Aunt Lyn's Luv in a Bottle

The **Cornerstone** of our Essential Oil Wellness line. Early on, Aunt Lyn noticed that pet parents were using double and triple antibiotic human ointments because they were handy and didn't require a trip to the vet. While this may sometimes work, it isn't always a good idea to use human medications on animals. Also, the overuse of antibiotics can result in bacteria becoming more resistant to medication. Yes, there are pet antiseptic products for dogs on the market, but most of them sting and are made with non-natural ingredients. If there were non-stinging, over the counter, children's antiseptics, why couldn't a non-stinging product, over the counter product be made from natural ingredients, for our dogs? And THAT is how the idea of developing **Aunt Lyn's LUV IN A BOTTLE** began and subsequently, the **Aunt Lyn's Wellness Line** was created.

How to Use:

For Minor Cuts, Scratches, Abrasions and Skin Irritations:

- Clean affected area with warm water and mild cleanser.
- Use the included dropper or sprayer depending upon where the essential oil is going to be applied.
- Apply 2 - 3 drops or 2 - 3 spritzes of **Aunt Lyn's LUV IN A BOTTLE** to the affected area.
- Gently pat or rub in if needed.
- Apply 2 - 3 times a day
- Should the wound get worse and/or does not heal in a few days, please consult a veterinarian.

To Maintain Optimum Health and Support a Healthy Immune System:

- Use whenever you feel your dog's immune system is lower than normal; especially in cases when he or she is recovering from an injury. Give 3 drops orally, 2 times a day, for 3-5 days. If the dog is not recovering, please consult a veterinarian.

For Gum Irritation:

- Rub a ½ tsp. gently but liberally onto the affected area to numb the pain and reduce inflammation - until you get your dog to a veterinarian to diagnose and treat.
