POPULAR TOPICS

On Communication:

By teaching how to listen to understand, rather than listening to respond, this highly skilled horseman – and communicator – has learned how to send and receive messages that are far more powerful than what he considers a lesser form of communication; speech. Mike's distinctive technique of a "measured response" in every situation allows for clear and positive influence in another person, for the mutual benefit of all the relationships in your life. Audiences are impacted as Mike skillfully reveals how mastering this deeper communication approach improves virtually all facets of our lives, where relationships are more fruitful, whole, loving, and trusting.

Generosity:

Mike believes all of us are designed for a generous life, one built on the belief that God cares deeply about the generosity His children show. God has loved His children generously through the work of Jesus Christ. Therefore, He seeks to reflect that generous love on each of us and the world. Because generosity is often thankless and difficult to live out, Mike desires your audience to be encouraged in their daily personal acts of generosity. He wants each individual to equip others by sharing their goals—not just their triumphs but the challenges as well. Mike prays that living a generous life would be a blessing to you as you seek to love God with your own generous life!

Living in The Red States:

Mike travels the country to hear and record the voices from those who live in 'The Red States', including farmers, ranchers, factory workers, miners, and patriots who are tired of the destructive worldview we live in, who want a voice in how this country is lead and governed, not as they feel currently with how they are being told what and how they should think. These disregarded "deplorables" want to see our country restored back to the Constitutional Republic that our Founding Fathers envisioned and established. They want to be heard.

Mike helps give them a voice.
