

Thank you very much for purchasing from M&R. We strive to provide a great product that is made by truck enthusiasts for truck enthusiasts.

2019+ RAM 2500 Heavy Duty Hood Mount Kit

INCLUDED

- 2 Metal Mounting Brackets
- (2) 40 watt Light Pillars
- Mounting Hardware
- Wiring harness (option for TRX only)

Step 1

Remove the clip from the driver side hood hinge that holds the windshield washer tube. Zip tie the tube to the bracket in a later step.

Step 2

Install M&R bracket with the included hardware. Do not tighten all the way until tested that the bracket and the light does not interfere with the windshield wipers. Note direction of the bracket installed

Step 3

Install the bracket and the light pod as following images. It helps to install the U cradle of the light first and then install the light onto the mount.

Step 4

Once you verify that the windshield wipers clear the bracket and the light pod → tighten all the bolts.

Step 5

- Now its time for wiring
- Black** → Ground
- Red** → Power to White lights
- White** → Power to Amber lights

The TRX has AUX hookup spots to factory switches. Just extend the wires. The regular RAM does not.
