

Our inspiration

Facilitating physical and emotional bond between child and carer

We love to use:

- Organic and recycled textiles
- 67% Better Cotton Initiative (BCI sustainable cotton production)
- 30% Coolmax recycled polyester from plastic bottles.
- 3% Lycra for stretch and comfort
- Processes that reduce water, energy and CO2 emissions

Comfortable seat for babies Cómodo asiento para bebés

Sustainable textile cover Funda de textiles sostenibles

Zamack buckle Hebillas SIN níquel

Built-in extension Extensión incorporada

Secure padded belt Práctico cinturón acolchado

Anatomical design for adults Ajuste anatómico para el adulto

Organic cotton Inner cover Funda interna de algodón bio

Inner pocket Bolsillo interno

Recycled polyester strap Cinta de algodón reciclado

Packed in recycled cotton bag Bolsa de algodón reciclado

The "BebéSit" is a lightweight and efficient device for carrying an infant in a position physiologically optimal for both adult and child. Adjusted firmly on top of the pelvic girdle, it acts as an extension to the hip without twisting the pelvis. It also avoids harm to the wearer's spinal column and is conducive to the physical and emotional development of the child.
