

Specialized Care Co, Inc.

Rainbow® Stabilizing System

Protective Stabilization Keeps Everyone Safer

Whether you are treating a young child, or an older person with behavioral limitations, an unavoidable reality is that some patients may become unexpectedly active during a procedure. Since dentistry involves the use of sharp instruments in a small, highly vascularized area, reliable patient stability is critical for safety.

The Rainbow® Stabilizing System is a state-of-the-art protective device consisting of a colorful, breathable mesh wrap and a vinyl-covered padded board to increase patient and caregiver acceptance. The system helps to curb sudden kicking or grabbing actions that could put the patient and staff in harm's way.

Stay N Place® Head & Neck Rest

New, Trimmer Backboard Supports the Patient's Head and Neck

Our Stay N Place® Head & Neck Rest allows the patient to be treated in his own chair - no need to transfer. New! The head area has been narrowed to improve oral access and permits the pillows to be better located to facilitate the "chin up" position.

This low-tech device is a real multi-tasker. It can be used for in-office as well as off-site care. The pillows can be easily moved as the patient settles in, to assure proper support. Clean with a disinfecting agent and wipe dry with a soft cloth.

It's a great time to try the new design - it is on Spring Special through June 8th.

The Head and Neck Rest attaches to the patient's chair.

Robot Arm™ Stabilizers

Help Teach Young Patients How To Sit Safely for Dentistry

These arm and leg stabilizers control kicking and grabbing movements that may pose a danger to both patient and practitioner.

The **Robot Arm™ Stabilizers** are a perfect tool to teach young patients how to keep hands out of harm's way. They start out as flat sheets and are formed into cylinders around arms or legs to prevent grabbing, kicking and bending movements. The Velcro® material makes the arm stabilizers easy to apply and remove during the appointment as a patient learns. They are colorful and fun, appealing to parents and patients alike.

The Robot Arm Stabilizers are just one in a series of products that help you provide safe, comfortable care to children and people with special needs. Please see the following pages for information about other products that help prevent sudden, unsafe patient movement.

Velcro® is a registered trademark of Velcro BVBA.

Important: It is the clinician's responsibility to assure the appropriateness of any medical device for a given patient. Be sure to understand all applicable regulations regarding the use of protective stabilization. Never leave patient unattended.

Robot Arm™ Stabilizers (packaged in pairs)

Rainbow® Board

The Rainbow® Board Helps You Put Safety First During Dental Procedures.

The **Rainbow® Board** provides the foundation for the stabilizing system. It is available as a **Hinged Board** or a **Straight Board**. The Hinged Board bends with the dental chair and allows the patient to be moved to an upright position quickly, which is helpful should the patient have a medical emergency during a procedure. We offer the Straight Board for practitioners whose equipment is better suited to a rigid board, and for those who simply prefer it. Rainbow Boards are used in conjunction with Rainbow Wraps (next page).

The helpful **Rainbow Head Tilt** keeps the upper torso lifted and the head in the “chin up” position.

The **Rainbow Knee Support** relieves pressure on the lower back. It can be used with or without the stabilizing system.

The vinyl covered **Rainbow Board** is padded for patient comfort.

Rainbow® Wrap

Our Unique Wrap is Designed Specifically for Dentistry.

The **Rainbow® Wrap** keeps arms and legs out of harm's way while sharp instruments are in use. Everything about it has been designed for the needs of a dental office. The breathable mesh avoids overheating that often accompanies patient agitation. An opening in the wrap allows you to conveniently use monitoring devices. The wrap has a friendly look, so it is better accepted by patients and parents. But it doesn't stop there. The wrap is made of a moisture-resistant, washable fabric - so even laundering is made simple.

The knee belt can be attached to the wrap with snaps for more efficient preparation.

New! Tapered shoulders for a more secure fit.

Important: It is the clinician's responsibility to assure the appropriateness of any medical device for a given patient. Be sure to understand all applicable regulations regarding the use of protective stabilization. Use appropriate monitoring, and never leave patient unattended.

Accessories for Your Rainbow® System

Accessories Help Customize the Rainbow® System for Your Practice.

The Rainbow® Head Stabilizer is a comprehensive head control device that minimizes both up-and-down and side-to-side movement. It attaches to the Rainbow Board with screws for reliable stability. Adjustable side panels tilt in at a slight angle and accommodate a wide range of patients. The thick cushions on the side panels allow for a snug fit while maintaining patient comfort. The Head Stabilizer must be used in conjunction with the Rainbow Board.

Patient Education

These Educational Tools Help You Explain Stabilization.

The **Protective Stabilization Model** is a miniature stabilizing system complete with "patient". It helps you demonstrate to caregivers how a patient is safely swaddled during treatment. It will become a key part of your informed consent procedure especially when there is a language barrier. The model measures 11" tall by 6.5" wide, and can also be used to help patients know what to expect.

Protective Stabilization Model		Price

HBS-Pkg	Educational Package (Spanish) 1 PSM and 3 <i>Raffi Y La Cobija Abrazadora</i> Books	\$ 59.00

Riley and the Hugging Blanket is a beautifully illustrated book about a patient who gets upset at the dental office, despite trying to be brave. The "Hugging Blanket" is explained to Riley, who accepts its use. Riley learns to relax, and soon the Blanket is no longer needed. Riley is very proud!

The teaching book is available in English and in Spanish. It can be used by parents at home to acclimate the child to the concept of stabilization prior to an appointment.

Oral Care Kits

Oral Care Kits Assist Those Who Brush The Teeth of Another Person.

Components of the Oral Care Kits

Oral Care Kits contain just the right starter products to help caregivers when they need to brush someone else's teeth. Open Wide® Mouth Rests are useful when the cared-for person has difficulty keeping the mouth open for brushing. Surround® Toothbrushes clean all surfaces of the teeth at the same time so more is accomplished with each stroke. The DVD "How to Brush the Teeth of Another Person" gives caregivers necessary information to provide oral hygiene, and the confidence to do the job well.

Protective Stabilization Training for Staff/Parents

These DVD's Provide Staff and Parent Education on Protective Stabilization.

Protective Stabilization in the Dental Office: An Introduction for Dental Professionals is a 19-minute DVD that reviews the rationale for non-chemical stabilization and demonstrates the use of specific devices.

The Introduction for Parents and Caregivers DVD explains why safety devices might be needed and demonstrates several common types. It delivers a consistent message, freeing your staff to focus on individual questions or concerns. (9 minutes run time.)

It is important for staff to be properly trained on the use of protective stabilization.

Accommodating Patients with Autism in Your Practice

You Can Help Patients with Autism Learn Lifelong Dental Skills.

The D-Termined Program of Familiarization and Sequential Tasking helps dentists accommodate patients with autism. These patients often need guidance to learn skills necessary for safe and successful dental appointments. Dr. David Tesini uses actual patient visits to demonstrate how he helps a majority of patients learn cooperation skills, while not losing sight of time and cost limitations. In the newly revised edition, he provides clarification and updated techniques based on 10 years of clinical use.

Included in the program is a shortened version of the DVD to provide an overview for parents, and flash cards that allow staff and parents to help prepare patients for dental care in a consistent fashion.

Thanks to the Nancy Lurie Marks Family Foundation, we are able to make this program available for a nominal fee.

D-Termined Program - Revised

Open Wide® Reusable Mouth Prop

These Mouth Props Give the Clinician Control for Proper Care.

The *Wraparound* handle allows the clinician to control the prop and the patient's mandible at the same time.

Do you use a mouth prop for patients who have difficulty keeping the mouth open reliably? Those same patients are the ones most likely to attempt to dislodge the prop. Our unique **Wraparound** mouth prop allows the clinician to maintain control with a handle that wraps to the outside of the cheek so it will not block oral access. The mouth prop is designed with a perfectly placed hole to keep a saliva ejector where it belongs. The prop is made of plastic that is overmolded with a crush-resistant latex-free* material.

The **Tab** mouth prop is streamlined for procedures that need greater clearance. It has a hole in the tab to allow floss to be threaded for easy retrieval.

Both styles can be autoclaved repeatedly without getting "gummy."

Shown are sizes Large (green), Medium (blue) and Small (purple) with **Wraparound** handle.

Shown are sizes Large (green), Medium (blue) and Small (purple) with **Tab** handle.

Open Wide® Mouth Rest

A Reliably Open Mouth is Important for In-Office and At-Home Care.

The **Open Wide® Mouth Rest** is a helpful tool for those who lack the cooperation or motor control to keep the mouth reliably open. It is made from special high-density foam with a rigid core to add stability. It is sturdy enough to resist biting pressure, yet is comfortable for the person receiving care. The mouth rest has a long handle for safe, easy control. It is considered a disposable item in the office but can also be cleaned and given to a trained caregiver for daily oral hygiene.

In-Office

At-Home

Important: Consult the appropriate authority in your state or facility for regulations that may pertain to the use of mouth rests.

Surround® Toothbrush

This Unique Design Cleans All Surfaces of the Teeth at the Same Time.

Now with a new, beefier handle!

The Surround® Toothbrush is a great choice for patients with low tolerance for daily toothbrushing. It has three bristle pads to clean all surfaces of the teeth at the same time. Whether the user is brushing her own teeth or someone else is doing the brushing, the Surround Toothbrush can make the process easier because more tooth surface can be cleaned with each stroke.

A soft, rubber-like material covers the length of the toothbrush to help protect the oral environment if the person bites down unexpectedly, or falls while using the brush. The soft, end-rounded bristles and heart-shaped, compact head make brushing safe and comfortable.

Also available in a toddler size (up to age 5). See next page.

All toothbrushes come with a reusable plastic cover.

Surround® Toddler Toothbrush

This Toothbrush Helps Teach Young Patients How to Brush.

The Surround® Toddler Toothbrush has a unique design that forms a “u” shape to hug the lingual, occlusal and facial surfaces, encouraging the child to move the toothbrush in contact with both teeth and gums. As the child learns, it is natural for the degree of cooperativeness to vary. With 3 bristle pads, more tooth surface will be cleaned within whatever amount of time the child tolerates toothbrushing.

While made for toddlers, the shorter bristles and angled brush pads make it easy for those who wear braces to maintain better oral hygiene. The design allows the bristles to get in and around the dental appliance.

Stay N Place® Airway Positioners

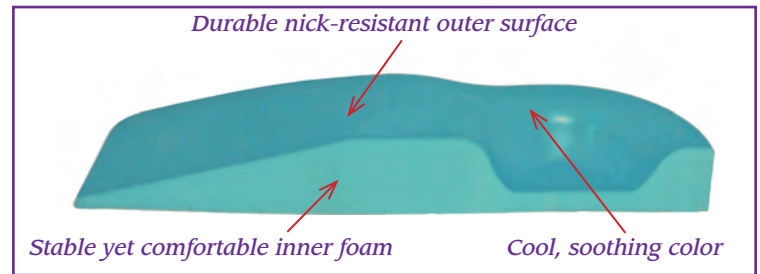

Our Airway Positioner Helps When “Chin Up” is a Challenge.

The SP-AP FM is 2.5” high at the chest area, 18” long and 10” wide.

Getting patients to maintain the proper “chin up” position can be a challenge. Our **Stay N Place® Airway Positioner** solves the problem by supporting the upper torso with consistent, comfortable support, which is important for procedures that include sedation, as well as for routine operative dentistry.

The molded foam design has a smooth, nick resistant outer surface that is easily cleaned using a non-alcohol disinfecting wipe.

Stay N Place® Airway Positioner - Foam	Price
Stay N Place® Airway Positioner - Foam SP-AP FM	\$ 87.00
100 Protective Sheaths - SH-100/AP	\$ 34.00

Important: It is the clinician’s responsibility to assure the appropriateness of any medical device for a given patient. Be sure to understand all applicable regulations. Use appropriate monitoring, and never leave patient unattended.

Our Other “Chin Up” Option Has Three Adjustable Pillows.

The **Stay N Place® Airway Positioner in Vinyl** has two head and neck cradles and a wedge-shaped pillow to lift the chest area. These vinyl-covered pillows can be repositioned to accommodate a range of patients. It can be used with or without the head strap. Available in dark teal or cream vinyl.

The SP-AP VIN is 3” high at the chest, 19” long and 10.5” wide.

Stay N Place® Lap Cushion

The Lap Cushion Supports Young Patients During An Infant Oral Exam.

Many professionals use the knee-to-knee technique for infant oral exams. The **Stay N Place® Lap Cushion** makes the exam more secure for the baby, more comfortable for the adults and more hygienic for all. The cushion is held under the patient as he is tilted into the lap of the professional, thus increasing the baby's sense of protection. The dentist has proper access for the exam and the caregiver is assured. Parents appreciate the cushy feel and the secure side rails. Clean with disinfecting agent and wipe dry with a soft cloth.

The Stay N Place Lap Cushion can be held behind the child as he is tilted back. Mom is in sight, which is reassuring to the baby.

Stay N Place Lap Cushion - durable and comfy.

Stay N Place® Lap Cushion

Stay N Place® Lap Cushion	SP-FLEX	24"L x 17"W	\$ 99.00
100 Protective Sheaths	- SH-100/LAP	12" x 8" x 30" gusseted	\$ 34.00

Stay N Place® Lap Board

Our Lap Board Provides Another Choice for Knee-to-Knee Exams.

Our **Stay N Place® Lap Board** also assists with infant oral exams by providing a hygienic surface to support the baby. The difference is the construction. The Stay N Place Lap Board is made with a rigid platform, layered with foam and upholstered in soft, durable vinyl. Raised sides help keep baby safely on the Lap Board.

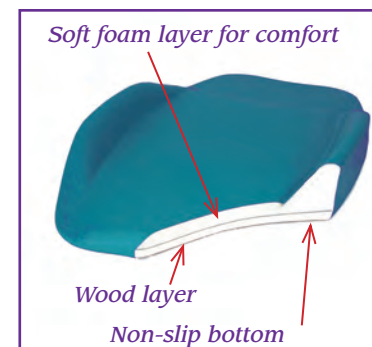

The Stay N Place Lap Board provides a safe, rigid surface for the child while allowing distance between the adults.

Stay N Place® Booster Seat

The Booster Seat Saves Your Back and Provides Comfort for Young Patients.

Do you find yourself “scooting” patients to the top of the chair for treatment, only to have them slide back down when the chair is brought upright? That repeated maneuver wreaks havoc on your back, causes lost time for the practice and is unsettling for the patient.

The Stay N Place® Booster Seat positions your patient 5” higher in the chair, providing better access and increasing efficiency. This simple addition to the dental chair is more ergonomically correct for you and more comfortable for your patient. It now comes with a removable lumbar support pillow.

The Stay N Place Booster Seat can be cleaned with the same disinfectant used for vinyl-covered dental chairs.

The Stay N Place Booster Seat can be used with or without the lumbar support.

Stay N Place® Booster Seat	Dark Teal	Cream	Price
Stay N Place® Booster Seat	SPBSdt	SPBSc	\$165.00

Important: It is the clinician’s responsibility to assure the appropriateness of any medical device for a given patient. Be sure to understand any applicable regulations. Never leave patient unattended.

Rainbow® Toe Guard

A Cleverly Designed Pillow Keeps Patient from Interfering with Monitors.

Left: The patient can dislodge the monitoring device.

Right: The Rainbow Toe Guard is an effective yet comfortable way to solve the problem.

The Rainbow® Toe Guard prevents the patient from using one foot to kick a monitoring device off the other foot. The specially designed pillow is placed between the feet and secured with ankle straps. The belt is used around the pillow and stabilizing board or around the dental chair. This is a reliable way to keep the patient monitored and comfortable.

Stay N Place® Chair Cushion

This Cushion Provides Physical and Emotional Comfort.

Both this chair cushion and the toddler version come with Roll-N-Store Straps for easy carrying and storage.

When body shape and chair shape are not a good match, or when patients become fearful at the sight of a dental chair, the **Stay N Place® Chair Cushion** can help. It presents a welcoming image to help calm patient anxiety. Crushed foam displaces as the patient settles in, filling gaps in the chair and providing physical comfort and a secure feeling. The Stay N Place Chair Cushion curves in at the neck, allowing your patient's head to tilt back and the chest to be lifted, while leaving you room to maneuver.

A non-slip bottom helps the cushion stay where you place it on the dental chair. The chair cushion is covered in a soft, yet durable vinyl with a choice of dark teal or cream color.

Stay N Place® Chair Cushion	Dark Teal	Cream	Price
Stay N Place® Chair Cushion	SPCCdt	SPCCc	\$ 169.00

Important: It is the clinician's responsibility to assure the appropriateness of any medical device for a given patient. Be sure to understand any applicable regulations. Never leave patient unattended.

Stay N Place® Chair Cushion For Toddlers

The Infant Chair Cushion Makes it Easier to Accommodate Toddlers.

An over-sized dental chair can feel insecure for toddlers, and it can cause you to bend and twist in order to provide treatment. The **Stay N Place® Chair Cushion for Toddlers** creates a safe, cozy lift for the patient, presents a professional image for parents, and helps you maintain better posture.

The chair cushion is like a bean bag, with soft foam inside. Air escapes through side vents as the child is placed upon it. This settles the cushion into the curves of the dental chair while securely nestling the youngster. It has a non-slip bottom, and comes with a safety belt for added security.

Designed for dentistry, the Stay N Place Chair Cushion has a soft, durable vinyl cover. Clean with disinfecting agent and wipe dry with a soft cloth.

Before: The dentist is bending and twisting to do her job

After: The patient is at a more ergonomic height for dental treatment.

Stay N Place® Chair Cushion/ Toddlers	Dark Teal	Cream	Price

Stay N Place® Pillows

Specially Designed Pillows Support the “Chin Up” Position.

No chair can accommodate all patients equally well. If the patient falls short of the chair’s headrest, he or she may not be properly supported. **Stay N Place® Pillows** provide the support you need to do your job effectively and the comfort the patient needs to sit without fidgeting.

The Neck Pillow supports the neck, helps keep the head tilted back, and can be used as a shoulder roll.

Pediatric - 3.5” H x 3.5” W x 10.5”L
 Adult - 4.5” H x 4.5” W x 12.5”L

The sides of our Head Cradle push up into a cradling position when the patient puts pressure on the center section.

Pediatric - 3” H x 3.5” W x 9.5”L
 Adult - 4” H x 4” W x 12”L

The Knee Pillow helps to center the patient and relieves pressure on the lower back.

Pediatric - 4.5” H x 4.5” W x 12.5”L
 Adult - 6” H x 6” W x 20”L

All pillows are available in dark teal or cream vinyl.

Stay N Place® Pillows

Support in the Right Places Facilitates Good Clinical Outcomes.

All our pillows have a strap that attaches behind the dental chair to keep the pillow in place, even when the patient sits forward. The vinyl pillow is soft to the touch, resists fluids and is easily cleaned using a surface disinfectant. Pillows are available in dark teal or cream.

The Head Pillow is designed for comfort and gives your patient a sense of security.

One size - 4" H x 11" W x 14" L

The Conforming Pillow takes the shape of the patient's head and neck and has a center cutaway to accommodate pulled-back hairstyles.

One size - 4" H x 7" W x 9" L
