BEACH GLOW ON THE GO

One of the perks of the summer is getting that beach glow. You know the one, where your hair is perfectly wavy and textured, skin is dewy and bronze, and your face has just the perfect sun kissed glow. So how does one keep this glow while on the go or even year round? This is the conundrum I am looking to solve this summer.

BODY

Summertime really drys out my skin, I am also super fare so I try to keep myself exfoliated and stocked on sunscreen as much as possible. I also try to avoid laying out to tan but no one wants to look like Casper so I'll take any help I can get with adding a natural looking bronze glow to my body.

Marlowe Body Lotion – Post shower and exfoliation I slather myself in this lotion. Not only is
it super hydrating but it's not greasy and absorbs really fast.
