

Use this guide to assist you in customizing the various color options of your dreaming light strip. Listed below are the button functions along with the different color chasing modes programmed into the controller.

Power: This turns the lights on and off.
(Note: The power button may only pause the lights as opposed to turning them off in some configurations, this function does not follow a specific pattern.)

Mode + : Press to select a mode (see mode table on pg.2)

Mode - : Press to select a mode (see mode table on pg.2)

Speed + : Make chasing patterns go faster

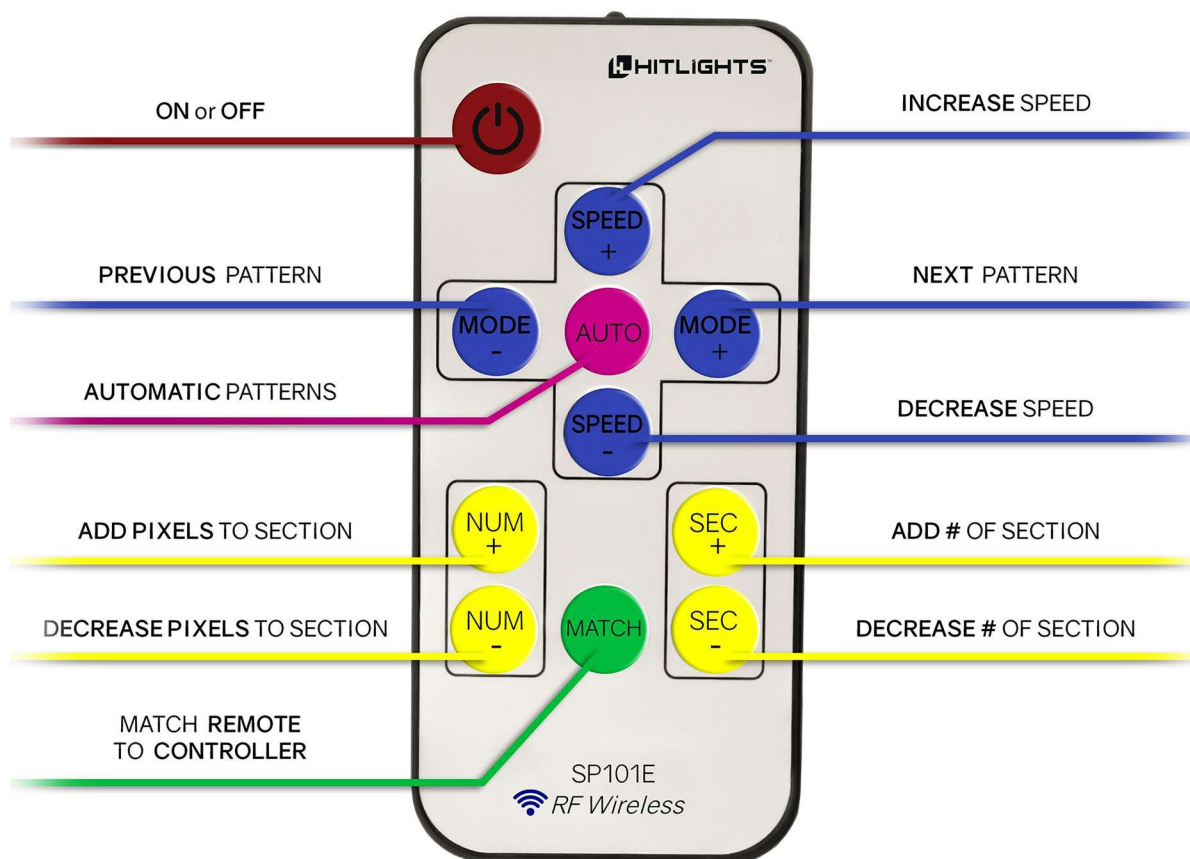

Speed - : Make chasing patterns go slower

Num + & Num - : Change the color chasing patterns “stacks” location.
(In other settings it will adjust the speed or do nothing.)

Sec + & Sec - : Adjusts color chasing speed.
(In other settings it will do nothing.)

Match : Hold down to sync remote with receiver.
(Note: Multiple receivers can be synchronized to a single remote while holding this button down.)

Auto : This setting will start at the beginning and also cycle between different chasing effects.

The settings below will guide as to the effect that will be achieved depending on the number of taps on the Mode+ button or on the Mode- button.
