

Oral Care Kits

Helpful Kits for At-Home Caregivers

Oral Care Kits contain just the right starter products to assist caregivers when they need to brush the teeth of another person. Open Wide® Mouth Rests are useful when the cared-for person has difficulty keeping his or her mouth open for brushing. Surround® Toothbrushes clean all surfaces of the teeth at the same time so more is accomplished with each stroke. The DVD *"How to Brush the Teeth of Another Person"* gives caregivers necessary information to feel confident in the care they provide.

Oral Care Kit	Mouth Rests Included	Surround Toothbrush Included	DVD Included	Price

Open Wide® Mouth Rest

Comfortably Keeps Mouth Open

The **Open Wide® Mouth Rest** is helpful for those who lack the cooperation or motor control to keep the mouth open. It is made from a special foam with a rigid core to add stability. It is sturdy enough to resist biting pressure, but has enough "give" to be comfortable for the person receiving care. The mouth rest has a long handle for safe, easy control. Ask your dentist, hygienist or medical professional to demonstrate proper use of the mouth rest.

U.S. Patent No. 5,735,691

The Thick Mouth Rest has 40% more foam to handle aggressive biting pressure.

Surround® Toothbrush

Cleans All Surfaces of the Teeth at the Same Time

Now with a new, beefier handle!

The Surround® Toothbrush is a great choice for people with low tolerance for daily toothbrushing. It has three bristle pads to clean all surfaces of the teeth at the same time. Whether the user is brushing his own teeth or someone else is doing the brushing, the Surround Toothbrush can make the process easier because more tooth surface can be cleaned with each stroke.

The toothbrush is covered with a rubber-like material to help protect the mouth if the person moves unexpectedly or falls while using the brush. Soft, end-rounded bristles and compact head make brushing safe and comfortable.

** Not made with natural rubber latex*

Surround® Toddler Brush

Helps Youngsters Brush Better Independently

New! Smiley Face design!

*Latex-Free**

The Surround® Toddler Toothbrush is designed for children aged 6 and younger, and has 3 bristle pads arranged at the correct angles for proper cleaning of teeth and gums. When your toddler begins to brush independently, he or she can accomplish more with each brush stroke because the bristles are in contact with the front, back and biting surfaces all at the same time.

The bristles hug the teeth, and that helps the youngster get the “feel” of where to brush. The handle is chunky to make gripping easier for young hands. And the smiley face design makes brushing more fun.

** Not made with natural rubber latex*
