

HOW TO MEASURE YOUR RING

Tip 1: Measure a ring already owned.

Print out our guide using standard A4 sized paper (210 x 297mm).

Before printing, make sure that the page scaling is set to 'None' in your print options.

Be aware of which finger your ring is meant for. Using a ring that fits that finger, place it over the circles below until the **inside** circumference of the ring aligns with a circle.

If your ring is in the middle of two sizes, think about how wide the band is. A wider band covers more of your finger and so often needs to be a larger size.

Tip 2: The average UK ring size is an L 1/2.

If in doubt order this size and we will resize your ring after delivery for free.

Note you can always order and confirm ring size later on to our concierge team.

Tip 3: Request a complimentary ring sizer from us.

If surprises aren't your thing or it's a gift for yourself, our free sizer will be all you need!

Email us at concierge@fentonand.co and we will pop one in the post.

We recommend using one of these for a more exact measurement as it won't wobble as you test taking it on and off. The above circle guide can only give an estimate, as it won't be based on the style of your specific Fenton ring.

RING SIZE CONVERSION CHART

There are lots of things to take into account when checking your ring size. From the style of the ring worn to the temperature and time of day when you measure your finger, your size can vary. Our conversion chart can give you a estimate but remember we can re-size your ring for you if it's not a perfect fit.

Inside Diameter (mm)	Circumference (mm)	UK / Ireland / Australia / South Africa / NZ	US / Mexico / Canada	Continental Europe
