FAQs

What is the "Remove" tab on the base?

That indicates the optional adhesive on the bottom of the base. Remove the adhesive cover with the tab, and the light can be securely placed on a clean surface for added stability. This is not permanent and the light can be moved. The adhesive will not leave a residue or mark on the surface.

What does that mean, upward and downward illumination?

The lighthead is a sandblasted aluminum frame that encompasses two LED panels. There is one on top of the light head, and one on the bottom, hence upward and downward illumination. The Highline Desk in its minimalist task light form is great for low-light interiors where ambient light is desired, without the need for a lampshade.
