

GARMENT FIT

SIZING:

Garments may be “women’s” sizing or “unisex/universal” sizing. Unisex/universal sizing is used for clothing that may be worn by men or women and is usually more blocked or straight cut. Women’s sizing is used for clothing intended for women only and is usually more shapely or fitted (tapered at the waist or bust line for a flattering feminine silhouette). Most GGC garments have been designed using women’s sizing. Some garments have been purchased off-the-shelf and branded for GGC and they may be unisex/universal sizing.

FIT:

“Feminine Fit” or “Relaxed Fit” - To assist in obtaining a good fit, GGC has indicated on this chart whether the garment is FF for “Feminine Fit” (more shapely, fit closer to the body or RF for “relaxed fit” (more straight cut). Roll-up cargo pants has AF for “adjustable fit” (relaxed fit with an elastic waist adjuster in the waistband).

The chart shows finished **GARMENT** measurements. Chest, bottom, waist and hips are twice the width of the garment. Make sure you give wearing ease for proper fit and comfort. The ease varies depending on the style and fit of the garment. For example the international jacket needs bigger wearing ease. Fabric impacts fit. The garment will fit and feel different on the body depending on whether it is made in a woven, knit or stretch fabric. Garments may be 100% cotton, 95% cotton/5% spandex, 50% cotton/ 50% polyester and other combinations. Garments which include spandex will fit more closely to the body than garments which do not include this stretch fabric. They will also keep their shape well and appear fresh every wash.

DISCONTINUED ITEMS:

Some sizes are out of stock and no longer available. Stock will not be replenished.

MEASURING

It is very important to check the description and the size chart for each garment to ensure the best fit and to take into account your own personal preference with regards to looseness or tightness of your clothing. Find your most comfortable fitting garment style for each item to measure.

Choose your own T-Shirt/Hoodie/Blouse/Vest/Pants you like to wear in terms of fit. Lay the garment flat on the table face up and take the measurements using a tape measure. Do not use rulers.

For T-Shirt/Hoodie/Blouse/Vest

Chest: measure the width across the chest of the shirt - 1 inch below the armhole (multiply by 2).

Body length: measure from the center back top of neck to the hem.

Bottom: measure the width at the bottom of the shirt (multiply by 2).

For Pants

Waist: measure the width on waist line of the pants (multiply by 2).

Hips: measure the widest part between the waist and the crotch of the pants (multiply by 2).

Inseam: measure from the crotch to the bottom of the pant leg.

Made To Measure Uniform Shirts:

Uniform **Shirts (not including blouses)** may be custom made for Members whose requirements fall outside the regular sizes available - size required is smaller than the smallest size available or larger than the largest size available. Orders for made to measure uniform shirts cannot be cancelled once placed. Please call 1-877-605-9339 to place an order.
