Outil de coiffage strand perfect

Le Outil de coiffage strand perfect de amika® présente des plaques 100% céramique, ainsi que des éléments de chauffage en céramique situés derrière les plaques. Les fers plus conventionnels qui prétendent être en céramique utilisent en fait des éléments de chauffage en métal derrière les plaques. Les plaques en céramique irradiant de la chaleur infrarouge préservent l'humidité de la tige du cheveu sans endommager la cuticule. Le résultat final est incroyablement brillant et soyeux, l'effet électrostatique est réduit, les frisottis éliminés, les cheveux sont souples et les possibilités de coiffures illimitées! Pour les cheveux colorés, la chaleur céramique resserre la cuticule, fixe la couleur et évite la décoloration rapide.

Lisses

Séparez vos cheveux et mettez des pinces. Prenez une section de cheveux d'environ deux pouces, serrez doucement le Outil de coiffage strand perfect de amika® aussi près possible du cuir chevelu et tirez lentement et uniformément vers le bas jusqu'à la pointe des cheveux. Il est préférable d'aller plus lentement et de glisser sur la section de cheveux plutôt que d'aller rapidement et d'avoir à recommander la même section plusieurs fois.

Frisés

Prenez une section de cheveux à la racine et commencez à faire tourner le fer plat à 360°. Une fois tournée, tirez le fer plat sur la longueur des cheveux. Pour des boucles moins serrées, tirez le fer plat sur les cheveux plus vite, pour des boucles plus serrées, allez plus lentement.

Volumineux

Prenez une section de cheveux à la racine et serrez doucement le fer plat. Ensuite, pivotez le fer plat d'un demi-tour, et tirez dans la direction opposée pour soulever et donner du volume.

Tournés

Prenez une section de cheveux entre les plaques à partir de la racine. Glissez le fer plat sur les cheveux jusqu'à ce que vous atteignez la région que vous voulez tourner vers l'extérieur ou vers l'intérieur. Ensuite, commencez à tourner le fer plat vers l'extérieur ou l'intérieur environ 180° ou moins—selon la taille de la courbe que vous désirez atteindre.

Plancha de Pelo Mechón Perfecto

La Plancha de Pelo Mechón Perfecto de amika® tiene placas de cerámica al 100%, así como calentadores de cerámica detrás de las placas. La mayoría de planchas convencionales que reclaman ser cerámicas utilizan en realidad calentadores metálicos detrás de las placas. Las placas de cerámica irradian calor infrarrojo lejano, preservando la humedad en el tallo del cabello y protegiendo la cutícula contra cualquier daño. El resultado final será un cabello increíblemente brillante, sedoso, sin estática ni encrespamiento, fácil de manejar y con posibilidades de estilizado ilimitadas. Para cabello teñido, la cerámica caliente sella la cutícula, fijando el color y evitando el destiñido precoz.

Liso

Separ el cabello y colocar los ganchos. Toma una sección de cabello de unos cinco centímetros, apriete suavemente Plancha de Pelo Mechón Perfecto de amika® tan cerca del cuero cabelludo como sea posible y tire lenta y uniformemente hasta la punta del cabello. Es mejor ir poco a poco y arrastre en la sección de cabello en lugar de ir rápido y tener que repelir la misma sección en varias ocasiones.

Rizado

Toma una sección de cabello en la raíz y empezar a girar la plancha a 360°. Una vez convertido, tire de la plancha en la longitud del cabello. Por menos rizos apretados, tire de la plancha sobre el cabello más rápido para rizos más, ir más lento.

Voluminoso

Toma una sección de cabello en la raíz y apretar suavemente la plancha. Luego, gire el plato un hierro de media vuelta, y tire en la dirección opuesta para levantar y dar volumen.

Convertido

Toma una sección de cabello entre las placas de la raíz. Deslice la plancha sobre el cabello hasta llegar a la zona en la que quiere dar vuelta hacia afuera o hacia adentro. Entonces comenzará a girar la plancha en el exterior o en el interior alrededor de 180° o menos, dependiendo del tamaño de la curva que desea alcanzar.

Important Safety Precautions

When using electrical appliances, especially when children are present, basic safety precautions should always be followed, including the following: READ ALL INSTRUCTIONS BEFORE USING. KEEP AWAY FROM WATER.

DANGER As with most electrical appliances, electrical parts are electrically live even when the switch is off. To reduce the risk of death by electric shock: 1.

Always unplug it immediately after using.

2. Do not use while bathing. 3. Do not

place or store appliance where it can

fall or be pulled into a tub or sink. 4.

Do not use outdoors or operate where

aerosol (spray) products are being used

or where oxygen is being administered.

13. Do not direct hot air towards eyes

or other heat sensitive areas. 14.

Attachments may be hot during use.

15. Never use while sleeping. 11. Never drop or insert any object into any opening or hose. 12.

Do not use outdoors or operate where

aerosol (spray) products are being used

or where oxygen is being administered.

13. Do not direct hot air towards eyes

or other heat sensitive areas. 14.

Attachments may be hot during use.

15. Never use while sleeping. 11. Never drop or insert any object into any opening or hose. 12.
