Side-Winder®

Experienced ice anglers know that vertical jigging with Acme spoons is one of the most effective ways to target trophy fish under the ice. When jigged with quick, short lifts of the rod, the *Side-Winder* darts upwards and falls with a fluttering action that imitates an injured or scared shad, shiner or other baitfish. Longer, slower jigging strokes allow the Side-winder to have a unique rocking motion to trigger more stubborn fish. Fish this spoon with no-bait, or with a minnow head to add scent, either way, trophy fish can't resist.

K.O. Wobbler®

This lure excites fish by sight and sound! Gamefish are sensitive to the vibrations created by baitfish on the move. The *K.O. Wobbler* mimics this sound with their precision-engineered "Sonic Flipper Tail". Once they are drawn by the sound, gamefish are excited into striking by the K.O.'s flashing tail and seductive side-to-side wobble. It's an offer they can't refuse.

1/2 oz. (8-12 lb. test) spinning, baitcasting trolling – for large trout, bass, pike, steelhead and landlocked salmon.
3/4 oz. (10-15 lb. test) for heavy spinning, deep trolling, casting – for Pacific and Great Lakes salmon, lake trout and salt water fish.

Kamlooper®

Casts like a bullet, travels for a country mile — *Kamlooper* is virtually unaffected by strong winds. The best of the spoon lures, it's perfect for catching gamefish (which gobble 80% of their prey from the bottom or in deeper feeding zones). The high weight /profile ratio means that the Kamlooper gets down where the big ones live and eat. There is only one Kamlooper and smart fishermen know it.

3/8 oz. (6-10 lb. test) for trout, lake trout, bass, walleye, salmon, steelhead and pike.
3/4 oz. (10-15 lb. test) for trout, steelhead, salmon, pike, muskies, trophy-class Brown and Dolly Varden trout.

Stee-Lee®

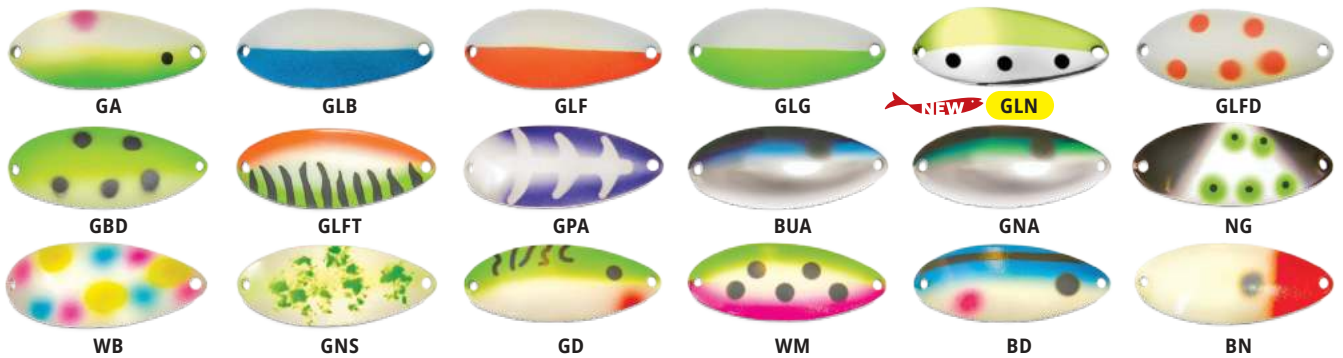

These casting spoons are a favorite of stream and river anglers all over the Northwest. They are proven winners for steelhead when cast into moving water and allowed to wobble as they are drifted on a tight line near the bottom of the stream. They are equally effective for salmon under similar circumstances.

Little Cleo® Color Chart

UV / Super Glow Series

Diamond Series

Little Cleo®

Second only to the news that salmon and steelhead were tearing up tackle in the Great Lakes was the discovery that Little Cleos were the surest way to catch them. To anglers in the know that wasn't really news. For over 30 years Little Cleos have been taking limit catches of gamefish throughout North America. The unique hump-backed shape of Little Cleo results in a seductive, wiggling action as the lure is drawn through the water. The illusion created is one of a fat baitfish, acting in an erratic, confused manner. This odd behavior triggers the predatory nature of the gamefish, who strike out of curiosity and anger, as well as hunger. This three-way appeal hooks them every time, and explains Little Cleo's fantastic success — it's famous countrywide as the one lure that takes all gamefish.

The "no-brainer" carolina rig!

Wac-o Jig

Fishing the *Kalin's Wac-o Jig* is an extremely versatile technique that can be applied on any body of water. The round ball head features an extremely sharp 1/0 hook for solid hook ups. The most important quality of this technique is the ability to keep the bait in one place while shaking it. Tip your favorite soft plastic bait or a *Kalin's Weenie Worm* and the action created by the *Wac-o Jig* is a lively quiver, ideal for enticing highly pressured bass. Make sure to have a slack line and hold the rod tip up at a 10 o'clock position for best results.

The Google Eye Series combines sight and sound to trigger more bites in all water types!

It's Shockwave Rattle System has been designed to call fish in and trigger a bite. It can be rigged with your favorite Kalin's plastics, or with live baits, making it one of the most versatile fish catching lures in your tackle box. Cast it, jig it, twitch it, rip it, or use a slow steady retrieve along the bottom to match the mood of the fish. The high carbon steel Katana™ hook is precision sharpened, and hardened to ensure a piercing hook-set. The Life-like rattling jig head features a glass eye to reflect light and add additional visual dimension and action to the jig. Specially selected color patterns have been chosen to grab the fish's attention, and put more fish topside.
