

NAALA 01 Sconce

The Naala Sconce is a playful and compact piece that embodies the ethereal beauty and captivating allure of romanesque vault ceilings. Each arch is a masterpiece of geometry and engineering, carefully calculated to support the weight of the ceiling and roof above. Naala's delicate tracery of interlocking arches and ribs is directly influenced by these architectural vaults. The gentle radiance and petite size is the ideal piece to place in smaller spaces or clustered and arranged to fill a large space. The shade rests on a circular steel backplate, available in brushed bronze or satin nickel, which creates a cohesive whole between the two geometries.
