

7D6N CITY IN A GARDEN (2020)

Urban Planning & Design

The program aims to allow its participants to discover and immerse themselves in Singapore's local culture and heritage.

Participants will get to experience first-hand local outdoor camp education culture, and also explore nature and adventure in the Singaporean context

Urban Development in Singapore

Though the visit to Singapore's URA gallery, participants are able to clearly see through live models how Singapore is segmented and classified into various development zones.

Skills and tips on how townships are developed will come in useful when designing their own models.

Singapore @ Play , Sentosa Island

Sentosa, Singapore's mega development and Island paradise. What makes up a mega attraction? Participants visit key sites in Sentosa and sleep over in an actual BCA Green Mark facility .

BCA Green Mark Building Eco Engineering

Developed by Sentosa Development Corporation the KidZania Singapore building is a certified Building & Construction Authority Green Mark Building.

Practical hands on learning on Eco Friendly engineering principals and challenges will provide building blocks for the creation of their own model city using Sand as a medium for expression .

World Unesco Heritage Singapore Botanical Gardens

The Gardens has been inscribed as a UNESCO World Heritage Site in 2015. The Gardens is the first and only tropical botanic garden on the UNESCO's World Heritage List. Today, the Gardens is an important botanical institute and the staging area for exciting TEAM activities.

The Neon Campfire in KidZania Singapore

Campfire night is the highlight of the camp in which students are encouraged to take part in a team performance

The process of coming together with different ideas and practices to result in good team performance is an enriching experience for the participants. Now with Zero Carbon Foot print our campfire effects provide for a memorable experience in cool air conditioned comfort.

Learning Journey @ Supermarket

Tying the culinary experience all together from the producer to the cook and eventually to the consumers, students will be brought to a local supermarket where they will be shopping for the freshest of produce for use in the Project Cook Out Challenge later in the same day

Students will get to experience how a Singaporean supermarket works, and contrast it against the supermarkets they have at home. They will also be exposed to a multitude of foreign local ingredients, which will certainly broaden their horizons as well

Heritage Race - Singaporean Taste Test

Singapore grew out of an eventful history and melting pot of different cultures, which has definitely taken root in the culinary scene here

Students will be given the opportunity to explore and taste local culinary creations that have been borne out of the amalgamation of local cultures here.

They will also get to experience the way of life in Singapore when it comes to ordering and consuming food, which will definitely aid in cultural understanding.

Project Cook Out!

Armed with simple and standard supplies, the students will need to prepare meals according to given recipes.

Even though the complexity of the recipe differs, the students will be faced with a rather foreign task – to cook their own food.

The edibility of the food will depend on the students' resourcefulness and how well the students work together in their pairs.

Cultural Immersion @ Bugis Street

Bugis Street is a shopping heaven in Singapore specifically catered towards the younger demographic.

Students will get to bask in the emanating youthful vibes as they stroll down the shopping aisles and lanes. They will also be having a free and easy dinner, all of which will undoubtedly provide them with a glimpse of the leisure life of an average Singaporean teen.

Learning Journey @ Gardens by the Bay (GBTB)

Singapore has always been known to be a Garden City beyond its borders. However, the recent focus of the government has been towards transforming Singapore into a "city in a garden", of which the first step towards that being the conceptualization and building of the GBTB.

The tour at GBTB aims to help students marry the idea of economic development and habitat preservation together towards the idea of sustainable development through unique, experiential learning opportunities
