Are you looking for a distinctly Unique acoustical and 100% Sustainable Product Solution? The new TerraAcoustics™ product line from Murano Acoustics™ is designed to provide you with a wooden acoustical wall and ceiling panel system to help you achieve your environmental stewardship goals for your project.

The Core

- TerraAcoustics™ offers our wood veneer acoustic panels that are Manufactured from pre-consumer recycled wood, meeting the most stringent formaldehyde emission standards in the world
- Our MDF core has been awarded CARB NAF Exemption due to formaldehyde-free adhesive System
- Meets CARB Phase 2 emission requirements and is ideal for LEED projects such as schools, libraries, hospitals, offices and museums
- Class A fire rated per ASTM-E84 - Contributes to LEED Credits: MR4, MR5, MR7 and IEQ 4.4.

The look

TerraAcoustics™ has a wide range of wooden veneers and bamboo veneer options. We now offer a wide range of HPL & LPL patterns that include solid colors, wooden patterns, marble patterns, and many more unique patterns. Please ask us for more options available!

The sound

TerraAcoustics™ is now pairing our panels with TerraCORE™ Polyester acoustical infill to provide sustainable & healthy solution to aid in noise pollution! Constructed from polyester fibers which enhance acoustical performance. An eco-friendly substitute for the out dated fiberglass infill. Our polyester infill provides a safe environment while aiding in sound control.

- 100% recyclable
- No chemicals added
- Consists of 80% post manufacturing recycled material
- Declare Label
- Available in white or black
