ICE AMPS BLOWER SYSTEM

RB Innovations goes High Voltage!!

Are you pushing your motor to the max and need some temperature relief?

RB has the ULTIMATE solution!

RB launches the Ice Amps Blower System! This belt driven twin turbo fan cools your motor for maximum performance.

Unlike any other system this blower unit is protected within the air scoop assembly.

*The automotive styled scoop provides maximum airflow and pre-filters the air. This system drops motor temperatures as much as 35 degrees!**

A must have for any basher or hardcore fanatic! Very easy to install and fits motors with outside diameters between 1 1/2" and 1 7/8"

Includes, Blower assembly, air scoop, mounting bracket and drive belt.

[PATENT PENDING]

**This product is for supplemental cooling purposes. Temperature drop will vary depending on your setup.*
