## Hyper-Charger Air Filter

RB Innovations introduces its new line of 1/5th scale air filters. The Hyper-Charger features a realistic automotive blower look and function. The charger scoops the air and forces it directly into the engine. This intake allows for a cleaner and cooler air charge maximizing performance of any gas engine. At the heart of the system is a high flow pleated air filter. This filter captures the finest dirt particles while providing extended run time before cleaning is required.

*Nitrous Injection also Available*
