 What kind? _____ What size? _____

4.) Do you prefer a: Tight fit Regular fit Loose fit

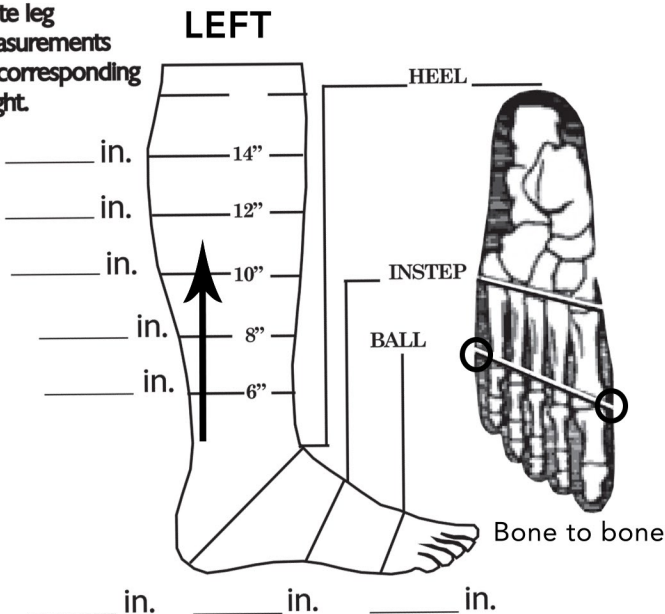

5.) What is your occupation/primary use for the boots?

6.) Do you have any problem areas, bunions? Etc?
 Additional Notes:

MEASURING DIRECTIONS

You MUST have someone else take your measurements for you. Use socks you intend to wear. Sit down. Relax feet on floor. Use tailors tape at indicated areas on drawing. All measurements are the CIRCUMFERENCE of foot and calf. Be very careful, as special boots are not returnable.

Write leg measurements on corresponding height.

You MUST have someone else take your tracings for you. Measure over socks that will be worn. Be sure to hold a pencil or same thickness pen straight up and down perpendicular to paper while tracing. (Do not use a non-standard pen because it will offset your tracings.) Be sure to stand with weight distributed evenly on both feet. Dont be afraid to trace over the writing.
