

Our Brand

Applying Smiles

It's all in the name and tag line

Our reason for being

To provide comfort and improved wellbeing to people of all ages through the provision of innovative and people-friendly products while minimising cross-infection and the need for medications.

Our Vision

- To provide healthcare professionals with a safe and simple solution for post trauma pain and swelling.
- To empower patients to better manage their own chronic and acute conditions and lessen the impact on institutional resources.

Feedback that makes it all worthwhile

“

The Medichill Peri-Pads are the absolute best product I found for after a natural delivery. I had quite a traumatic birth that resulted in third degree tearing and the Peri-Pads were such an incredible source of instant relief. I recommend them to every new mum I speak to as they are also excellent for use on your breasts when initially starting the rollercoaster that is breastfeeding! As a company if you considered organising a pack in the Bounty Bags I think you would find your page flooded with additional orders on an ongoing basis.
