

# GLASS ETCHING CREAM

**Glass Etching Cream** is reusable.

**Glass Etching Cream** will provide a permanent, dishwasher proof finish on most glass surfaces, such as glassware, mirrors, sheet glass, bottles and jars. It will not etch plastics or heat treated glass such as *Pyrex* or *Bodum*.

This product is intended only for small areas of etch, large etch areas may look patchy.

**Glass Etching Cream** works best with warmth. In cold weather leave the plastic pot in warm water for 10 minutes and shake well before use. If crystals remain, pass through a fine sieve. Replace crystals in the pot after you have used the Glass Etching Cream.

## MATERIALS NEEDED

- ◆ **Glass Etching Cream.**
- ◆ Small brush or small squeegee.
- ◆ Glass cleaner.
- ◆ Protective clothing, plastic gloves and protective goggles.
- ◆ Water.
- ◆ Mask, either **Rub'n'Etch Stencil**, **Vinyl Glass Etching Stencil** or a self adhesive paper such as *Duraseal* or *Contact*.
- ◆ Masking or other adhesive tape.

## APPLICATION

- ◆ Clean glass and dry well.
- ◆ Apply mask: **Rub'n'Etch Stencil** - follow packet instructions; **Vinyl Glass Etching Stencil** - follow packet instructions; Self adhesive paper - apply to glass, cutout your own design with a sharp blade and remove areas to be etched. Carefully remove any remaining glue from glass.
- ◆ Use masking or other tape around the masked areas to protective from any over runs of **Glass Etching Cream**.
- ◆ Shake the **Glass Etching Cream** container well. Apply the cream thickly using the small bush or squeegee. Make sure you have covered all the area to be etched.
- ◆ Leave for 10 to 15 minutes. Scrape the glass etching cream back into the jar. Wash the glass well under running water and remove mask.

**Safety precautions:** Contains Ammonium and Sodium Bifluorides. Toxic, keep away from children. Avoid contact with skin and eyes. Wear protective clothing, plastic gloves and protective goggles. Always use near water. Use in a well ventilated area. **FIRST AID:** EYES - Flush with cold water for at least 15 minutes. SKIN - Immediately wash with soapy water. IF SWALLOWED - Give large quantities of milk or water. DO NOT induce vomiting. SEEK MEDICAL ATTENTION IMMEDIATELY.
