How do I purchase the correct Oscar's shoe size?

Step 1. Print off the sizing chart and ensure that your printer scale is set at 100%, otherwise the sizing will not be accurate. Alternatively, simply measure on a piece of paper and compare the foot length measurements to the Size Chart.

Step 2. Place your child's heel where indicated. The end of the big toe will correspond with the most appropriate shoe size.

Eg 1. If end of big toe measures 16.34cm, please order size 26.

Eg 2. If end of big toe measures 15.3cm, please order size 25.
