Customer Reviews of the Matman Check 5 HACCP System

**Executive Chef David Oulton,
Abbey Court Hotel, Nenagh.**

When I first saw this product at the demonstration stage I was amazed at its versatility covering all areas of HACCP Management. I have now been using the Matman Check in our Hotel since August 2008.

I can view reports for any day, week or month, when I wish, giving me complete accountability of all staff duties. The program provides me with the minute detail in easy to read spread sheets which I can print, if I wish, or send in an email.

This system provides ease of viewing and comprehensive detail to suit my requirements and goes a long way to meeting the requirements of our Environmental Health Officer.

I would not hesitate in recommending this product to any Establishment in the Food Service & Catering Industry.

**Eugene Duggan, Operations Manager,
Green Farm Foods.**

We have used the Matman Check System in our production facility since October 2010, we have since found the system to be a huge benefit in our HACCP Record Management.

The details acquired in all readings, along with the pre-set Criteria for all checks provide us with complete accountability of all data. Ensuring the levels of quality, we demand all data is stored on PC and is readily available for viewing by our Food Safety Team or Visiting Auditors.

I would not hesitate in recommending the Matman Check System to any company involved in the Food Production Industry.
