PYTHON CLAMP W/ 35mm TUBE MOUNT

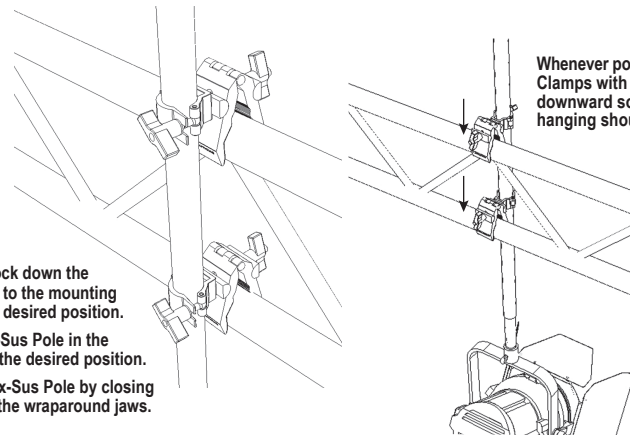

**SPECIFICATIONS:**

Weight: 500g

Clamping Range: Python 0-50mm,  
Tube Clamp 35mm

SWL: 20Kg

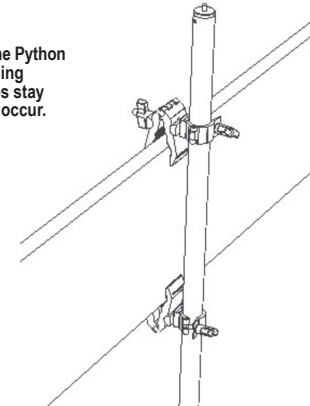

Using the Python Clamp with 35mm Tube Mount with the  
Ex-Sus Pole. (For ideal stability, use two clamps)

- 1) Attach and lock down the Python Clamps to the mounting structure in the desired position.
- 2) Place the Ex-Sus Pole in the tube clamps in the desired position.
- 3) Secure the Ex-Sus Pole by closing and tightening the wraparound jaws.

Always follow the safety standards and regulations of the given country where the product is being used.

If downward mounting for multiple clamps  
is not possible, try affixing the clamps to  
opposing sides of the structure.

Whenever possible, mount the Python  
Clamps with their jaws opening  
downward so that the clamps stay  
hanging should an accident occur.
