

## SETTING UPYOUR SPRAYER

- 1. Remove the sprayer lid from the top of the unit. Next remove the wand holder and the small nuts and bolts from the in-tank filter.

2. Slide the wand holder onto the side of the Strom Sprayer tank. Using the provided nuts and bolts, tighten to secure the wand holder to the Strom Sprayer tank. Place the nozzles in the designates plastic sleeve on the wand holder.

3. To assemble the straps to the Strom Sprayer tank, loop the straps through the shoulder strap ports on the top of the tank.

4. To assemble the wand to the heavy-duty sprayer gun, pull back the quick-connect coupler on the front of the heavy-duty sprayer gun and insert the wand. Once the wand has been inserted, release the quick-connect coupler to securly fasten the wand to the heavy-duty sprayer gun.

## USE | MAINTENANCE

- Make sure the battery has a full charge. When the green indicator light on the battery is a solid green color, this means the battery is fullly charged.
  \*WARNING: DO NOT OVERCHARGE THE BATTERY. DOING THIS WILL REDUCE THE LIFE OF THE BATTERY.
- Remove the Strom Sprayer lid and then fill the sprayer tank with the prepared liquid application. Do not exceed the fill line. Once the unit has been filled, screw the sprayer lid on to the top of the tank firmly.
- Choose the desired nozzle. Attach the nozzles to the heavy-duty sprayer gun using the quick-connect coupler on the top of the wand. The Adjustable Nozzle (silver) provides a steady straight stream to a cone shaped stream. The Fan Nozzle (green) will apply a flat 25° stream and the Straight Nozzle (red) will apply a straight steady stream.
- To engage the pump, press the high/low switch button. Activating the "I" option will provide 60 psi of pressure from the heavy-duty sprayer gun. Activating the "II" option will provide 45 psi of pressure. Pull the heavy-duty sprayer gun trigger to begin dispensing liquid application. \*Note: Use variable pressure when squeezing the trigger if you are experiencing over spray or would like to simply reduce the amount of liquid application coming from the gun.
- When you are finished using the Strom Sprayer, clean the empty sprayer tank throughly with water. DO NOT STORE IN EXTREME HEAT OR COLD. For storage and transportation we recommend purchasing our Sprayer Rack (ITEM#: XF107). Scan the QR code below to order now.
