

Automation Made Easy

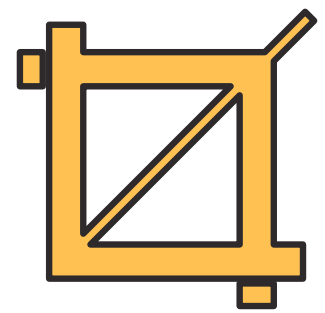

with
PA -14 Linear Actuator

LINEAR MOTION DESIGN IN A COMPACT BODY

The PA-14 has a compact and powerful design for when you need actuator strength in a small package. These actuators are one of our most popular models and are most commonly used for robotics, home & office automation, automotive automation, manufacturing and more.

SMALL AND COMPACT

The PA-14 mini linear actuator can be implemented into a wide variety of applications. The small form factor along with a balance of force and speed creates an ideal unit for your project!

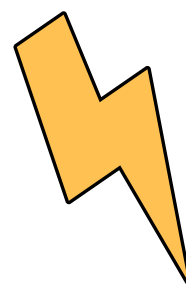

VARIETY OF STROKE LENGTHS

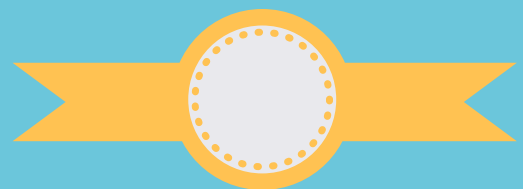

The PA-14 is available in a range of stroke lengths from 2" to 40". It can also be custom produced in 0.25" increments.

COMPATIBLE MOUNTING BRACKETS & ACCESSORIES

Accessories such as the AC-05 rubber boot can be installed onto the PA-14 to allow for increased protection against weather elements.

18 MONTH WARRANTY!
