

Our Exclusive African Lineage Database

African Ancestry's exclusive African Lineage Database is the largest and most comprehensive resource of African lineages available today. It includes lineages from 35 countries and over 200 ethnic groups:

The data is a compilation of published sources, research collaborations and primary research. The populations sampled are based on direction from historians, anthropologists, linguists and other geneticists.

85%

This extensive database allows us to find identical matches for approximately 85% of the people we test.

95%

For the remaining people, we find closely related lineages with greater than 95% confidence.

To find out more about genetic ancestry testing, visit www.africanancestry.com.

Ethnic Group List

This list is a sampling of ethnic groups in our African Ancestry lineage database.
