I am Your Foot Peeling Pack!

Premium Foot Peeling Pack contains a pair of exfoliant wraps. According to your needs, you may use on both feet or on just one foot. **If latter, save the remaining wrap for the next time!**

Maximum Foot Size
260mm (10inch/41)

Maximum Foot Size
280mm (11inch/44)

Maximum Foot Size
300mm (12inch/46)

DIRECTIONS FOR USE

- REMOVE ANY NAIL POLISH, NAIL ARTS, AND ACCESSORIES FROM YOUR FEET. CLEANSE YOUR FEET THOROUGHLY AND TOWEL DRY.
- TAKE OUT A PAIR OF EXFOLIATION WRAPS AND STICKER TABS.
- CUT THE TOP PORTION (ABOUT 1/3 INCH) OF EACH WRAP WITH SCISSORS TO REMOVE SEALS.
- IN SEATED POSTURE, PLACE YOUR FEET INSIDE THE WRAPS AND SECURE WITH STICKER TABS AROUND YOUR ANKLES.
- RELAX FOR 60 MINUTES AND DISCARD THE WRAPS.
- RINSE YOUR FEET THOROUGHLY WITH WARM WATER.
- IN A FEW DAYS, DEAD SKIN CELLS WILL BEGIN TO EXFOLIATE. DO NOT FORCE TO PEEL OR SCRUB! IT WILL BE NATURALLY GONE OVER TIME. FOR BEST RESULTS, TAKE A WARM FOOT BATH EACH EVENING.
- ※ DEPENDING ON SKIN TYPE OR CURRENT SKIN CONDITION, YOU MAY EXPERIENCE THE COMPLETE EXFOLIATION OF SOLE CALLUS OR ONLY A SLIGHT EXFOLIATION OF DEAD SKIN CELLS.

: AVAILABLE IN 3 DIFFERENT SIZES

LARGE fits up to 300mm
US 12 inch / EU 46

MEDIUM fits up to 280mm
US 11 inch / EU 44

SMALL fits up to 260mm
US 10 inch / EU 41

: AVAILABLE IN 3 DIFFERENT SIZES

LARGE 1 Pack *10

MEDIUM 1 Pack *10

SMALL 1 Pack *10

: Kocostar Premium Foot Peeling Pack

- The product contains a pair of exfoliant wraps and two sticker tabs.
- Secure the wraps by applying each sticker around your foot
- Improved design offers a better fit.

※ For your safety, avoid standing or walking with the product on.
※ After 60 minutes, remove the wraps and wipe off the peeling gel with towel.
Then move to the bathroom to rinse feet thoroughly.

to treat feet callus**

Clinical Trial Report

First market

Clinical evaluation of the efficacy of
Kocostar Premium Foot Peeling Pack
in improving foot desquamation

June 09, 2021

Ellead Co., Ltd.

Study contents

1. Objective

The purpose of this clinical study was to evaluate the efficacy of Kocostar Premium Foot Peeling Pack in improving foot desquamation.

2. Duration of study

May 03, 2021 – June 09, 2021

(Test period: May 03, 2021 – May 27, 2021)

3. Research organization

Ellead Co., Ltd.

Address : 7&8 fl., 325, Hwangsaеul-ro, Bundang-gu, Seongnam-si, Gyeonggi-do, Korea

Clinical Trial Report

Method

1. Volunteers selection

1) Volunteer selection method

(1) Inclusion criteria

- 20 – 60 years old females who is judged to have high level of foot desquamation.
- Those who fully understand the objective and contents of the study and voluntarily decide to participate.
- Those who understand the possible adverse reactions and sign the informed consent form.
- Those who do not have acute or chronic diseases including skin diseases which can affect the study (severe infections or eczematous skin diseases including atopic dermatitis).
- Those who are available for observations throughout the entire study.
- Those who are able to visit the laboratory according to set schedules and follow the study instructions.

Results

1. Volunteers

The final 21 volunteers completed the study, and the information and age grouping of the volunteers are shown below (Table 1, 2 / Figure 1).

Table 1. The information of volunteers

No. of volunteers enrolled (n)	21
No. of volunteers dropped out (n)	0
No. of volunteers completing the study (n)	21
Average of age (Stdev.)	48.76 (8.07)
Sex	Female

Table 2. Age distribution of volunteers

Age	20s	30s	40s	50s	60s	Total
No.(%)	1 (4.76)	2 (9.52)	8 (38.10)	9 (42.86)	1 (4.76)	21 (100.00)

Figure 1. Age groupings of the volunteers

Clinical Trial Report

2. Effectiveness

1) Assessment of skin desquamation on the foot by DSLR photography and image analysis

The results of skin desquamation on the foot assessed by DSLR camera and image analysis, statistical analysis and rate of decrease are shown below (Table 3 – 5 / Figure 2).

Table 3. The results of foot desquamation (pixel) and statistical analysis (baseline vs. after)

	Baseline	After 1 week
Mean ± S.D.	85674.762 ± 29806.058	30275.667 ± 29500.065
p-value	-	< 0.001 ***

*Probability p (Paired t-test, Significant: *** $p < 0.001$)

Table 4. The rate of decrease in foot desquamation (%)

	After 1 week
%	64.786

The results of skin desquamation on the foot showed a decrease after 1 week of the test product application compared to baseline with statistical significance ($p < 0.001$) and the rate of decrease was 64.786% (Table 3, 4 / Figure 2).

The results of assessment of skin desquamation on the foot by DSLR photography and image analysis are shown in Table 6, 7 of Attachment 1.

Conclusion

This clinical study requested by First market for the evaluation of the efficacy of Kocostar Premium Foot Peeling Pack in improving foot desquamation was conducted at Ellead Co., Ltd. with 21 volunteers.

The results of assessment of skin desquamation on the foot by DSLR photography and image analysis showed a decrease in skin desquamation (pixel) after 1 week of the test product application compared to baseline with statistical significance ($p < 0.001$) and the rate of decrease was 64.786%.

Therefore, Kocostar Premium Foot Peeling Pack was proven to help improve foot desquamation after 1 week of the test product application.

The test product did not show any symptoms of adverse skin reaction during the test period.

This study was inspected in accordance with the standard operating procedures of Ellead. To assure compliance with the study protocol, the quality assurance unit completed an audit of the study results and final report.

KOCOSTAR PREMIUM FOOT PEELING PACK WAS PROVEN TO HELP IMPROVE FOOT DESQUAMATION AFTER 1 WEEK OF THE TEST PRODUCT APPLICATION.

THE RATE OF DECREASE WAS 64.786% AFTER 1 WEEK.

:DON'T OVERLOOK DEAD SKIN ON YOUR FEET!

It's not only our face that needs daily care. Our feet also need good care each day to stay healthy and beautiful.

Our feet toil and labor as we sit, stand, walk or run, enduring the force of gravity. This results in thickened skin, also known as callus. It gradually builds up and hardens to cause discomfort or pain – and at some level, it starts to crack and even bleed.

Exfoliate away the nuisance with KOCOSTAR's Premium Foot Peeling Pack. Carefully formulated with natural ingredients, our hassle-free treatment will restore soft and smooth feet you can reveal with confidence.

ABOUT DEAD SKIN CELLS

WHY DOES DEAD SKIN CELL BUILD UP UNDER OUR FEET?

The outmost layer of our skin is made of dead skin cells. They protect our body from harmful factors until they get replaced by new cells. But when our body is exposed to repetitive friction and pressure, dead skin cells begin to accumulate and form a thick and hard layer. Our feet always support our body weight and withstand its pressure – and that's why they often develop callus and corn.

WHY SHOULD WE REMOVE DEAD SKIN CELLS?

Anyone can suffer from dry and hardened feet. It's not easy to remove the thick and tough layer off the feet once callus starts to develop. If you don't take care of your feet periodically, your feet will become rough and cracked and you may experience discomfort and pain while standing or walking. It can also lead to bleeding.

THE PRINCIPLE OF FOOT PEELING PACK

The epidermis is the outmost layer of our skin. It's made of dead skin cells that protect our skin from harmful factors such as heat and sunlight.

The dead skin cells are supposed to come off naturally and be replaced by new ones, but sometimes they accumulate and develop into a thick and hard layer. KOCOSTAR's Foot Peeling Pack helps to remove the outdated cells and reveal soft and fresh skin.

The key ingredients of our Foot Peeling Pack are glycolic acid, lactic acid, alcohol, and arginine.

Glycolic acid and lactic acid are Alpha Hydroxy Acids (AHAs) and they break the bonds between skin cells to activate exfoliation. Alcohol softens the outer layer of the skin so dead skin cells can easily come off.

Arginine, an alkaline amino acid, neutralizes AHAs to balance the pH level of the formula and prevent potential skin damage.

In addition to that, carefully selected herbal extracts hydrate, soothe, and refresh your skin to minimize irritation.

8 TIPS FOR USING FOOT PEELING PACK

Be prepared. For best results, soak your feet in a tub of warm water for 15 minutes before using the product.

Apply on clean feet. Remove any nail polish, nail arts, and accessories from your feet.

Follow the direction. Carefully read the direction and closely follow each step.

Be patient. It takes 3 to 4 days for active ingredients to work through your skin. Once dead skin cells begin to drop out, the exfoliation will take about a week to complete. Depending on your skin type, however, the entire process may take up to 14 days.

Keep your feet moist. If your feet are too dry, the result may not be satisfying. Taking a foot bath each evening with warm water can expedite the exfoliating process. Do NOT use hot water as it may harm your skin.

No tools, please. You may gently rub off the falling skin with your hands, but do NOT force to peel or scrub with any tools.

Remember after-care. Renewed skin is soft and weak. Following the treatment, apply sunscreen to your feet before exposing them to direct sunlight.

Use once every month. The result will last about a month. Repeat once every month to keep your feet beautiful and glamorous.

HOW TO USE

- Take out the Premium Foot Peeling Pack.
- Wear wraps on each foot. Make sure to place your feet between the fabric liners.
- Secure the wraps with sticker tabs.
- Sit back and relax for 60 minutes. Watch your favorite TV shows or read magazines.
- Remove the wraps and wipe off the peeling gel with a towel. Do NOT stand or walk with the wrap on as you may slip on the floor.
- Once you wiped your feet, move to the bathroom and rinse your feet thoroughly with warm water. Do NOT use hot water as it may harm your skin.

: AFTER THE TREATMENT

In 3 to 4 days, dead skin cells will begin to peel off. Depending on your skin type or current skin condition, you may experience a complete callus removal or only a slight exfoliation of dead skin cells. The entire process will take about 1 to 2 weeks.

Your feet may feel dry during exfoliation. Apply moisturizing cream or use KOCOSTAR's Foot Moisture Pack to keep them soft and supple.

Cleanse your feet thoroughly with warm water each evening.

Dead skin cells may fall on the floor or on bed.

You may gently rub off the falling skin with your hands, but do NOT

ⓘ PRECAUTIONS

- **Do NOT use the product if you are pregnant.**

Remove any nail polish, nail arts, and accessories from your feet.

- **Do NOT stand or walk during the treatment as you may slip on the floor. If you must, wear slip-resistant slippers over the product for your safety.**

- **Keep product out of the reach of children.**

- **Store at room temperatures.**

- **Keep product away from direct light.**

- **Use immediately after opening.**

- **Do not reuse.**
