- UL Listed TL-15 Customized Vault for Guns.
- 2 Hour Fire Rated.
- FIRE & BURGLARY LIMITED WARRANTY.
- Holds up to 23 Rifles, 3 side by barrel shotguns, and 6 pistols (with room left for ammunition).
- Adjustable Furniture Grade Birch Interior rated for heavy load capacity.
- (16) 1.5 inch chrome bolts.
- Comes Standart Locks UL Listed Group II-M anti-manipulative lock. (as seen in picture) (additional options available).

- Glass Re-locker.
- Hard plate throughout (Interior Wall Design Hard Plate Cage. For maximum power tool resistance).
- Bolt down hole.
- High Density High Compression Rated Concrete used as Fire resistance a power tool resistance.
- Choice of 4 Colors Black, White, Forrest Green and Burgundy.
- Includes Free Hollon Pocket Door Organizer for pistols and ammunition (Upgraded Custom Leather and Canvas PDO available for additional coast).

“Do You Know Security?”

Find the pages with four types of gun safes and four types of security safes. We have put this page together to demonstrate the different types of security. Most people just don't understand the difference in security and fire rating on safes. Mainly because they are not exposed to this information or if they have been to a Big Box retailer they have seen what we would call a plastic "fire box" with the word "burglary safe" written on the side and handle on the top. So we want to educate everyone on what is available that is real security and real fire protection. Education is essential to making good decisions.

Step 1

So let's take a look at the different types of security? Let's look at either the gun safes or the security safes below them and start from the left side and work to the right.

Step 2

There are four main types of security safes available. In the gun safes category please find the TL-15 Gun Vault, Extra Thick Steel RSC, 10 Gauge RSC, and the 12 Gauge Hunter Series. In the security safes below please find the TL-15, Fire and Burglary, B-Rated Safe, and office safe.

Step 3

Starting on the left side the TL-15 models will be the highest security rating in this example. Also, it's the most expensive of the safes in this example. "TL-15" stands for "TooL test time of 15 minutes". This is a bit of a misleading name though because the 15 minutes is only the time that a tool is actually working on the safe and that the test can actually run several hours by UL. This rating is an insurable rating like a bank vault. Some insurance companies will only write insurance policies on contents in a TL-15 rated safe or higher. Also we install a hard plate cage on the interior of each wall, top, and bottom. Next, is the high compression concrete with an aluminum mixture for fire prevention and acts as a theft deterrent. (You can't use a blow torch to get through it and the aluminum mixture gunk's up grinding tools thus slowing down any would be thief.)

Step 4

Next is the Fire and Burglary Series or the Extra Thick Steel RSC Gun Safe. Both are the next level down in security. But still have a 2 hour fire rating. Next is the B-rated safe or the 10 Gauge RSC. Both still have a good amount of security but offer less fireproofing. The B-Rated safe offers no fireproof. Still really good security though. Last are the Office safe and the 12 Gauge Hunter series gun safe. Both are the 4th notch down in security in this example. The office safe still holds 2 hour fireproof rating but the Hunter series is only 45 minutes. Based on local fire departments we know that from the time a fire sparks until the first drops of water start it takes roughly 20 minutes. Then it takes roughly another 20 minutes to fully extinguish the fire. So in our opinion anything less than 40 minutes of fire protection is really no protection at all and you will lose all your belongings if you actually have a fire.

Do You Know Security?

EMP 6333 Gun Vault

- High Security
- UL Listed TL-15 Vault
- 2 Hour Fire Rated
- Rated for insurance rider policies
- High Security Vault Hinge

Republic Gun Safe

- UL Listed RSC Rated (Residential Security Container)
- 120 Minute Fire Rated
- High Security Vault Hinge
- 300% Thicker steel than most gun safes on the market today

Black Hawk Gun Safe

- Pending UL RSC Rating*
- 10 Gauge (30% thicker steel than 12 Ga)
- 90 Minute Fireproof
- High Security Vault Hinge

Hunter Gun Safe

- 12 gauge steel
- 45 Minute Fireproof
- Thinnest steel thickness for an RSC rated safe
- Standard Safe Hinge

COMES STANDARD WITH SINGLE DIAL

- 2 Hour Fire Resistant Factory Tested.
- Single Lock.
- Special Design Burglary Resistant Handle.
- UL listed Hollon dial lock.
- Glass re-locker.
- Hard plate.
- Bolt down hole.
- Electronic Lock available upon request for additional cost.
- Highly Compressed Proprietary Concrete mixture.
- Standard Color Battleship Grey.

This is the TL-15 rated safe that thinks it's a TL-30. Not only does it have similar features, it has far exceeded every TL-15 test we've put it through. And that's some testing. This TL-15 withstands the most sophisticated burglar attacks. Our team of experts has punished this baby with everything short of dynamite. They've gone at it with sledgehammers, pickaxes, crowbars and pry bars, power saws, chisels, drills and rotating disc cutters ... with no luck. As if that's not enough, this offers added protection against high-intensity fires. That's right ... this TL-15 has passed our Two Hour, 350°F Fire Test Certification. We're talking forest fire strength.

UL Listed TL-30 High Security Safe line. Whether you own a jewelry store or work in a pharmacy then this is the safe for you. The tools used by these professionals are not your average power tools purchased from the hardware store down the street. We are talking some serious power here folks. And still these bad boys stood their ground.

- TL-30 UL Rated.
- 2 Hour Fire Rated.
- UL Listed Dial or Keypad.
- Listed Multiple Relockers.
- Insurable Contents.

30ft
impact
rated

- Two-hour KSG 4500 rated for 1750 degrees fire safe.
- 30 foot impact rated.
- Extra thick body and door construction for added strength and appearance.
- Choice of electronic keypad or dial with key.
- 2-Active locking bolts PLUS fixed hinge side bolts.
- One removable shelf (HS-500 model only).
- One anchoring hole. (Bottom)
- Bolting hardware included.

Maximum protection from fire and water. Hollon Home Safes offer a full 100% more fire protection than the average home safe on the market today. Thicker Walls... thicker doors... and a grooved door seal promise a no-holds-barred defense against fire and water. Tested at a blazing 2-hour KSG 1750° F external temperature, this safe is still able to maintain an internal temp of only 350° F. To top it off, it's also 30-foot impact rated. This is one tough safe to crack.

- 1 Inch Bolts.
- 3-way locking chrome bolt work.
- Interior adjustable shelves in all models.
- Interior drawer.
- Door detente device automatically locks safe.
- Electronic keypad upgrade on all models.
- Recessed curvature provides virtually airtight construction preventing smoke damage.
- Water resistant.
- Anchor bolt for bolting safes to the floor on all models except HS-1750E.

As Hard to kill as the Terminator

Hollon Office Safes are ultimate protection machines... manufactured with state-of-the-art technology and craftsmanship to provide the best protection of your documents and valuables against the threat of fire and burglary.

Just look at these features:

- Rated for 2 full hours at 1750° F outside, these safes refused to heat up past 350° F on the inside.
- Survived the KSG 30-foot impact test that simulates falling from a collapsing second story onto concrete.
- Bolt-down hole and hardware are included to add burglary resistance to the already heavy duty bolt work.

These elite safes are practically unstoppable.

Extreme protection from extreme attacks
Resistant to extreme fire and burglary attacks, these hardcore safes have passed a grueling test - 2 hours of fire at an external temperature of 1700° F, and a 350° F internal temp. Engineered with strong burglary resistance, heavy duty hinge and a unique Hollon feature - a 1-inch-thick hinge side locking bar that extends from the top to the bottom of the door. These models are ranked between our Office Safe series and our Commercial TL-15 series. Comes with your choice of a standard UL listed Group II Dial lock or Electronic keypad.

With American and Global Part

On the money when it comes to security. A Solid Steel B-Rated Commercial Cash Safes are designed for heavy use in a retail environment. Each Safe is offered with a S&G Type 1 S&G Spartan Electronic Lock or S&G Group II mechanical dial. Maximum security. Maximum affordability. That's the Hollon standard, "Only The Best"

- "B" Rated Burglary Construction.
- 1/2" Solid Steel Door.
- Total Door Thickness: 3".
- 1-1/4" Massive Chrome Plated Active Locking Bolts.
- UL Listed S&G Group 2 Dial Lock or Spartan Electronic lock.
- Drill Resistant Hard Plate.
- Active Spring Loaded Re-locker.
- Full Length Locking Bar to Deter Attacks on the Hinges.
- Removable Shelf.
- Pre-Drilled Anchor Holes (hardware not included).

- B Rated Floor Safe for foundations.
- 1/2" thick solid steel door.
- Spring loaded re-locking device.
- Full length dead bar.
- Powder coated for more durable protection.
- U.L. listed Group II lock, with re-locker to protect against burglary attempts.
- 5 chrome plated solid steel locking bolts.
- Air-spring bar enable the door can be opened easily.
- Drill resistant hardplate to protect lock.

You'll need a jackhammer to pry these loose.

Floor Safes offer the added advantage of concealment. Once installed in concrete and covered with a rug or carpet, they are near impossible to find. If the safe is found, it will literally take a jack hammer to wrest it out of the foundation. And the door is reinforced with drill-resistant hard plate made of hardened steel. You can't buy a drill or drill bit at your local hardware store that will even scratch the surface. That's why these bad boys are our favorite high-security safes for gold coins, jewelry, paperwork, and a variety of other valuables. B Rated and strong enough to use in a commercial environment but still affordable enough to install at home. We also install one of our UL listed Group II high usage Hollon dials at no additional charge - to give you decades of problem-free usage.

DIAL LOCKS

The new standard in safe locks!

SARGENT AND GREENLEAF GROUP 2M MECHANICAL SAFE LOCKS

- Three brass and aluminum combination wheels provide 1,000,000 theoretical combinations,
- Designed and constructed to perform in the most demanding commercial applications,
- Internal relock trigger secures the lock in the event of a burglar's punch attack,
- Four-way drive cam allows mounting right-hand, left-hand, vertical-up, or vertical-down.

SARGENT AND GREENLEAF DIALS AND RINGS

front reading, large Spy-Proof®, large Spy-Proof®, large

- All dial and rings pictured above and listed in the table directly below can be used with any Group 2 or Group 2M-type lock.
- All dials incorporate spindles splined to 41 on the dial. This results in a forbidden zone of 90 to 10 in Group 2 and Group 2M combination locks.

SPARTAN PIVOTBOLT

- Underwriters Laboratories Listed Type 1, VdS Class 2, EN1300 B, A2P B/E, DNV, and RoHS (Reduction of Hazardous Substances) compliant.
- The Spartan™ PivotBolt™ lock features a motor driven locking mechanism for an extra measure of security and longer battery life.
- Lock bolt retraction and extension is controlled by the movement of the safe's boltwork.
- The Spartan™ PivotBolt™ automatically locks to re-secure the safe whenever the container's boltwork moves to the fully closed position, discouraging the common (non-secure) practice of day-locking.
- The Spartan™ PivotBolt™ is connected to the keypad only by cable, which means the lock does not need to be placed directly behind the keypad. It can be located anywhere on the inside of the safe door.
- All PivotBolt models use the standard S&G Magic Module footprint, allowing for easy retrofit without the need for boltwork or mounting screw location changes. Plus, it's universally handed and reversible for RH, LH, VU, and VD mounting.
- Two modes of operation, STAR and BASIC, to let you choose the operating procedures that are most intuitive to you.
- Management reset code, one master code, and one user code that can be quickly enabled or disabled by the master code. The management reset code (MRC) lets you set a new master code of your own choosing if the old master code is lost or forgotten.
- The Spartan™ PivotBolt™ has a penalty time feature to prevent opening by entering sequential or random codes until a valid code is found.
- The keypad sounder (beeper) can be tuned on or off by entering a simple keypad command.
- All programming is quickly and easily done via the keypad (no separate programming equipment required).
- The lock bolt withstands 225 lbs. (1000 newtons) of bolt end pressure for a high level of security in boltwork blocking applications.
- Can be used with the S&G 2-battery keypad, standard 1 -battery keypad (standard or lighted), or the non-rotating low profile keypad.

6120 SERIES

- Underwriters Laboratories Listed Type 1, and RoHS (Reduction of Hazardous Substances) compliant.
- A motor-driven lock bolt offers a high level of security by eliminating the threat of vibration and bouncing attacks.
- Management reset code, one master code, and eight user codes.
- Management reset code (MRC) restores the lock to its original factory code if the master code is lost.
- Time delay up to 9 minutes.
- The 6120 Series incorporates a penalty time feature to prevent opening by entering sequential or random codes until a valid code is found.
- The deadlocking square bolt model withstands 225 lbs. (1000 newtons) of bolt end pressure for a high level of security and durability in boltwork blocking applications.
- Non-deadlocking spring bolt model is designed for lightweight and inner compartment doors that require the lock to latch and secure the door.
- Can be used with the Biometric Keypad, 2-battery keypad, standard 1 -battery keypad (lighted and non-lighted), and the low profile keypad.

TITAN PIVOTBOLT

- Underwriters Laboratories Usted Type 1, VdS Class 2, CEN B, A2P B, DNV, and RoHS (Reduction of Hazardous Substances) compliant.
- The Titan PivotBolt™ lock features a new design, motor driven locking mechanism for an extra measure of security and longer battery life.
- Lock bolt retraction and extension is controlled by the movement of the safe's boltwork.
- The Titan PivotBolt™ automatically locks to re-secure the safe whenever the container's boltwork moves to the fully closed position, discouraging the common (non-secure) practice of day-locking.
- The Titan PivotBolt™ is connected to the keypad only by cable, which means the lock does not need to be placed directly behind the keypad. It can be located anywhere on the inside of the safe door.
- S&G Magic Module footprint for easy retrofit, and it's universally handed and reversible for RH, LH, VU, and VD mounting.
- Three modes of operation: Multi-User, Manager/Employee, Dual Control.
- Management reset code, one master code, one supervisor code, eight user codes, and one time delay override code*. The management reset code (MRC) lets you set a new master code of your own choosing if the old master code is lost or forgotten.
- The Titan PivotBolt™ has a penalty time feature to prevent opening by entering sequential or random codes until a valid code is found.
- All programming is quickly and easily done via the keypad (no separate programming equipment required).
- The lock bolt model withstands 225 lbs. (1000 newtons) of bolt end pressure for a high level of security in boltwork blocking applications.
- Can be used with the S&G 2-battery keypad, standard 1 -battery keypad (lighted and non-lighted), or the non-rotating low profile keypad.
