MAKRO METAL DETECTORS

www.makrodetector.com

Built on the cutting-edge RACER technology, the **Gold RACER** offers advanced gold prospecting capabilities. Operating at 56 kHz frequency, the Gold RACER detects the tiniest nuggets while ignoring harsh ground conditions and hot rocks in gold fields around the world.

Apart from its exceptional ground handling capability, the waterproof search coils make the **Gold RACER** an excellent gold detector for use in streams and rivers, too.

Advanced features such as iSAT (Intelligent Self-Adjusting Threshold), iMask (Intelligent Masking), Tone Break, Audio Boost, superior discrimination ability as well as its improved ergonomics make this detector the most versatile detector on the market for finding nuggets, micro jewelry and even coins.

Easy to use single menu design

3 Search Modes
 ● All Metal ● DISC.1 ● DISC.2

Sensitivity
 Adjusts the depth of the device.

Threshold and iSAT
 Intelligent self-adjusting threshold control allows for a smooth and noise-free threshold sound in challenging terrains by avoiding disruption of the threshold in the all metal mode caused by high mineralization.

FD / Save
 Easily saves your settings or restores factory defaults.

Extra features at the push of a button:
 Audio Boost, Audio Tone, Frequency Shift, LED Flashlight

Digital Target ID and ID Filtering

iMask
 Eliminates false signals caused by ground noise or hot rocks when searching in discrimination modes.

Tone Break
 Adjusts the break points of the target response tones on the Target ID range.

Extended Battery Life
 Offers 25-30 hours continuous operation

Ground Balance with 3 Options:
 Automatic, Manual, Tracking

Magnetic Mineralization Indicator
 Shows mineralization intensity of the ground
