Designation

Notes

Features

The Compact Cooler Versatile Series of portable fans increases working efficiency by delivering large volumes of cooling air across people in hot working areas. Working efficiency and personal safety are both enhanced when the working area is kept cool. Products can also be cooled more quickly and efficiently when using the Compact Cooler fans. The 'Versatile' version features tilt adjustment of the fan, allowing air to be directed up or down to meet height specific requirements.

Construction

Frame is square tube steel with powder coated finish.
 Fan is of galvanised steel with a high quality polyester epoxy finish as standard.
 Intake and discharge guards are fitted as standard.

Motors

Type - squirrel cage induction motor.
 Electrical supply - 240V, single phase, 50 Hz.
 - 415V, 3 phase, 50 Hz available on application.
 Bearings - sealed for life, ball.
 Weatherproof to IP 55.
 Operating temperature range -20°C to + 70°C.

Internal Thermal Protection

Replacable fuse fitted as standard.

Special Features

Versatile version features tilt adjustment of the fan allowing air to be directed up or down to meet height specific requirements.
 Built-in wheels and handle make it easy to move across even the roughest floors.
 Compact slim line design permits operation and storage where space is limited.
 Designed to pass through a standard doorway.
 Safety guards comply with AS4024.1:1996.
 Efficient aerofoil axial impeller.
