THE CARLSON COMPANY ADVANTAGE

ABOUT US

Since 1972, The Carlson Company remains a leading supplier of service equipment to the Motorcycle and Powersports Industry. We specialize in providing your service departments with the right equipment for profitable service. With over 50 years of industry dedication, we have built a reputation with our customers as a supplier of the best service equipment available to the Powersports Industry.

INDUSTRY EXPERIENCE

As a leading Powersports service equipment supplier, we take pride in offering products that fit our industry's specialized needs. Today's service departments are evolving rapidly as profit centers for new and existing dealers and The Carlson Company is leading the way with innovative products that are brought to market specifically to address the needs of today's dealers. The product selection offered is the direct result of our industry experience, motorcycle expertise, and commitment to quality products.

QUALITY EQUIPMENT

Quality assurance is our top priority. We do the shopping for you. Our product line is researched and tested before we offer it to our customers. Quality Equipment right from the start guarantees you years of dependable service life. We continue to improve and expand our equipment line to help you do a better job in less time. Our mission statement remains intact and reflects our steadfast commitment to innovate and supply the best service equipment available to our industry.

EXCEPTIONAL SERVICE AND SUPPORT

Superior Customer Service You Can Count On! We are committed to our customers Before - During - and After the sale. Our Powersports Industry expertise guarantees you'll get the right answers and the right equipment for your shop.

Ask us about LEASING your Equipment. (Lease-to-Own with a \$1.00 buy-out)

COATS MOTORIZED **RE CHANGERS**

FREE FREIGHT (Continental U.S.A.)

The "Industry Standard" **Motorized Tire Changer!**

Nationally known for quality, this heavy-duty tire changer is the machine of choice!

The COATS 60X/MC is here to stay! Capable of changing ALL Motorcycle and ATV/UTV tire sizes. The 60X/MC offers a "RoBo Arm" that mechanically assists the mounting and de-mounting of stiff side wall and/or low profile tires. Free Freight and On-Site Service Center set-up and demonstration is included at no charge.

For over 60 years, COATS has been building top quality tire changers to fit a variety of special applications. Unlike some imported brands, the 60X/MC is built in the U.S.A., and is supported by the largest nationwide network of authorized service centers.

FEATURES (60X/MC, RC-55/MC, RC-45/MC)

- "RoBo Arm" system & manual bead roller kit for stiff sidewall / low profile tires
- Multi-purpose three position motorcycle clamps with premium nylon wheel protectors
- Extended vertical channel allows sprockets, pulleys and brake discs to remain on wheels during servicing
- Specially designed Motorcycle/ATV Mount Demount Head with Nylon Insert protection
- Three position Automotive Clamps and Automotive Style Mount Demount Head also included

Change Stiff Sidewall Tires with Ease!

COATS MOTORIZED TIRE CHANGERS

These COATS tire changers include specially designed three position Motorcycle/ATV clamps which allow the user to change an ATV tire as small as 6" in diameter to a motorcycle wheel up to 24" with the same set of clamps. They offer complete protection for expensive, delicate wheels at every step of the tire changing process. Bead loosener shoe socks, clamp booties, nylon inserts and lift tool protection help prevent metal-to-metal contact that can cause scratching or marring. The Manual Swing Arm is easily adjusted so that the Duckhead® Mount/

Demount Tool is properly fitted to the tire rim assembly.

Conveniently placed foot pedals provide precise

control over every step of the changing process, this allows the technician to be more efficient while

mounting and demounting tires. Made in the U.S.A.

Free Freight and On-Site Service Center set-up and demonstration is included at no charge.

State of the art technology. On-Site

set-up and demonstration

included

The COATS RC-45/MC offers all the features and benefits of the RC-55/MC except the Robo-Arm assist system. Some dealerships simply do not need to change stiff sidewall/low profile tires. If needed, the Robo-Arm assist system can be added to this machine at a later date.

MOTORIZED TIRE CHANGER RC-55/MC

Catalog No. RC-55/MC (Includes RoBo-Arm)

The K22 has proven itself as the finest balancer for motorcycle wheels in the world. The K22 Computer Balancer is specifically designed to balance motorcycle wheels. It features a unique "stationary shaft" that allows for precise, repeatable balancing results. Unlike converted automotive balancers, the K22's "stationary shaft" for motorcycles makes set-up and operation a breeze. This feature allows the technician to also diagnose noisy wheel bearings and tire out-of-roundness easily. The K22 is capable of balancing wheels in either the Static Mode or Dynamic Mode. The Dynamic Mode balances both planes of the wheel, thus giving a more accurate balance for wheels wider than 5". Manufactured by CEMB, the largest manufacturer of balancers in the world. Their patented balancer technology combined with ongoing product improvements makes this the machine of choice.

SPECIFICATIONS

- RIM DIAMETER: 10" to 24"
- MAX DISTANCE BETWEEN WHEEL BEARINGS: 9-1/2" or wider*
- POWER REQUIREMENTS: 120V, 1 phase
- ULTIMATE ACCURACY: ± 1 gram, 1/10oz.

For Single-Sided Swingarm Wheels, order optional adaptor #41FF48280 *For 280, 300 & 330 sizes, order optional Shaft Extension Cone #04C220001

FEATURES

- BALANCING BOTH PLANES: Static (regular) and Dynamic (wider than 5")
- ULTRA-FAST SETUP: Stationary shaft. (No adapter drive forks/arms to adjust)
- DIAGNOSE WHEEL BEARINGS: Stationary shaft allows tech to hear noisy bearings
- DETECT OUT-OF-ROUNDNESS: Abnormal vibrations are felt through control lever
- FREEDOM FROM ERRORS: Digital electronics guarantee accuracy and reliability

HANDY PORTABLE LIFTS

Handy Air Lifts have been around since 1963 and are perhaps the most popular Motorcycle/ATV Air Lifts in the world.

The Standard 1200 Air Lift is ready to simplify your service department. The Standard 1200 Air Lift has been revolutionized with a maintenance-free air bellows, so your focus remains in the shop. We boosted the capacity on our best-selling lift by 200 lbs., so this lift is ready to tackle Motorcycles, ATVs, and Riding Lawnmowers. The Standard 1200 features an automatic ratcheting safety mechanism with dual springs that create a positive lock as the lift is raised. The safety mechanism is easily flipped back to lower the lift, and automatically resets once the lift reaches the bottom. With the automatic reset, there is no more worrying about the operator having to remember to set the safety bar. That's not all! We raised the maximum height by nine inches so this lift is perfect for even the tallest mechanics. Built with heavy-duty domestic steel and finished with a durable powder coat finish, the Standard 1200 features a texture-black frame with gloss black accessories. When you are looking for a lift that can do it all, look no further than the Standard 1200 Air Lift. Made in the U.S.A.

"Turf Rail" attachment for 2-Post Lifts - UTV's, ATV's, Riding Lawn Mowers and more!

TURF RAIL ATTACHMENT

Catalog No. TR-07 (2-POST LIFT PICTURED SOLD SEPARATELY, CALL FOR MORE INFORMATION)

FEATURES

- Fits most surface mounted two post lifts.
- · Easy installation in as little as two minutes.
- Offers maximum flexibility to service cars, light trucks, turf equipment or golf carts all on the "Turf Rail".
- Full under vehicle access and safety.
- Takes less valuable shop space than 4-post lifts.
- Optional Filler Pads available for small diameter wheels.

The TR-07 Turf Rail is an attachment for two-post automotive lifts, designed to pick up All Terrain Vehicles, UTV's, and Turf Equipment by wheel engagement. The patented system has two rails that engage onto the height adapters of most two-post symmetric designed lifts and then

two adjustable trays attach to the rails and are fully adjustable from wheelbases ranging from 24" to 124". The Turf Rail is a perfect fit for UTV Dealers, golf courses, parks departments, turf care and landscape companies and all types of grounds care facilities.

SPECIFICATIONS

Lift capacity up to 7000 lbs. (Each tray has a 3,500 lb capacity)
Patent pending rail system allows adjustable wheel bases from 24" to 124".

THE B.U.L. - BIG UTILITY U.T.V. LIFT

Catalog No. 22750

This B.U.L. means business! Meet the beef of the Handy lineup: the Big Utility Lift. The B.U.L. can handle a whopping 2,500-lb. capacity and offers you the option of loading from either end, making it the ideal choice for servicing your most colossal

UTV's. Don't worry about maintaining an air cylinder with this bad boy; the B.U.L. operates with an air bellows which requires zero maintenance! The B.U.L. raises to a

maximum working height of 39" and has four stopping points, so you pick the height that's best for your job. We're giving you dual detent bars on this monster to ensure superior stability.

Four adjustable support bars with anti-skid rubber padding give you piece

of mind as you lift wide loads. A sliding oil pan is mounted under the lift top, which boasts a 27" wide working surface. The framework is textured black powder coating for added durability, so your lift looks good conquering every job. To preserve your finished shop floor, we chose four phenolic wheels with serviceable roller bearings. Storage is a breeze with this compact unit, with a minimum height of 9.5"

and weight of 500 lbs. So when you need a lift that's small in footprint but big in capacity, look no further than the B.U.L. from Handy. As with all Handy products, the B.U.L. is proudly made in the USA.

SPECIFICATIONS

2500 lb. capacity

MULTI-LIFT

The Multi-Lift is all you need to get the job done right. The durable domestic steel tabletop design is the perfect fit for multiple repair projects, including push lawnmowers, appliances, small motors, and garden equipment. The Multi-Lift features a 12" center opening for easy access to what's below the table top and five positive rotational locking working positions with 360° rotation. For easy loading and unloading, the Multi-Lift lowers to 5" off the ground and comes with a built-on ramp extension. An adjustable wheel channel helps reduce slippage.

Air/Hydraulic lifts without platform (Frame Contact)

For Harley-Davidson and other motorcycles that allow frame contact, a special version is available in either 5" or 6-1/2" piston diameters (Catalog No's. 5SPCH & 6SPCH) with a pre-drilled top designed to secure the motorcycle frame directly to the top of the lift with "J" bolts. Additional hole in plate provides access to bottom of engine.

Bestway lifts are also available "topless" so you can add a top plate of your own design (Catalog No's. 5SP & 6SP). You can also add a platform of your own to the 5SPC & 6SPC lifts by welding or bolting the platform to the 1/4" thick steel plate provided.

Catalog No.	Piston Diameter	Top Plate Dimensions	Application	Capacity
5SP 5SPC 5SPCH 6SP 6SPC 6SPCH	5" 5" 5" 6-1/2" 6-1/2"	N/A 18" x 18" 18" x 18"* N/A 18" x 18" 18" x 18"*	Add your platform Harley-Davidson service Harley-Davidson service Add your platform Harley-Davidson service Harley-Davidson service	1500 lbs. 1500 lbs. 1500 lbs. 2000 lbs. 2000 lbs. 2000 lbs.

BESTWAY IN-GROUND HYDRAULIC LIFTS

These heavy-duty, smooth operating air/hydraulic (air over oil) motorcycle lifts can be rotated 360° and incorporate a choice of 5" or 6-1/2" diameter pistons. Lifting capacity is 1500 lbs. for 5" and 2000 lbs. for 6-1/2" pistons, at 125 psi air pressure.

All units are easily installed in a minimum amount of space and require a 56" deep hole. Minimum height is 3"; maximum rise above floor is 36", (48" optional rise available). All units come complete with a three-way air valve - simply attach your air-line to operate.

Air/Hydraulic lifts with platform

The platform on each of the three lifts in the table below is large enough to contact both bike tires, and each platform is hinged toward the rear. The first two lifts have a slideable front plate which can extend the platform to a maximum of 76". The 106HA-30XL does not have a slideable front plate and has a fixed platform length of 92".

Catalog No.	Piston Diameter	Platform Length	Platform Width	Capacity

Catalog No. CH-PH Additional Top Plate Choice for Harley-Davidson 18" x 18" plus 6" ramps*

FRAME CONTACT IN-GROUND LIFT

Catalog No. 6SPCH

*Each lift is supplied standard with air valve mounted on side as shown. Other options include a remote control air valve that allows you to locate the valve anywhere in your shop and an optional non-rotating feature that eliminates the lift from spinning. Phone The Carlson Company for details if a "remote control" or "non-rotating" feature is desired.

NOJET LOAD CONTROL DYNAMOMETER

LOAD CONTROL DYNAMOMETER **FOR MOTORCYCLES**

FEATURES

Catalog No. 250i

- Unlimited Maximum Horsepower Capability
- Eddy Current Load Absorption Unit (250 series only)
- Powder coated chassis, wheelbase capability up to 84 inches (from rear axle to front tire)
- NEW PowerCore Software suite with WinPEP 8 (PC, monitor, printer, etc. not included)
- NEW DynoWare RT dynamometer electronics and hardware
- Integrated control panel stand with console
- Ignition wire inductive tachometer pickup leads
- Front wheel lock
- Automatic Conditions Measurement (absolute pressure, etc.)
- 4 Analog Input Channels for 0-5v sensors (sensors and cables not included)
- 14 expansion ports for DynoWare RT accessories and DJ-CAN devices (such as Power Commander, Power Vision, Autotune, etc.)
- Starter system to spin roller (12V, battery not included)
- Installation and operation manuals
- One year replacement parts warranty
- Toll-free technical support

MAP FUEL INJECTION

Fuel Injection Tuning is easier than ever with the Dynojet 250i. Offering the latest in eddy current power absorption technology, the Dynojet Load Control System is easy to operate and offers steady-state load control. Closed-loop load control software provides the technician with the ability to control RPM or MPH at any throttle opening. This causes the motorcycle to automatically hold at the technician's pre-determined setting. Repeatable, consistent results are very easy to obtain.

The 250i Load Control Dynamometer is perfect for duplicating specific customer complaint conditions, engine break-in, durability testing and fuel injection mapping. It's like getting two dyno's in one package. because all the features of the Dynojet Inertia Dynamometer are maintained. When used with the optional Air/Fuel Ratio Monitor, every dyno run can show you not only HP or Torque, but also exact air/fuel ratio across your RPM range.

DYNOJET LOAD CONTROL DYNAMOMETER FOR MOTORCYCLES, ATVs, TRIKES & MORE

The Model 250ix Chassis Dynamometer gives you the advanced technology, durability, and accuracy you need, all at an affordable price.

The same technology that has made the Dynojet Motorcycle Chassis Dynamometer the industry standard has led to the development of the MODEL 250ix dynamometer engineered for most other Powersports Vehicles (ATV's, Side-by-Sides, Go-Karts, and Trikes)

Dynojet's cutting-edge engineering delivers the precise horsepower measurements a technician needs to make quick and accurate evaluations of engine and drive-train performance. This allows you to maximize your shop's potential with increased sales, service efficiency, and shop credibility. The dyno's durable, low-maintenance construction ensures that you will be investing in many years of flawless tuning and troubleshooting. By eliminating the need for engine removal, the vehicle mounting time is as little as 5 minutes. A technician can then perform a simple test and examine the results right in the shop. Utilizing the Dynojet WinPEP 8 software, the dyno operator can evaluate the entire drive-train condition for the purpose of

LOAD CONTROL POWERSPORTS DYNAMOMETER

Power Carriage/Clamp,
and Dual Axis Fans)

UPGRADE TO THE ULTIMATE IN MOTORCYCLE & ATV DYNAMOMETERS!

Existing Model 200i or 250i owners can upgrade their equipment by adding an X - Module Roller - Catalog No. 77000003

FEATURES

 Accommodates Motorcycles and most other powersports platforms (ATV's, Side-by-Sides, Go-Karts, and Trikes)

routine servicing or all-out performance development.

- Unlimited Maximum Horsepower Capability
- Eddy Current Load Absorption Unit (250 series only)
- Powder coated chassis, wheelbase capability up to 84 inches (from rear axle to front tire)
- NEW PowerCore Software suite with WinPEP 8 (PC, monitor, printer, etc. not included)
- NEW DynoWare RT dynamometer electronics and hardware
- Integrated control panel stand with console
- Ignition wire inductive tachometer pickup leads
- · Front wheel lock
- Automatic Conditions Measurement (absolute pressure, etc.)
- 4 Analog Input Channels for 0-5v sensors (sensors and cables not included)
- 14 expansion ports for DynoWare RT accessories and DJ-CAN devices (such as Power Commander, Power Vision, Autotune, etc.)
- Starter system to spin roller (12V, battery not included)
- Installation and operation manuals
- One year replacement parts warranty
- Toll-free technical support

DYNAMOMETERS

DYNOJET INERTIA DYNAMOMETER

When it comes to everyday motorcycle performance measurement, problem diagnosis and precision tuning, the Dynojet 200i Inertia Dynamometer offers fast, accurate and repeatable solutions. It has no controls to adjust, is quick and easy-to-use, and takes the guesswork out of performance evaluation. The technician saves time by simply running the bike on the dyno for a few seconds – from the lowest to the highest desired RPM or MPH.

The inertia dynamometer measures performance while the bike is accelerating a heavy rotating mass and displays complete HP and Torque curves from a single run. This simulation of real riding conditions permits actual dynamic fuel-flow testing, which enables you to study the engine's ability to accelerate the bike's load across the engine power band. Troubleshooting ignition vs. air-fuel problems, or rich vs. lean conditions, becomes more profitable.

Following its introduction in 1990, the Dynojet Inertia type dynamometer quickly became the standard for performance measurement and engine tuning in the motorcycle industry. Its ease of use and powerful software attracted customers from around the world. Dynojet ushered in a totally new era of performance evaluation and precision tuning, and as a result, now has thousands of dynamometer installations worldwide. The 200i Inertia Dynamometer provides the technician with instrumentation and facts instead of seat-of-the-pants guesswork.

THE SAME TECHNOLOGY THAT HAS MADE THE DYNOJET

MOTORCYCLE CHASSIS DYNAMOMETER THE
INDUSTRY STANDARD HAS LED TO THE

DYNOJET DYNAMOMETER OPTIONS

MONITOR TRAY

The Monitor Tray attached to the control pod and supports a monitor, keyboard and mouse. It is adjustable for optimum placement.

DUAL COOLING FAN SYSTEM

This integrated cooling fan system option has adjustable arms and can move 1800 CFM from each fan. These fans are controlled from the control pod.

THE POWER WHEEL CLAMP & POWER CARRIAGE OPTIONS These options allow the dyno operator to

adjust the carriage length and clamp the front wheel from the control pod, while seated on the bike.

EXTENDED WHEELBASE CARRIAGE OPTION

This option is necessary for testing long wheelbase motorcycles. Accommodates up to 102in, measured from rear axle to the leading edge of the front tire.

TORQUE CELL MODULE

Measures real-time torque, and allows sweep, step and custom load simulation

May also be used to set ignition timing

H-D FUEL TAP

H-D Fuel Tap is a dyno accessory available for DynoWare RT that provides fuel pressure as a data input for WinPEP 8 dyno users! It plugs directly into the stock fuel system with quick disconnects for fast and easy installation

FOLDING RAMP

This option includes gas assist

struts for one person operation. The ramp features a dual-angle moderate slope design to aid in loading/unloading lowered and

longer wheelbase motorcycles.

Supplemental ramp available for "X" models (requires primary ramp).

IX RAMP SHOWN

AFR-2 (DUAL AIR/FUEL SYSTEM)

The AFR-2 has two wide band O2 sensor inputs so you can sample two air/ fuel ratios at the same time for measuring bank-to-bank. The AFR-2 uses the DJ-CAN system, which allows you to daisy-chain multiple AFR-2 modules to read up to 8 AFR's. The AFR-2 houses the Gen4 air pump system and comes standard with one O2 sensor.

EDDY CURRENT LOAD ABSORPTION UNIT

The Eddy Current Load Absorption Unit can be upgraded to any Dynojet inertia model, such as the 200/200i, and enables the ability to perform loaded tests such as closed-loop RPM step tests when tuning fuel-injection with a Power Commander or Power Vision.

H-D DATA LINK

Connect any Delphi equipped Harley-Davidson® (CAN & J1850) to DynoWare RT to read and sample live data direct from the bike! Whether you are making EFI calibrations, diagnosing a problem or simply getting a horsepower reading, the H-D Data Link gives you more data such as volumetric efficiency, spark advance, cylinder temp, and more.

DYNO TEST ROOMS AVAILABLE

DYNO TEST ROOMS

INC DYNO TEST ROOMS

INC DYNO TEST ROOM

The INC Dyno Test Room offers a pre-engineered modular system for building a professional high performance dynamometer test room within your facility. The INC rooms are designed with features specifically intended to work with Dynojet Motorcycle and ATV dynamometers. Designed and constructed of 4" thick modular acoustical metal panels and components, the INC Dyno Room allows you to safely operate your dynamometer while providing excellent exhaust ventilation and high performance sound reduction of 40 dBA or more.

PRE-ENGINEERED

Motorcycle Dynamometer Testing is a very specialized activity and the INC Dyno Test Rooms are designed for this unique application. Ventilation systems are high-volume and consist of silenced exhaust and inlet assemblies. All necessary openings in the room walls and roof are provided. A variety of room sizes are available, typically ranging from 10' to 14' width and 15' to 18' length. Standard equipment includes one 4' door and one viewing window (42" x 42").

MODULAR SYSTEM

All rooms are equipped with high performance sound reduction capabilities of up to 40 dBA or more. Design and construction utilizes INC's 4" thick modular acoustical panels. The wall panels are 3' and 4' wide x 8' tall and are available with or without windows. The two-pane, 4" thick windows are double glazed, tempered safety glass and measure 42" wide x 42" tall. All panels are double wall construction, consisting of electro-gal-vanealed solid steel on the room exterior with perforated steel surfaces on the interior. The wall thickness is filled with INC's special sound absorbing insulation. This construction provides excellent acoustical characteristics.

ASSEMBLY

The sturdy wall panels assemble into base channels and are then attached to each other with one-piece joiners provided in pre-cut lengths to fit. The roof and wall panels are connected as shown in factory supplied drawings. Final steps are to attach the supplied ventilation system to your ducting and bring electrical power to the room. Ducting beyond the fans and/or inlet is a customer responsibility and is not included. An optional pre-wired lighting and electrical package is available, or this aspect can be handled by a local electrical contractor.

INC DYNO TEST ROOM (with Super Vent System)

FEATURES

- HIGH NOISE LEVEL ISOLATION: 4" thick acoustically absorptive panels
- SILENCED VENTILATION SYSTEMS: Provides exhaust containment and extraction
- MODULAR CONSTRUCTION: Allows easy and economical expansion or relocation
- HIGH PERFORMANCE SINGLE DOOR: 4' Acoustical door, heavy duty seals
- VIEWING WINDOW: 42" x 42" double glazed tempered safety glass (one included)
- CONSTRUCTION: Supplied as a kit. Professional room assembly available
- CUSTOM ROOMS: Custom room sizes and ventilation systems available

OPTIONAL EQUIPMENT

Super Vent System (Required for all Load-Control Dynamometers)
6' and 7' Wide Double Doors (12' and wider rooms only)
Pre-Wired Lighting & Electrical Package
Footony Prime & Finish Exterior Point (Cystem Colors symileble)

Factory Prime & Finish Exterior Paint (Custom Colors available) Additional Window(s) (Bay windows also available)

DYNO TEST ROOMS

INC DYNO TEST ROOMS

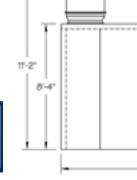

INC DYNO TEST ROOMS

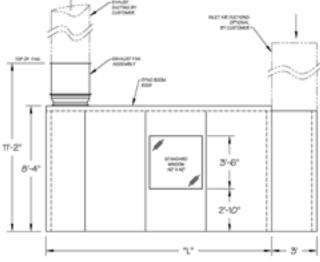

Dynamometer testing of engines, motorcycles, vehicles and components is an essential process in performance tuning, troubleshooting, R+D development, endurance testing and verification of horsepower and torque. The PowerSports industry relies on dynamometer testing to maximize performance, provide & validate after-market products and properly tune today's high performance engines.

ESSENTIAL FOR PROFESSIONAL DYNO TESTING

You've made a substantial investment in your dynamometer, personnel and training - to make the most of that investment and set you apart from your competition, you need to perform your dyno work in a dedicated, properly designed environment. We offer a complete line of affordable, functional Dyno Test Rooms just right for any dynamometer set up. Designed and constructed of our rugged industrial duty modular acoustical panel system called Panl-Wall™, our Dyno Test Rooms are easy to install, easy to move or change with your facility and built to last. Design and performance features have been developed and tested specifically to work seamlessly

with a variety of dynamometers and equipment applications to ensure a minimum of 40 decibel (dBA) sound level reduction and reliable proper ventilation.

SIDE ELEVATION VIEW

PAG PEN FLOOR PLAN

3'-8"

THE USE OF AN INC PROFESSIONAL **DYNO ROOM WILL**

- Maximize your dynamometer investment
- Provide a controlled testing environment
- Ensure test and tuning repeatability
- Provide a safe workspace for your technicians
- Showcase your dynamometer facility
- Be a quiet neighbor
- · Attract and impress customers

TECHNICIANS & ENGINES CAN BREATHE EASY

Of course a Dyno Test Room is only as effective as it's ventilation system, and our optional SuperVent™ system guarantees to remove all heat, carbon monoxide and other combustion and exhaust gases while providing fresh air for engine consumption and operator comfort without sacrificing any noise reduction!

Even when making long dyno runs with an eddy-current or other load applying device, such as when fuel injection mapping, our SuperVent™ system with our unique flow-thru design and exhaust source capture reduces harmful carbon monoxide levels to as low as 4 ppm.

CALL THE CARLSON COMPANY TODAY TO DISCUSS YOUR DYNO ROOM REQUIREMENTS!

KEY FEATURES AND BENEFITS

- Guaranteed predictable noise reduction 40 dBA or more!
- Known fixed cost stays on budget
- Modular panel construction easy to erect and change
- Easy two-person assembly
- Sound absorbing interior surfaces
- Rugged corrosion resistant galvanized steel construction
- All Components meet ASTM E-84 Class I Fire Rating
- High performance acoustical doors and viewing windows
- Safe effective exhaust gas extraction and cooling air flow

FUEL & OIL TRANSFER

JDI GAS CADDY & WASTE OIL EVACUATORS

JDI HGC-30UL

Catalog No. 12652

The JDI HGC-3OUL Gas Caddy is the ideal solution for the storage and dispensing of gasoline in your Service Department. Specifically designed to comply with labor and safety laws, JDI builds the only UL listed Gas Caddies in North America.

The heavy-duty weded steel construction is built to last. A two-way rotary pump allows your technicians to both siphon and dispense fuel. To siphon gasoline into the caddies tank, simply turn the pump's operating handle counter-clockwise. To transfer gasoline from the cart to any

fuel tank, turn the handle in the opposite direction. What could be more simple?

FEATURES

- Heavy-Duty Bi-directional pump
- 5.7 gallons/minute@72 RPM
- One gallon per 12 turns
- UL Listed & OSHA Compliant
- Firescreened safety vent & fuel gauge
- 8' clear hose with anti-static grounding wire
- 2" Filler neck for easy fill-ups
- 1/4" Drain hole to remove contaminants
- Static ground wire with clamp
- See-through hose for in-line fuel viewing
- Large 10" diameter rubber tires for easy mobility

"Quick Lube" oil change service keeps costs down and efficiency up!

Designed to remove used oil and other fluids from any vehicle when conventional draining methods are not practical. Charged unit is completely portable. Fluid removal can be done almost anywhere without the need of an air hose.

Fluid evacuators remove used oil and other "non-flammable" fluids from almost any vehicle using compressed air and an on-board venturi vacuum process.

Evacuators are great for a variety of applications including:

- Quick Lubes Avoid stripped drain plugs. Makes it easy to correct overfills.
- Motorcycle/ATV Service Perfect for oil changes.
- Marine Applications Boats, Jet Skis and other PWC.
- Farm & Industrial Tractors, generators, off-road equipment.

6-GALLON

Material	Steel	Steel
Wheel Size – Front	N/A	4" Swivel
Wheel Size - Rear	7" Fixed	7" Fixed
Weight	45 lbs.	55 lbs.

FEATURES INCLUDE

- 6- or 20-gallon capacities
- Heavy-duty steel construction for years of trouble-free service
- Powerful venturi vacuum generator
- Easy-to-read vacuum gauge
- 7' suction hose
- Six suction probes for most applications
- Convenient storage tube for suction probes
- Wheels and casters are oil and chemical resistant for longer life
- 10' quick disconnect evacuation hose
- Sight tube for quick indication of fluid level

JDI AIR OPERATED OIL DISPENSING SYSTEMS

Complete Packages - includes all required equipment. For motor oil, synthetic oil, hydraulic oil and ATF. Designed for 16-gallon and 55-gallon drums (drums not included).

Specifications:

Pressure Ratio	3:1
Air inlet pressure	70 – 115 psi
Air inlet connection 1/	/4" NPT (Female)
Air motor effective diameter	2.49" (63mm)
Max pressure	348 psi
Outlet connection	1/2" NPT (Male)

FEATURES INCLUDE

- Powered by 3:1 ratio medium pressure pump
- Differential air motor ensures smooth pumping
- Heavy-duty control valve
- 10' delivery hose

Model No.	Container	Pump	Hose	Delivery Gun	Cover	Weight
JDOL-16	16-gal	JD-3610	JDM-1038	JD-3930	JD-3566A	26 lbs.

PROFESSIONAL SERIES HOSE REELS

Designed for durable and dependable operation. Air, water and oil applications.

FEATURES INCLUDE

- Heavy-duty steel construction
- Corrosion resistant powder-coat finish
- 7" wide "L" shaped base for positive support
- Four-direction non-snag rollers reduce hose wear and abrasion
- Spring is fully enclosed and lubricated
- Full-flow swivel prevents leakage
- Guide arm is adjustable up to nine positions permitting wall, ceiling or floor mount

Catalog No. TS-53 OptiMate Pro4

• Automatic 12-volt charging: No Controls

Catalog No. C08-322B Replacement Lead (blk)

Catalog No. C08-322R Replacement Lead (red)

- BANKS/CHARGING STATIONS: 4 (each bank operates independently)
- CHARGING AMPS (PER BANK): 4A maximum, Ampmatic control. (2A max. when 2A is selected)
- SAVE: Low Volt Start of 1.8V + 2 step desulphation recovery
- IDEAL FOR: STD, AGM & GEL 12V batteries from 2 40Ah
- INPUT: Selectable 110-120VAC/220-240VAC 50-60Hz. with ON/OFF power switch and replaceable fuse protection
- SAFE: No risk of overcharging. Sparks suppressed. Safe for long-term battery maintenance. Automatic shut-down if short-circuited or battery
- WARRANTY: 2 Year Limited

The OptiMate Pro4 is the only multi station charger designed for the proper commissioning (initial charging) of all types of powersports batteries. The OptiMate Pro4 can simultaneously and independently commission or recover and then fully charge and maintain up to four 12 volt batteries of any type at once.

The "NEW" mode - is for 1 hour activation charge only for new batteries that have received acid just prior to charging, such as STD flooded batteries with removable filler caps and AGM-MF 'dry-charged' batteries that are delivered with a separate custom acid pack. The 2A / 4A mode - 12 hour max. charge mode is for diagnoses, recovery, charging, testing of low volt sulphated batteries. Suitable for recharge of all batteries including factory activated sealed AGM batteries (e.g. Yuasa YTZ,

GYZ) prior to sale.

Includes wall poster with instructions to prepare and charge your customers batteries.

OPTIONS

3 Pin Power Cord TA-13 TS-218 Wall Bracket 0-03 Extension Cord 6 ft 0-04 **Battery Clips**

OPTIMATE PRO-S

Catalog No. TS-171

Now a shop charger that initializes new sealed & filler cap batteries in 1 hour plus desulfates & recovers neglected batteries. Simply decide between a NEW or USED battery selection. Select NEW and a battery receives the correct initialization charge within 1 hour. The USED program allows optional selection between two sizes of battery (<10Ah>) and the rest is automatically done for you. Wall mounts are integrated for easy and convenient wall placement.

BATTERYMATE 150-9

BATTERY CHARGER AND LOAD TESTER

Shown with optional wall bracket (08-0197)

Catalog No. TS-02 **OPTIONS** Catalog No. TS-218 Wall Bracket

FEATURES

- Six load test choices from 15 to 150 amps for all starter batteries 2.5Ah to 45Ah
- Choose from two load test durations: 3 seconds (standard crank test) or 15 seconds (long crank & battery capacity check)
- Six constant current charge settings from 1A to 9A for the correct most time effective charging of all types of batteries including filler cap and maintenance free batteries such as AGM, valve regulated (VRLA), flooded (wet) and GEL-electrolyte from 2.5 to 45Ah capacities
- · Can commission two batteries of any type per hour
- Temperature sensor adjusts charge voltage according to ambient temperature
- Selectable MF mode activates special charging algorithm designed to effectively charge maintenance free batteries for peak performance and longevity
- Powerful and highly effective high voltage desulfation mode designed to breathe new life into deeply discharged (sulfated) batteries

OPTIMATE PRO8-S

UP TO 8 BATTERIES

SIMULTANEOUSLY

AUTOMATICALLY CHARGE AND MAINTAIN

- Optional steel wall-mount bracket frees up bench space and helps protect charger from caustic battery fumes
- Recommended by most motorcycle O.E.'s
- Two year limited warranty

OPTIMATE 6 SELECT BATTERY CHARGER

Catalog No. TM-191

- CHARGING AMPS: 5A (Ampmatic) SELECTION:
- - Charge 14.4V for STD batteries / 14.7V for premium AGM or Deep Cycle.
 - o Powersupply 13.6V
- SAVE: Low Volt Start of 0.5V + 2-step desulphation recovery.
- IDEAL FOR: STD, AGM, GEL & Deep Cycle 12V batteries from 3 - 240Ah.
- INPUT: Global (100-240V 50-60Hz), high efficiency (CEC listed), fully sealed.
- STYLE: Weatherproof case with wall mounts, with 6ft / 180cm AC supply lead and 6ft / 180cm charge lead ending in SAE connector. Weatherproof battery lead & standard battery clip set included.

The world's most advanced battery charger for vehicle starter & deep cycle **batteries!** OptiMate 6 Select is perfect for starter and deep cycle 12V batteries that demand accurate temperature controlled charging and unsupervised safe long term maintenance. Voltage selection (14.4V / 14.7V) ensure the battery receives charge at the correct voltage.

Ampmatic charge control adjusts current to suit any battery size OR condition for fastest and most complete charge i.e. small batteries receive less current, large batteries up to maximum current.

Special feature: POWER SUPPLY mode delivers stable power for vehicle system reprogramming, show room vehicle demo or retaining memorized settings when battery cables are disconnected to fit powered accessories or replace the battery.

OPTIONS

TA-13 3 Pin Power Cord 0 - 03Extension Cord 6 ft TS-218 Wall Bracket 0 - 04**Battery Clips**

FEATURES

• Eight independent charging stations each equipped with a sophisticated 5 stage fully automatic charging program
• Battery type selector: Choose (STD & MF) to charge and maintain all types

of starter batteries including filler cap and maintenance free batteries such as AGM, valve regulated (VRLA), flooded (wet) and GEL-electrolyte with a rated capacity of 2.5Ah and greater. Choose "DC" to charge and maintain Deep Cycle batteries

- Use for the proper commissioning of conventional filler cap type batteries
- Powerful high voltage desulfation mode breathes new life into most deeply discharged (sulfated) batteries
- 1.2 amp constant current per station
- Clear and simple battery status indicator panel for each battery
- Sensing circuitry eliminates risk of over charging
- Internal cooling fans control operating temperature
- Works with 6v and 12v batteries
- Not suitable for the initial commissioning charge of MF batteries see BatteryMate or OptiMate Pro4-S models for this function
- Two year limited warranty

OPTIMATE LITHIUM 4-BANK, 8-STEP BATTERY CHARGER-TESTER-MAINTAINER

Catalog No. TM-485

This Lithium Ion 4-BANK Battery Charger is fully automatic, charges at .8 Amp Hour and works with all 12 Volt Lithium Batteries - Charge up to 4 Lithium batteries at once! A unique LiFePO4 specific program recharges and balances cells within the battery efficiently and safely. This program delivers current to the vehicle circuitry, protecting and keeping the battery at 100% charge. Protects your investment and guarantees Lithium Iron Phosphate (LiFePO4 / LFP) batteries will perform as advertised for a very long time.

SAFE: No risk of overcharging, Totally safe for vehicle electronics. Sparks suppressed. Safe for long-term battery maintenance. Automatic shut-down if short-circuited or battery disconnected. 3-year limited replacement warranty

TECMATE DIAGNOSTIC TOOLS

VACUUMMATE ALL WEATHER

The ultimate 4-channel vacuum synchronizer

The VacuumMate All Weather is a precise four channel vacuum meter designed specifically for intake synchronization of engines with multiple carburetors or throttle bodies. In addition to its synchronization capabilities, the VacuumMate All Weather is the only tool of its kind to offer a dynamic mode that allows the technician to perform upper engine diagnostics using the intake vacuum curve to detect potential upper engine problems such as intake leaks, valve leaks, air filter blockage and low compression.

Catalog No. TS-72 VacuumMate ME Kit (with internal battery) Kits include: 08-0201 flex-rigid 5mm adapters (4ea.), 08-0202 flex-rigid 6mm adapters (4 ea.), C08-193C battery connector cord set, C08-251A T-connector

SOLAR JUMP STARTER 12 Volt 900 Peak Amp

Catalog No. ES2500

The ES2500 is the ideal entry level professional unit from the original jump starter company. It features a powerful battery specifically designed for vehicle jump starting, enabling it to deliver multiple jumps per charge and start what doesn't want to be started. Ideal for a variety of tasks, it can quickly and easily start Motorcycles, personal watercraft, cars, trucks, SUVs, boats and more. It is the perfect battery jump starter for everyone, from garage mechanics to professional techs who will use it 7 days per week.

FEATURES

- 1100 Peak Amps
- 300 Cranking Amps
- ES Series battery
- Automatic recharging
- LED battery status indicator
- 19" #4 AWG cables
- Industrial Grade Hot Jaw™ clamps
- DC outlet to power 12 Volt accessories
- 1 year limited warranty

INFRARED INDUSTRIES EXHAUST GAS ANALYZERS

EXHAUST GAS ANALYZER

Diagnostics and Performance Tool

Catalog No. FGA4000XDS

When you need a reliable gas analyzer that can accurately speed up your emissions, tune-ups, and diagnostics testing, the FGA4000XDS and

the FGA4500 Gas Analyzers are the perfect answer. By offering immediate results in seconds, these analyzers are the fastest machines on the market. Certified to BAR and OIML standards, they provide a portable, accurate, and quick solutions for every Powersports shop.

These units measures up to five gases including Hydrocarbons (HC), Carbon Monoxide (CO), Carbon Dioxide (CO2), Oxygen (O2), and Oxides of Nitrogen (NOX). Economical filters and sensors are replaced in seconds, and the sample cell and optics can easily be cleaned in the field!

Both models will instantaneously calculate readings and give you Air to Fuel Ratio (AFR), Lambda, and Grams per Mile (GPM) or Grams per Kilometer (GPK) in real time. When attached to a tachometer (optional), it reads engine speeds of up to 30,000 RPM. The optional built-in printer documents test results and allows shop owners to print their shop name, address, and other custom header text on the printout for customers' records. You can diagnose fuel-related issues accurately and quickly to provide the service that your customers need."

Catalog No. HM5000

Catalog No. FGA4500 (LCD Screen Display)

> Gas Analyzer, INCLUDES: 4 Gas, HC, CO, CO2, O2. 120V, Includes AC power cord, Sample Hose, Sample Probe Handle & Operator's Manual.

OPTIONAL ACCESSORIES

Fifth gas NOx transducer, 8 analog output connection module: 0-5V or 0-10V, Induc P/U Lead for RPM, Serial Cable for PC, Software for display and logging, Internal/ External Printer, Mobile Cart 2 shelves, Extended 2yr warranty

Handheld Exhaust Gas Analyzer, INCLUDES: internal rechargeable battery, built in data recorder, oxygen sensor, sample hose, Mini Probe Handle, water separator, purge pump and Operator's Manual.

OPTIONAL ACCESSORIES

NOx Sensor, Tach Pickup Cable, Serial Cable

Motorcycle Fittings:

- 2, 4, and 6 cylinder manifolds
- 6mm fitting for Honda, Yamaha or Kawasaki
- · 10mm fitting for Ducati

IRI Display PC Software for remote control and display of the analyzer from a PC and record and playback of data

12V DC Cable Analog outputs Portable Printer 1yr wtty, Extended warranty avail. The high performance edge you've been looking for is finally here! Compact, fast responding, and accurate, the HM5000 helps you professionally tune in the shop or on the road.

It also lets you perform road testing on the go. Simply connect the HM5000 to your vehicle's exhaust while you drive and in less than a second you'll see the exhaust gas composition.

Determine the exact amount of Hydrocarbons (HC), Carbon Monoxide (CO), Carbon Dioxide (CO2), Oxygen (O2), and Oxides of Nitrogen (NOx) your vehicle is emitting.

Get instant readings on up to five gases, plus Air to Fuel (AFR) Ratio, Grams Per Mile (GPM) and Lambda to help you tune that ever-so-tricky carburetor or injection system.

See all the data on a road test, or when taking laps around the track, and replay the results without any additional equipment. Or, your can connect the HM5000 to your PC and download and store your test drive data for historical analysis. This potent combination of gas measurement and tach reading is all you need to tune or troubleshoot your engine at various RPM's.

MOTORSCAN DIAGNOSTIC SCAN TOOL

MOTORSCAN 6050

The MemoBike Motorscan 6050 is the ultimate Diagnostic Scan Tool for Motorcycles, Dirt Bikes, Scooters, ATVs and UTVs, with OEM-level coverage of 79 brands, 5,000+ models and over 16,000 systems.

The Motorscan 6050 is an innovative handheld instrument designed to analyze the advanced diagnostics of the world's most important new generation of Motorcycles and Powersports vehicles. An essential instrument, extremely easy to use, but comprehensive and constantly updated. Within the reach of all users and rich in features that make it a must for even the most demanding technicians.

It allows the technician to perform factory service procedures, and the scan tool will display ECU data, reads and erases stored faults, resets service lights, allow injection adjustment, identify valve position, program new keys, and more.

MOTORSCAN Functions include:

- Vehicle data information includes connector location & cable identification
- Automatic or manual vehicle search modes
- ECU / VIN display
- Read & reset stored/live fault codes & lights
- Fault code database includes code descriptions
- Live data display including: RPM, battery voltage, throttle angle & more
- Component test & activation functions include: injectors, ignition coils, fuel pumps & more
- Data logging function includes ECM parameters
- Idle, injection, throttle position sensor adjustment
- Reset auto-adaptive parameters to zero
- ABS air purge & pressure test function
- Key encoding/programming & PIN retrieval
- Unlock & configure immobilizer/alarm systems
- Body, suspension, traction control computer diagnosis
- Radio, instrument panel, handlebar controls diagnostics
- Tire pressure monitoring (TPMS)
- and more!

AVAILABLE KITS:

STANDARD KIT: MS6050R17 (add your Vehicle Specific cables) Includes the 6050 Motorscan MEMOBIKE Universal multi-brand diagnostic Scan Tool in a shock-absorbing Carrying Case, complete with Universal Clamp Cable, Battery Cable w/ Clamps, USB Cable, Master Cable, including unlimited use software. Annual Software upgrades available.

MASTER KIT: MS6050R17 (Includes the 10 most popular cables) Includes the 6050 Motorscan MEMOBIKE Universal multi-brand diagnostic Scan Tool in Carrying Case, Battery Cable & Universal Cable, USB Cable, Master Cable, w/ unlimited use software and the 10 most popular OEM cables, incl. MS460 (Honda), MS463 (Suzuki), MS458 (Kawasaki), MS525 (BMW), MS541 (Harley-Davidson), MS480 (Harley-Davidson), MS501 (BRP/CAN-AM), MS516 (Polaris), MS475 (Yamaha), MS499 (Aprilia, Cagiva, Ducati, MotoGuzzi, MV Agusta, Piaggio, Vespa and more) Annual Software upgrades available.

HARDWARE TECHNICAL FEATURES

• CPU: Cortex M3 (96 Mhz)
Bluetooth Ready

• INTERNAL MEMORY: 32 MB RAM memory, 4GB Flash memory • DIAGNOSTIC: Db26 ISO22900-1 (MVCI), Internal Multiplexer • USB INTERFACE: Mass Storage connection for software update

• SUPPLY: Internal with LiPoly rechargeable battery

External, 5V with cable From vehicle, 8-16V

• **DISPLAY:** Led LCD 3.5 " full color high-definition 320x240 pixel • **DIMENSIONS:** 6.9" x 4.4" x 1.4" (175 x 112 x 36 mm)

• WEIGHT: 9.3 oz. (263 g) • AUDIO: 1 speaker • KEYBOARD: 9 keys

MS6053 DIVAS is an important optional accessory for the MS6050 scanner - Extending the range of diagnostic capabilities through a series of additional applications necessary for proper tuning.

MS6053 DIVAS Functions:

- Synchronization of the throttle valves on the carburetor and fuel injection systems (max 4 channels)
- Dynamic analysis of the manifold intake pressures
- RPM reading
- Color graphing of measured data
- Synchronization procedures integrated with diagnostic functions of the Engine Control Unit (idle speed control lock, TPS and/or self-adaptive parameter reset, analysis of fault code memory, verification of proper operating conditions, etc
- 3 analog input ports for dynamic analysis and data acquisition of vehicle sensors
- Real-time monitoring and storage of measured data
- Built-in microphone

WINONA VAN NORMAN BORING BAR

The CB1401 is the fastest and most efficient boring machine you can buy to bore motorcycle and small engine cylinders. Simple, accurate setup combined with rapid and flexible operation make this machine a

Custom designed for the Powersports Industry!

profitable investment. Two spindle speeds and infinitely variable feed rate allow the operator to obtain the exact surface finish desired. The hard-chromed spindle (included) and pressure lubricated adjustable support bearings assure long and trouble free operation. The unique tool support mounted on top of the spindle allows for heavy cuts (up to .040") at large diameters, featuring anti-chatter dampening and support of the tool bit further out. The CB1401 boring bar comes complete with work lamp, table parallels (set of two), tool bit micrometer, hex wrench and deluxe floor mounted cabinet.

STANDARD EQUIPMENT

5123 Cylinder Hold Down Kit

2431 Centering Cone

Cam Lock Hold Downs

Power-stroke the "heart" of the engine!

WINONA VAN NORMAN CYLINDER HONING MACHINE

Catalog No. PS1370 (Friction Feed Head Catalog No. 819216 not incl.)

OPTIONAL FRICTION FEED HONE HEAD

Catalog No. 819216

Hand friction against head causes stones to expand or retract while honing.

FEATURES

- FASTER, EASIER & SAFER: Foot control included. Power Head traverses sideways on ball bearings for easy positioning
- VERSATILE: Can accommodate singles, and many twins, triples and fours
- HONES CYLINDERS WITH TORQUE PLATE ATTACHED
- STROKE: Adjustable by setting limit switches 8" max.
- STROKE SPEED: Fully adjustable
- LOAD METER: Indicates if bore is straight or tapered
- PAUSE BUTTON: Permits manual stroking override
- HONING OIL: Pump re-circulates 8 gallons @ 5 GPM
- DWELL BUTTON & AMMETER: Allows manual removal of taper
- OPTIONAL FRICTION FEED HONE HEAD: Allows effortless changing of honing diameter, while running.

WINONA VAN NORMAN CYLINDER HONING MACHINE

The PS1370 Power Stroke Cylinder Honing Machine is an ideal machine for the motorcycle/small engine shop. Filling an important need of powersports dealers and machine shops, this power-stroking machine hones cylinders with controlled accuracy. Utilizing a clean, recirculating, 8 gallon, oil-bath environment, the machine helps the operator produce a consistent RMS surface finish every time. It detects and corrects tapered bores, while taking the work out of honing piston clearance.

STANDARD EQUIPMENT

1015 Honing Oil Pump 1313 Work Light 1374 1/2" Jacobs Chuck Kit 6114 Small Engine Fixture

OPTIONAL EQUIPMENT

819216 - AN Style, Friction Feed Hone Head w/dual friction feed (2.5" - 5.5") - (required)

819239 - SN/JN Friction Feed Hone Head (1.750" - 2.75")

860080 - SNJ Style Manual Hone Head (1.25" - 1.75") **860071** - SN Style Manual Hone Head (1.75" - 2")

860070 - JN Style Manual Hone Head (2" - 2.6" range)

SPECIFICATIONS

• HONING RANGE: (Max.) 1.25" (31.75mm) – 5.5" (139mm) (with optional Hone Heads)

• STROKE: Adjusts to 10" (254mm)

• MOTOR: 1/2 HP, 115V

• AIR REQUIREMENTS: 110 psi, @ 3 cfm

• MACHINE DIMENSIONS: 32"w x 44"d x 60"h

WINONA VAN NORMAN CYLINDER HONING TANK

Catalog No. CH1300

The CH1300 Honing Tank was designed for ease and safety of operation while honing small engine cylinders. The cradle holds the cylinder in place leaving hands free for operation. Choosing the honing angle that works best for you is easy with the over-sized "easy-to-handle" locking knobs.

FEATURES

- QUICK SET-UP
- POSITIVE CLAMPING
- PROMOTES SAFE HONING
- HOLDS WORK PIECES UP TO 19" LONG

STANDARD EQUIPMENT

1313 Work Light

1015 Honing Oil Pump

6114 Small Engine Fixture

SPECIFICATIONS

• RANGE: Handles cylinders & heads up to 19"

• COOLANT PUMP: 110V, 5 G.P.M.

• HONE OIL CAPACITY: Holds 4 gallons

• **DIMENSIONS**: 26"w x 19"d x 33"h

Precision instruments

COMBI-MIKE Catalog No. 159-211

MITUTOYO MEASURING INSTRUMENTS

Mitutoyo, manufacturers of high quality measuring instruments for over 70 years, provides specially engineered models with ranges to fit the needs of the Powersports service industry. All instruments feature highly usable calibrations with either a combination inch-and-metric, inch, or metric readout system to meet U.S. Federal Standards.

DIGITAL OUTSIDE MICROMETERS (combination inch/metric)

The Combi-Mike gives readouts in both inch and metric systems simultaneously as you rotate the spindle. Inch measurements are indicated on the thimble/sleeve while the accurate metric equivalent is displayed as a digital readout in the display window. Features include quick-and-easy zero adjustment, clear graduations, satin chrome finished thimble and positive locking clamp. Comes complete with fitted carrying case.

The PU 1800 Power Unit is ideal for busy shops. The 115 volt, variable speed drive unit rolls along a bench mounted track to quickly position over the valve seat. The power unit's double universal joint transmission easily adjusts to any cylinder head shape. Light downward pressure on handle provides perfect results effortlessly. Unit includes motor, transmission, trolley, track, and foot switch. (A.C. Headstand optional)

BRM FLEX-HONE TOOLS & HANDY ANTI-FATIGUE MATS

CYLINDER FLEX-HONE TOOLS

Fast, efficient cylinder deglazing and cross-hatching with a plateaued finish insures immediate ring seating without appreciable stock removal. These unique flexible hones consist of globules of silicon carbide laminated to the ends of high-density nylon. Ideal for port deburring of two-stroke engines, and essential for obtaining a plateaued finish. Power by 3/8" or 1/2" portable electric drill.

For fast ring seating!

HANDY ANTI-FATIGUE MATS

This Anti-Fatigue mat is made of a heavy-duty material that suffers no deterioration from weathering and ozone exposure and complies with the FMVSS-302 for self-extinguishing properties. These mats provide excellent durability when exposed to many organic and inorganic industrial chemicals.

These mats far exceed the competition with a closed cell polymeric sponge base that produces the soft and resilient rebound properties needed in a manufacturing or working environment.

#17502 Anti-Fatique Mat - Black Diamond Plate 3' x 5' Super-Duty Double Sponge, 1" thick
#17501 Anti-Fatigue Mat - Black Diamond Plate 3' x 5' Heavy-Duty Single Sponge, 9/16" thick
#17503 Anti-Fatigue Mat - Black Diamond Plate 2' x 7' Heavy-Duty Single Sponge, 9/16" thick

STANDARD MODEL BLAST CABINET

Catalog No. TR20

BENCH-TOP MODEL

Catalog No. TR20BM (Also available)

Blast Parts Faster & Easier!

TRINCO BEAD BLASTERS

TRINCO has been a leader in blast cleaning equipment since 1951. With many cabinet designs available, we can provide your shop with equipment to meet all of your blasting needs.

The Standard Model Blast Cabinet is ideal for cleaning small parts. It has all the features of a full size cabinet, yet it doesn't require the space. The standard gun system is rated at 14 CFM, 60 PSI. The TR20 can be used as a bench model or combined with a work stand that is 24" high and contains a swing-up shelf and a slide-out tray for disposing of spent media.

FEATURES

- Durable 14-gauge welded steel construction
- Large window, 18" x 10" for excellent viewing
- Easy change window frame
- Air pressure regulator and gauge
- Tungsten carbide nozzle
- Blast Gun rated at 16cfm at 80psi
- Safety foot valve blasting control
- Trap door for easy disposal of spent media
- Heavy-weight rubber gloves
- Incandescent lighting
- 100 CFM dust collector
- 15 lbs. all purpose media included

SPECIFICATIONS

- Inside dimensions: 20"w x 18"d x 18"h
- Overall dimensions: 21"w x 18-1/2"d x 36"h (BM)
- · One door opening
- Front opening Lid: 20" x 15"
- Electrical requirements: 115 Volt, 1 Phase, 60 Cycle

OPTIONS

- Water filter (recommended)
- LED Lamp upgrade
- Blow off gun
- Auto Power Basket (8" x 8")
- Protective glass film (10 pack)

STANDARD BLAST CABINET

Catalog No. TR24

FEATURES

- Durable 14-gauge welded steel construction
- Carbon screen workfloor
- Large safety glass window, 19-1/2" x 12"
- Easy change window frame
- Tungsten carbide nozzle
- Blast Gun rated at 16cfm at 80psi
- Safety foot valve blasting control
- Trap door for easy disposal of spent media
- Heavy-weight rubber gloves
- BP dust collector
- Incandescent lighting
- 15 lbs. all purpose media included

NUGIER HYDRAULIC PRESSES & HANDY ANTI-FATIGUE MATS

While capacity requirements vary somewhat in different shops, 20-ton hydraulic presses are the most popular choice for today's service repair departments. Choose 3-speed pump with foot operation, or single-speed or two-speed pump with hand operation. Basic tooling on all units includes two table parallels and two "V" blocks. All 20-ton presses have slots in uprights to permit fork tube straightening.

FEATURES

HANDY ANTI-FATIGUE MATS

- EASY TO USE: Self-locking table winch for easy table height adjustments.
- FASTER OPERATION: Multiple-speed pumps permit faster ram speeds.

 Results in fewer strokes which advances the ram further per stroke. Saves time!
- OVERLOAD SAFETY PROTECTION: Maximum-capacity relief valve and ram-travel limit valve are hydraulic safety features incorporated on all units.

SPECIFIC.	ATIONS					
Catalog No.	Capacity Tons	Method of Operation	Ram Travel	Number of Ram Speeds	Min. No. strokes per inch of ram Travel	Width between Uprights

Catalog No. H20-6-3F (Three–Speed Pump)

This Anti-Fatigue mat is made of a heavy-duty material that suffers no deterioration from weathering and ozone exposure and complies with the FMVSS-302 for self-extinguishing properties. These mats provide excellent durability when exposed to many organic and inorganic industrial chemicals.

These mats far exceed the competition with a closed cell polymeric sponge base that produces the soft and resilient rebound properties needed in a manufacturing or working environment.

#17502 Anti-Fatique Mat - Black Diamond Plate 3' x 5' Super-Duty Double Sponge, 1" thick #17501 Anti-Fatigue Mat - Black Diamond Plate 3' x 5' Heavy-Duty Single Sponge, 9/16" thick #17503 Anti-Fatigue Mat - Black Diamond Plate 2' x 7' Heavy-Duty Single Sponge, 9/16" thick

PARTS CLEANING & WASHERS

OMEGASONICS ULTRASONIC BENCHTOP CLEANER

Omegasonics ultrasonic bench top cleaners clean faster and more thoroughly than hand-cleaning and can significantly reduce labor costs while improving cleaning results. These ultrasonic systems are well suited for all powersports shops needing an effective system for stripping grease, debris, contaminants and corrosion from engine cases, carburetors and other parts. An environmentally-sound solution, our Ultrasonic Washers use a wide range of economical cleaning solutions developed for the contaminants being removed and the surfaces being cleaned, whether metal or plastic.

As with all of our ultrasonic cleaners, non-toxic bubbles create a unique cavitation phenomena that seeks out and removes unwanted microscopic particles from the parts you want cleaned. This extraordinary cleaning action infiltrates the smallest crevices and hard-to-reach surfaces, penetrating areas normally inaccessible to other cleaning methods.

OMEGACLEAN ULTRASONIC SOAP

Catalog No. Soap 10-1

OmegaClean is our most versatile ultrasonic cleaning soap. This cleaning agent removes oil, grease, carbon, and contaminants from a variety of metals. Contains buffers to protect aluminum finishes and silicates to guard against flash rusting. Will not harm or discolor aluminum. Available in 1 Gal., 5 Gal. & 55 Gallon.

OMEGASONICS PRO SERIES ULTRASONIC CLEANER

The Omega Pro is the most compact version of our portable ultrasonic parts washing line. With 1000 watts of power in a 25 gallon tank, it offers all the effectiveness of our larger units – in a more convenient size. Designed for Powersports Dealers and other industrial applications, this unit offers the user a perfect mid sized ultrasonic cleaner.

SPECIALTY MOTORS PERSONAL WATERCRAFT TEST TANK, HOIST & DOLLIES

Experience Pays Off!

PWC TEST TANKCatalog No. PWC-TT-H

NEW Adjustable Width PWC Support Bunks

Built by Specialty Motors, this test tank has been designed and manufactured to meet all of your needs. Since 1952, Specialty Motors has been building quality test tanks geared for the Marine Industry. Similar to the models developed for "Outboard Engine" testing this PWC Test Tank was developed as an "easy to use" solution for personal watercraft testing needs. The tank is uniquely designed to submerge only the pump and a small portion of the hull. The majority of the hull stays clean and dry during testing. The bunks and tie-down points hold the personal watercraft securely to avoid jumping and bucking experienced by standard test tanks. The attached Hoist (included with Catalog No. PWC-TT-H) will lift the PWC from its trailer and rotate it around into the test tank with ease. The Hoist also serves as an easy way to lift any PWC for inspection or service.

How to lift a personal watercraft with just one hand!

PWC HOIST WORKSTATIONCatalog No. PWC-H-WS

The PWC Hoist Workstation is designed to lift personal watercraft in any environment with only one person. Whether you are lifting a PWC off your customer's trailer or from a PWC dolly, you can count on this Hoist/Workstation. This versatile piece of equipment lifts the PWC to a workable height and tilts the watercraft for easy engine compartment access and other servicing needs. This Hoist/Workstation takes the back pain out of PWC servicing!

Lifts up to 1000 Lbs.

OPTIONAL EQUIPMENT Catalog No. Description

PWC-FLK Fork Lift Kit: Allows easy movement of PWC with any fork lift PWC Boatoter: Designed to work as a cradle rest for PWC WLY-MINI WEELEE DEELEE: Wheels make PWC Hoist, & Boatoter portable

HANDY DELUXE TEAR-DOWN TABLES

From the same manufacturer as the world renowned Handy Portable Air Lift is the ever popular Handy Tear-Down Tables. These Tear-Down Tables are designed to save you time and money.

The Deluxe Tear–Down Table steel workbench is great for your service department or your garage. The 14 gauge top has a 3/4" rim to contain liquids and capture leaking fluids when working on hydraulic systems and transmissions. Fluids drain into the removable polyethylene drawer for easy dispensing. The convenient adjustable lower shelf organizes your tool storage. The drawer features a cylinder key locking system with full–extension ball bearing sliders to keep your valuables safe. Tough powder–coat finish resists rust, chips, and scratches.

As with all Handy products, the Deluxe Tear-Down Table is proudly made in the USA.

HANDY DELUXE TEAR-DOWN TABLE Catalog No. 11505R (Red / Black legs)

FEATURES

- Adjustable working height of 37" to 41"

BUSINESS HOURS:

Monday - Friday 8:30 a.m. - 4:30 p.m. (Pacific Time)

HOW TO ORDER:

Order by phone, call 1-800-222-6199. Order online, sales and customer service representatives are available 8:30 a.m. – 4:30 p.m. PDT Monday through Friday.

PAYMENT OPTIONS:

Company Check Credit Card (Visa, MasterCard or Discover Card) Bank Wire Transfer

Discover Card)
Bank Wire Transfer
Net 15 on approved credit

Leasing - Lease to Own (\$3,000.00 min., 2 years in business, approximately 48 hours for approval)

SHIPPING:

Orders are shipped customer prepaid, or freight added, F.O.B. shipping point(s) - see price list. Normally, equipment is shipped via common carrier truck, and smaller items via UPS. Method of shipment is at the shipper's discretion, however, every effort will be made to accommodate any special shipping preferences you may have.

DELIVERY:

Estimated delivery times can be obtained at time of purchase from our customer service representatives. Unloading of equipment is your responsibility. You should ensure that a fork lift or equivalent is available at time of delivery. Any re-delivery charges are the responsibility of the purchaser. Inspecting your shipment(s) for damages is the responsibility of the purchaser.

WARRANTY:

Products sold by The Carlson Company are warranted by the manufacturers to be free from defects in material and workmanship. Adjustments under these warranties are limited to the repair or replacement of parts found to be defective, and do not include parts installation or transportation charges. Damage arising from misuse, abuse or alteration is not covered by warranty.

FREIGHT DAMAGE CLAIMS:

All goods are carefully packed and are in good condition when shipped to our customers. According to the F.T.C., title to merchandise passes to customer when shipper turns it over to the common carrier and/or receiver. Any loss or damage in transit is the sole responsibility of the carrier. AT THE TIME OF DELIVERY INSPECT ALL SHIPMENTS IMMEDIATELY FOR POSSIBLE DAMAGE OR SHORTAGE. If external damage is apparent, or hidden internal damage is suspected, you should sign the freight bill "freight damaged" or "subject to claim". Any claim for damage or shortage should be made with the carrier at once. We are more than willing to assist you in your claim, however, we are not responsible for collection of claims or replacement of goods.

NOTICE TO PURCHASER:

The following is made in lieu of all warranties, expressed or implied. User shall determine the suitability of the product for his intended use and user assumes all risk and liability in connection therewith. Under no circumstances shall The Carlson Company be liable for any injury, damage or consequential loss related to any product we sell.

RETURNS:

No returns accepted without the expressed written authorization of either The Carlson Company or the manufacturer of the merchandise in question. Upon requesting and receiving such authorization, you may return any defective parts for repair or replacement (freight prepaid) to the shipping point or other location, as designated in the letter of authorization. Cancelled orders or refused shipments may be subject to factory restocking fee and/or additional freight charges.

PRICES:

Subject to change without notice. All prices are net to the dealer, F.O.B. shipping point(s).

TRADEMARK NAMES: such as Harley-Davidson®, Honda, Yamaha, Suzuki, Kawasaki, BMW etc. are used for reference only in this catalog and are the sole property of their respective parent companies.
