

# THE FUTURE IS NOW - 4D SERIES

## LI "SAI" ZHANG MODEL KIT

### BASIC ASSEMBLY INSTRUCTIONS

Issued by the Ministry of Collectibles

**• READ THIS FIRST**  
Before assembling your miniature please read through the instructions on this leaflet carefully.

**• WARNING: CHOKING HAZARD**  
Contains small parts. Not suitable for children.

**• TOOLS ARE REQUIRED**  
-Cutter (or Knife cutter or Plastic cutter)  
-Instant Glue (Transparent ideally)  
-OPTIONAL: Nail File (Don't use an aggressive one, the miniature material is relatively soft)

### FIRST STEP - CLEANING PHASE

A.1 \_ The kit is composed of eleven pieces. There is an excess of resin from the mould on the pieces that needs to be removed.

A.2 \_ Take your time to study the pieces and identify which parts need to be removed.

A.3 \_ There is a joint section at the end of most pieces, be careful not to remove those connections or the assembly phase will be more difficult.

+03  
72.34.24

B.1 \_ As a general guide these are the parts (in blue) that you need to remove. (there might be more or less excess resin parts on your kit)

B.2 \_ Most of the excess resin will detach just by applying gentle pressure with your fingers. When that is not possible use the cutter.

B.3 \_ Use the nail file if you need to smooth the correct any imperfection.

### SECOND STEP - ASSEMBLY PHASE

C.1 \_ Now that the pieces are clean (they will look something like the picture below) you can begin assembling the miniature.

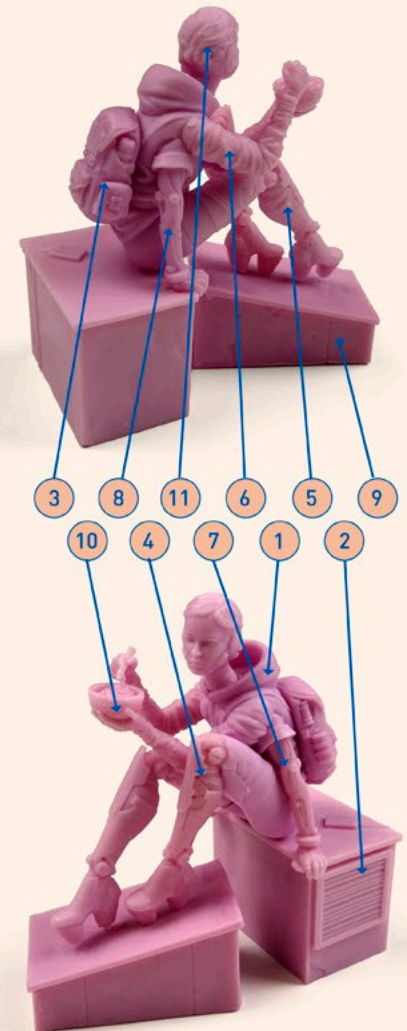

C.2 \_ A good way to assemble the miniature is to start with the chest piece. Apply a small tear drop of glue where the piece is meant to fit and then place the piece and maintain pressure.

C.3 \_ Follow the instructions from the brand of instant glue you are using to know how long you need to keep the pressure.

### ADDITIONAL INFORMATION

D.1 \_ This diagram will help you visualize the assembled look of the miniature and where each piece belongs.

Type--#C435
