing her hair. This led us to delve into other studies on the sculpting of hair, whether it be a haphazard twist or a carefully coiled arrangement." -HENRII
