

Key Advantages:

Simple to use

Contactless Measurement

Fast Response

CE Medical Certification

Accuracy +/- 0.2°C

32 Measurement Memory

Back Light Display

°C or °F Display

In Stock Ready to Ship

Thermometer for detecting the temperature of the HUMAN body

Infrared thermometer for measuring the temperature of the human body without contact.

By locating the measurement spot on the patient's front, the instrument is able to measure and record body temperature simply by pressing the measurement button (trigger) and indicating on a large LCD display.

Measuring distance variable between 5 and 15 centimeters.

Technical features:

Measuring range: +32°C ÷ +42°C (BODY mode); 0°C ÷ +100°C (OBJECT mode)

Accuracy: ± 0.2 ° C

Resolution: 0.1 ° C

Operating temperature of use: +10°C ÷ +40°C

Operating humidity of use: ≤80% RH

Storage temperature: -25°C ÷ +55°C

Power supply: 2 AAA alkaline batteries

Degree of protection: IP20

Dimensions: 116x55x170mm

Weight: 150g
