# What's in the box?

- 1 Spacetalk Life Gift Box
- 2 Spacetalk Life
- 3 Charging Dock

- 4 SIM Cover Removal Tool
- 5 SIM Cover
- 6 Charging Cable
- 7 Quickstart Guide

# Getting to know your device

- 1 SOS/Return Button
- 2 Power Button
- 3 Touch Screen
- 4 Speaker Port
- 5 Microphone Port

# Getting to know your device

- 1 Power Button
- 2 SOS/Return Button
- 3 Charging Port
- 4 SIM Cover

# Installing your sim card

Using the SIM Cover Tool, pry the SIM Cover open

Pull out the SIM Cover and flip it over

Insert the SIM card with the gold visible.

Insert SIM as seen in step 1

# Charging your watch

1

Connect the USB cable to the charging dock and a power adapter (power adapter is not included)

2

Unlatch the buckle

3

With the SOS button facing up, place the watch onto the charging dock

While charging, the light will be red and when the watch is fully charged, the light will change to green

# How to adjust the strap

Push in the buckle on both sides to un-clip the strap

Pull the strap so that the metal stud is free from the strap hole

Slide the buckle to change the size:

**Towards the watch:** Smaller

**Towards end of strap:** Larger

When you have the desired size, push the metal stud into the strap hole to lock it in place

# Powering up your watch

## To Turn The Watch ON

Hold the power button on the right-hand side until the 'Spacetalk' logo appears. The watch will also vibrate

## To Turn The Watch OFF

Hold the power button on the right-hand side until you see the 'shutdown' prompt.

Tap **'YES'** to shut the device down. Press **'No'** to cancel.

# How to access the main menu

## Waking the Screen Up:

- This can be done by pressing the power button to the right
- Alternatively, if 'Lift to wake' is enabled simply lift the watch so you are looking at it

## Navigate between the screens:

- Tap anywhere on the clock screen
- After this, swipe from right to left to access the next page

## How to return to previous screen/ menu:

- Press SOS button to return to the previous screen/menu.

# How to access drop-down menu

## Main Watch Face:

- Start by making sure the watch is on and illuminated

## Slide Down:

- Sliding down from the top of the screen will show the drop-down menu

## Drop-down menu:

- In this menu you will see your SIM signal, battery percentage, flight mode, volume and brightness control

# Drop-down options

## Turning on Flight Mode:

- Tapping the '**Flight Mode**' button will turn off all cellular connectivity
- Tapping the plane picture again will disable flight mode, reconnecting the watch
- When orange, flight mode is displayed, no connection is available

## Adjusting sound:

- Tapping the little speaker button will allow you to change volume with the '+' and '-' buttons
- Tapping again will make the watch vibrate only
- Tapping again will make the watch silent, tapping again will unmute the watch

## Adjusting brightness:

- Tapping the little sun button will allow you to change brightness with the '+' and '-' buttons.

Tap on the phone icon,

# Making calls

## 1. Click numbers:

- Type by tapping on the numbers
- Press the  button to make the call
- Tap the 'black x' to backspace numbers

## 2. View contacts:

- Swipe left or right to scroll through saved contacts
- Tap on the contact to call their number
- Numbers are saved on the Spacetalk app

## 3. Call history:

- View in-bound and out-bound calls
- Call History cannot be cleared/deleted.

# Sending messages

## Typing messages:

- In this menu you can type the number of the person you want to message
- Press the orange button to start messaging that number
- You can either send a voice message, message, or make a voice call to your chosen number

## View messages:

- View message conversations between mobile numbers and the watch
- If you hold onto a message inside the conversation, you will have the option to delete that message or all messages from that number
- When you click on the message icon, the keyboard icon appears, tap on it and start typing the message

## View contacts:

- Swipe left or right to scroll through saved contacts
- Tap on the contact to message their number
- Numbers are saved on the Spacetalk app

# Checking the weather

## Hourly Forecast:

- Swipe left and right to see the weather change over the course of your day in your location

## Daily Forecast:

- Swipe up and down to see a weekly forecast for your current location

# Sending your location

## Tap to send:

- When opening the menu, you will be prompted with a **'Send Location'** message. Tap the purple button

## Sending:

- You should then see a **'Sending'** message appear

## Sent:

- You will see a **'Done'** message appear when your location has been sent
- Location can be viewed from the Spacetalk app

# Using the step tracker

## Today & History:

- The Today option will show you the steps for your current day 12:00am - 11:59pm
- History shows you your daily steps from today and the last 5 days

## Settings:

- **Active:** Toggling the 'Active' button turns step tracking on or off.
- **Goal:** Change your daily step count goal with a number between 2,000 and 99,999. Tap on the blue number and enter the amount. When you are done, make sure to tap on the tick
- **Reset:** Tapping reset will prompt to confirm if you would like to reset today's step count history/progress

# How to set alarms

Tap  to add alarm

Tap time

Adjust the time then tap 'Apply'

Tap 'Title'

Type your alarm description then tap 

Tap 'Repeat'

# How to set alarms

Tap  to enable day

 means enabled

Adjust day then tap 'Apply'

Tap 'Ringtone'

Select 'Ringtone' or 'Silent'

Tap 'Apply' to confirm

# How to set alarms

Tap 'OK' to add your alarm

Toggling  enables or disables the alarm

Tap and hold the alarm to delete it

**Note:** 'Reminders' can only be viewed from the watch. Editing is done via the Spacetalk app in 'Settings'

# Changing wallpaper

Tap on the main screen

Tap and hold on the button

Swipe left and right to see the selection.  
Tap to select

## Face watch choices/options.

Tap on the icon to get into settings menu

# System settings

Flight Mode turns off all cellular connectivity

Flight Mode Off

Flight Mode On

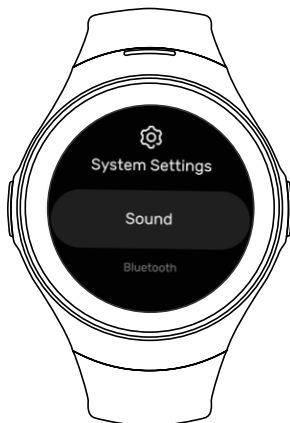

Lift to wake turns the screen on when rotating your wrist to look at the watch face

Lift to Wake Off

Lift to Wake On

In this menu device you will be able to adjust the volume, sound mode, ringtone (call tone) and notification sound (message tone) for your device

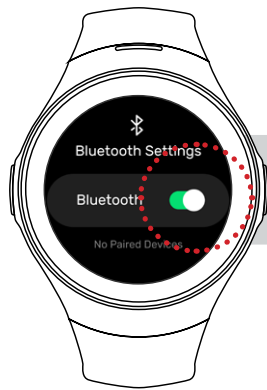

# System settings

## Bluetooth Setup Process:

Tap 'Bluetooth'

Turn Bluetooth on

Tap 'No Paired Devices'

Tap 'Scan'

Device will begin scanning

Tap the device to connect with

'Connecting'

'Connected'

# System settings

Watch Update looks for the latest software update to install. Refer to the watch pairing process for more information on updating your watch.

In the 'Date & Time' menu, you will be able to choose to have the date & time set automatically or manually.

Turning this option off allows you to manually adjust the time and date

Turning this option off allows you to manually adjust the time zone

Off = 12-hour format  
On = 24-hour format

confirm selection)

Spacetalk is a consumer general wellness device, not a certified medical device. Spacetalk Life Fall Detection does not detect 100% of falls. If able, users should always push their SOS button when they need assistance. Spacetalk is not intended to replace a caregiver or medical attention for an individual dealing with health issues. The information provided in this Website or the Spacetalk mobile application is not a substitute for obtaining proper medical or other professional care or services. You should seek independent advice from a medical professional.

# Using Spacetalk App with your *Life* device

# Using the Spacetalk App

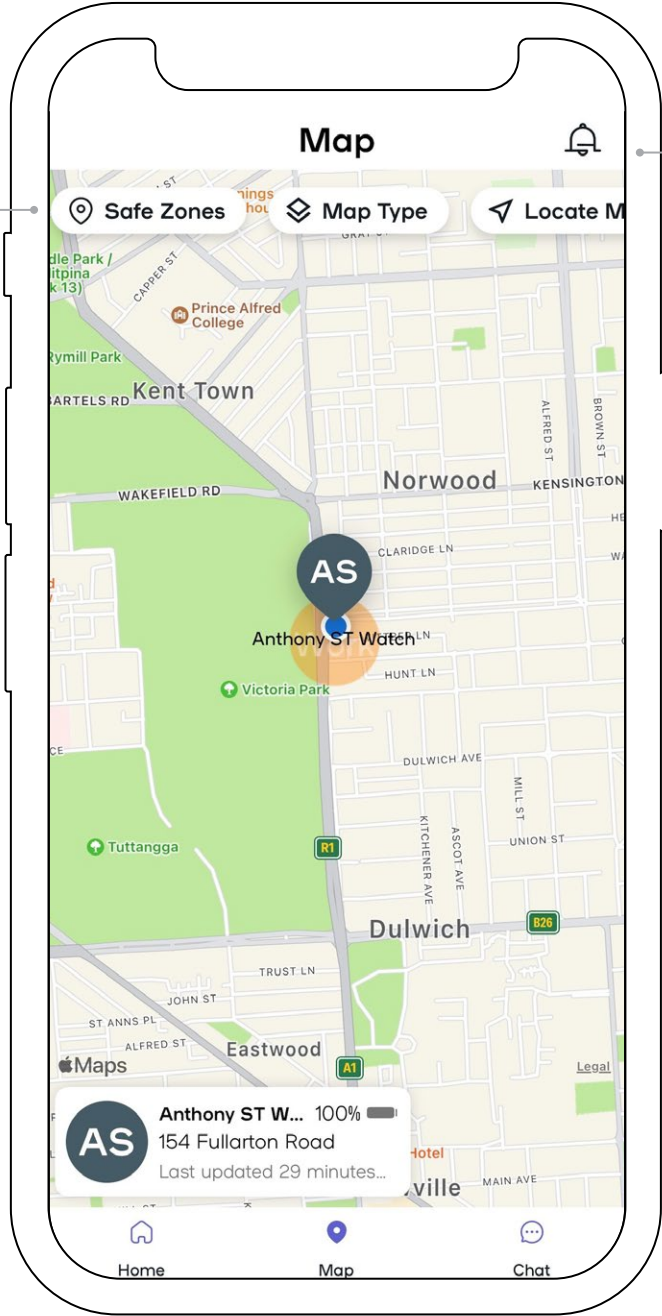

Scroll right to left:

Safe Zones

Map type

Locate me

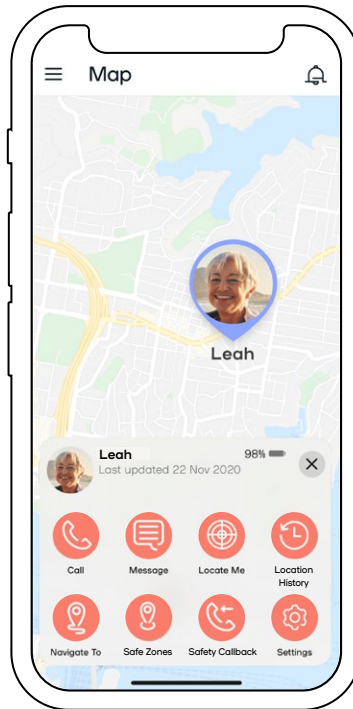

Fit to screen

Tap for all Spacetalk Device notifications.

**Example:**  
Firmware update,  
charging and low battery alerts

# Getting started with the Spacetalk App

Tap to call that Spacetalk device

Tap to message that Spacetalk device

Tap to locate that Spacetalk device

Tap to show daily location update history

Tap to navigate to the Spacetalk device

Tap to access Safe Zone settings

Tap for Safety Callback

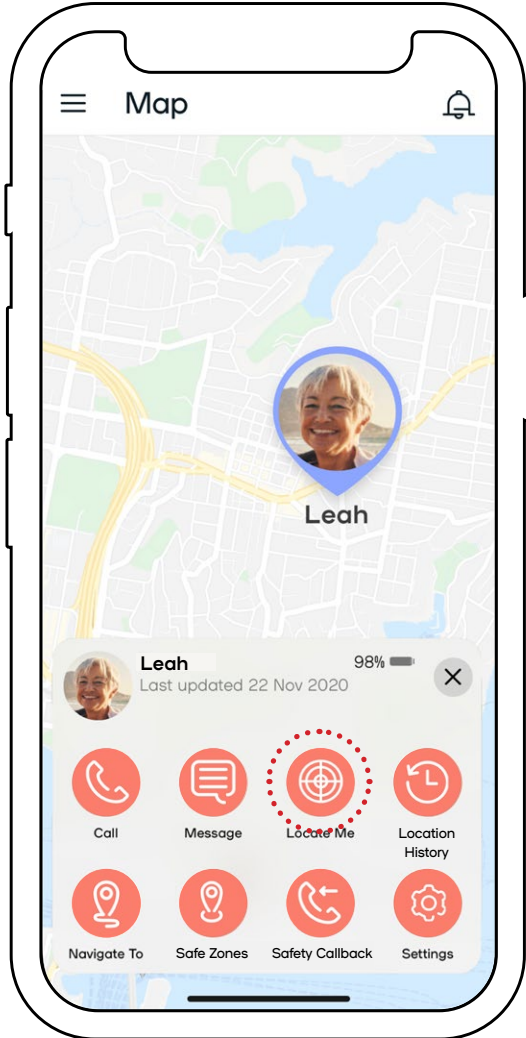

Tap to access the settings menu

# Locating your device

To locate your Spacetalk Life device tap on the  button.

This will begin looking for the device as seen below.

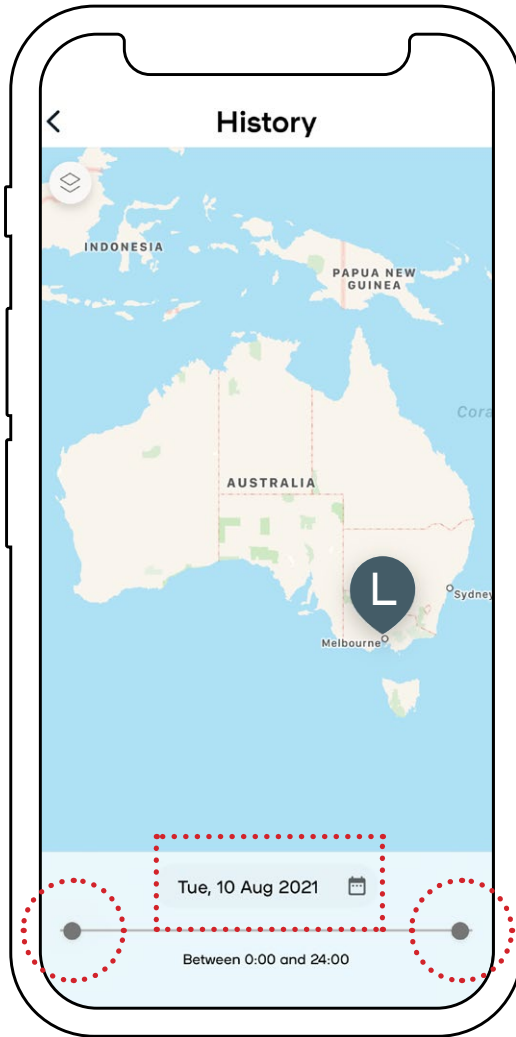

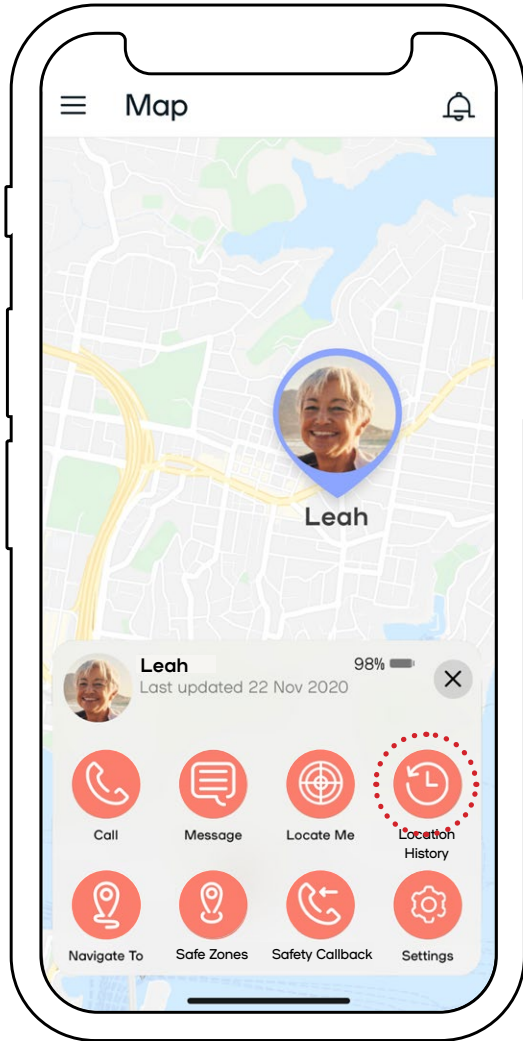

The watch will receive a notification. If the location request is rejected by the wearer, no location on demand will be acquired

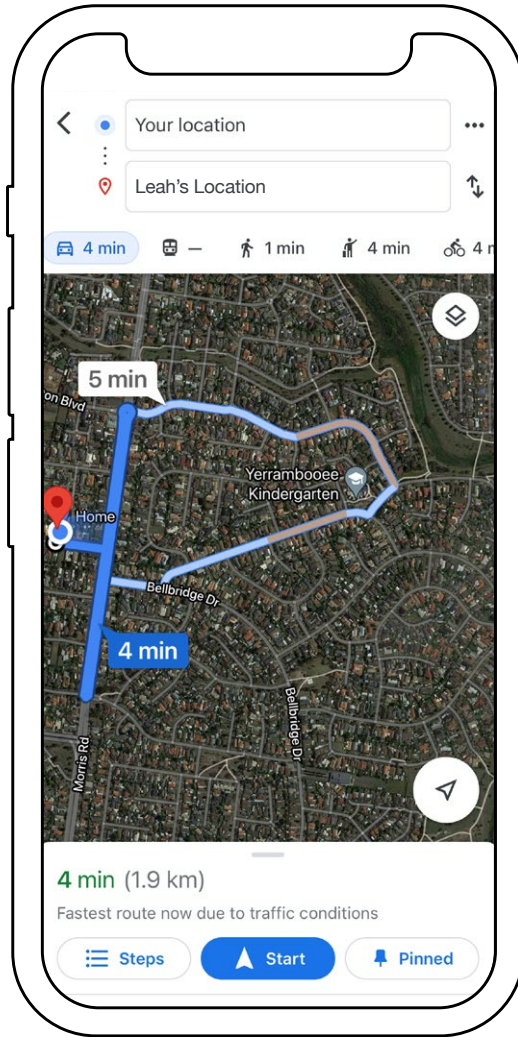

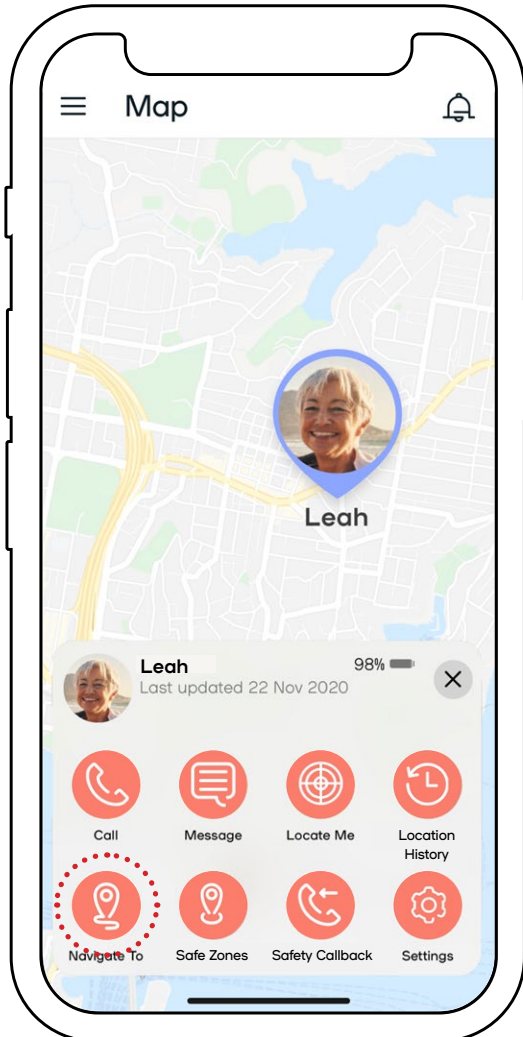

# View your location history

In Location History you can view location updates and change date or interval times to show specific locations

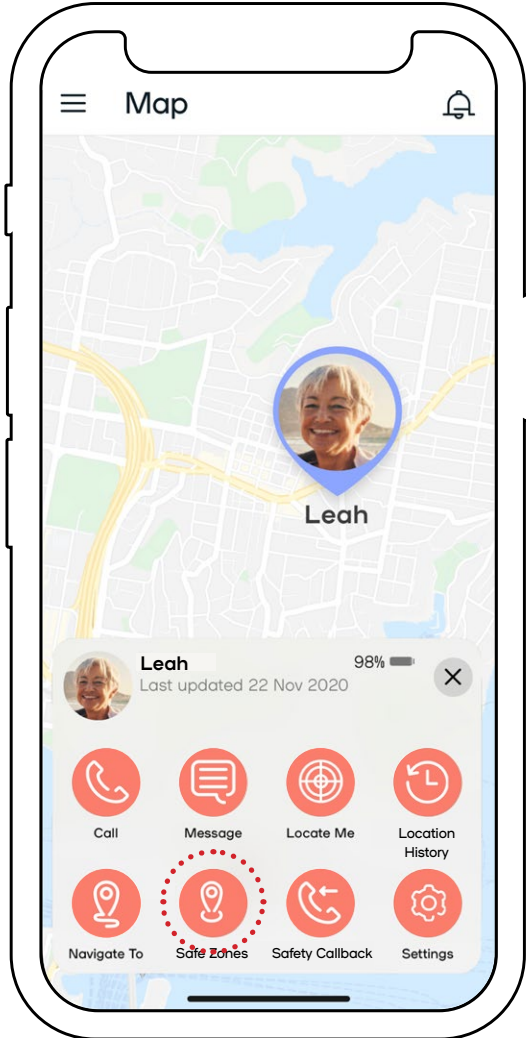

# Navigate to device

Tapping 'Navigate To' will open your default Maps app on your device and show you directions to the last Spacetalk device location update

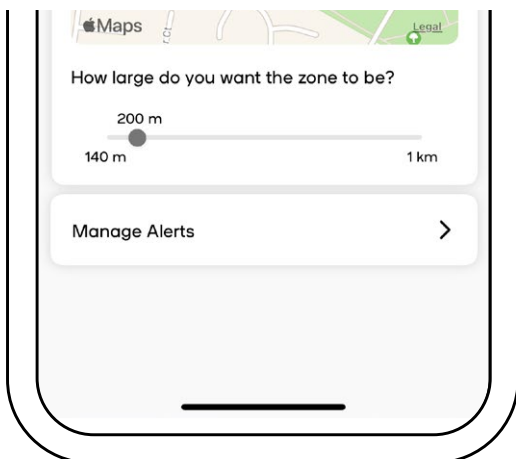

# Using safe zones

Set Safe Zones to monitor when a device enters or leaves an area.

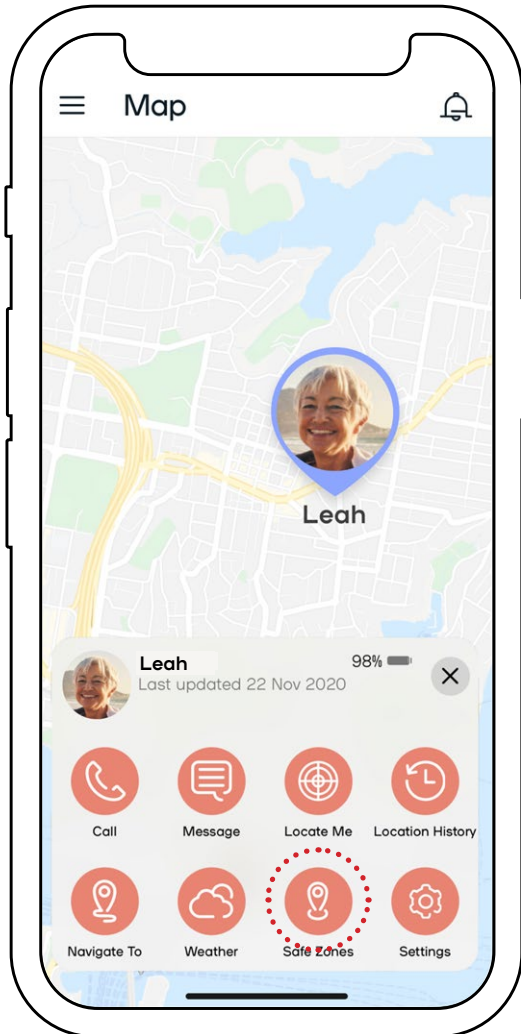

You can also create intervals to monitor

Please refer to Page 43 for more on Safe Zone alerts

# Set up Safety Callback

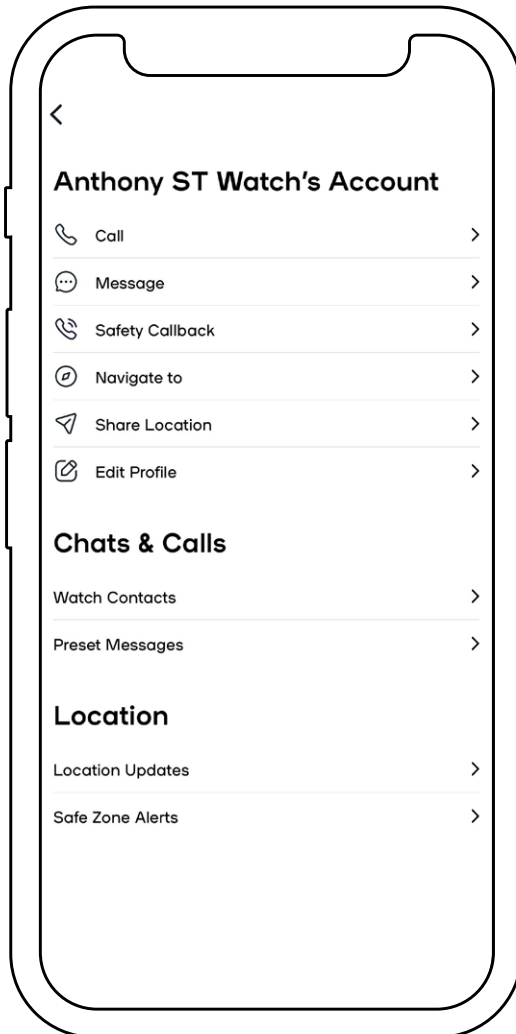

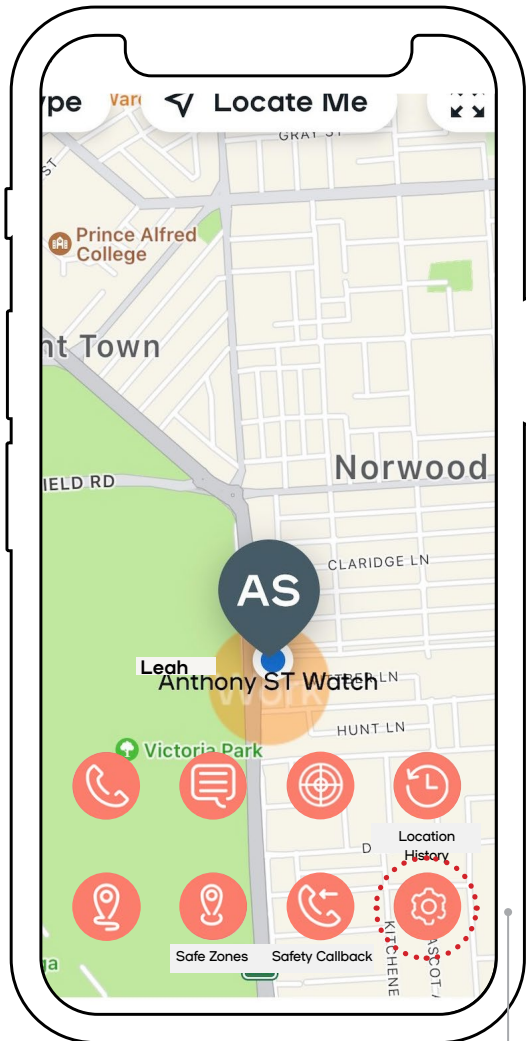

Forces the watch to call your phone so that calling is touch free from the watch.

If the watch wearer doesn't wish for this to go through, this request can be rejected from the watch

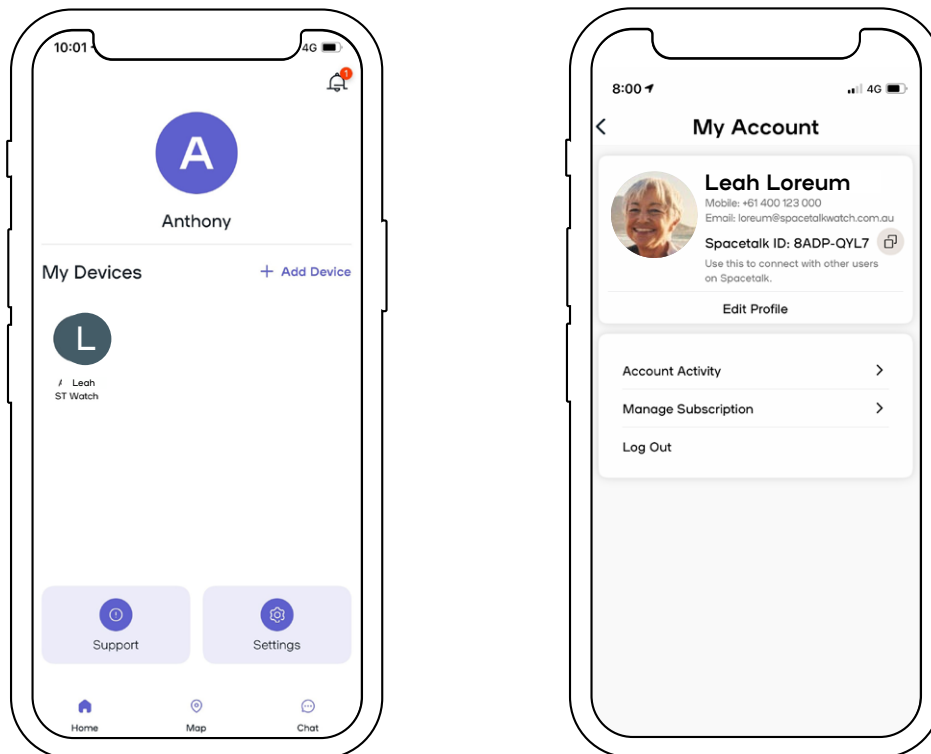

# Settings

To view settings click on the icon

# Manage your account

**Edit Profile:** Edit the details of the specific account you are logged into.

**Account Activity:** View all the sessions/devices that have logged into this account. You will see device name, when it was last active, IP address and a very brief location based on the IP address (this could vary with VPN's being used)

Manage Subscription:

Log Out:

# Using the fitness tracker

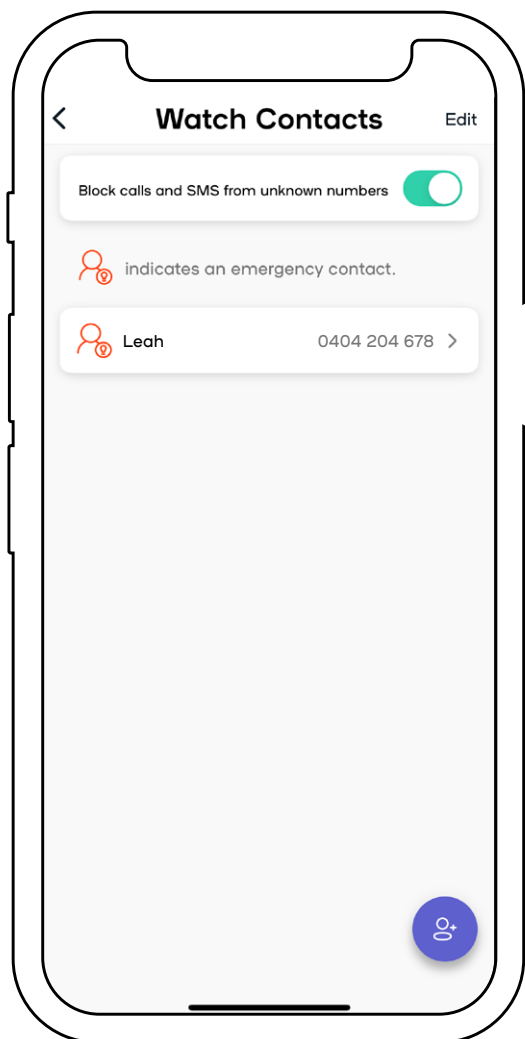

Check your daily, monthly and yearly step count average

You can also change your step count goal from the settings menu (the cog in the top right corner of the screen)

# Managing contacts

Toggle calls & SMS from unknown numbers and also toggle the free dial pad

Add contacts manually or from your phone's address book. This is where you select if the contact is and emergency contact

Edit contacts and re-arrange order for call sequence when fall detection or SOS is activated

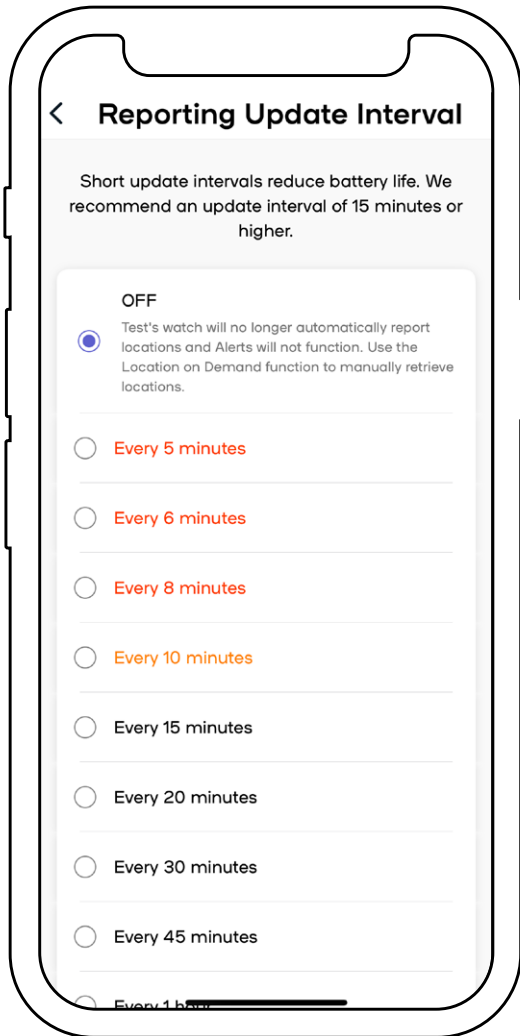

# Preset messages

Re-arrange and add preset messages.

This is pre-programmed text used to send quick generic responses instead of typing out regularly used messages

# Location updates

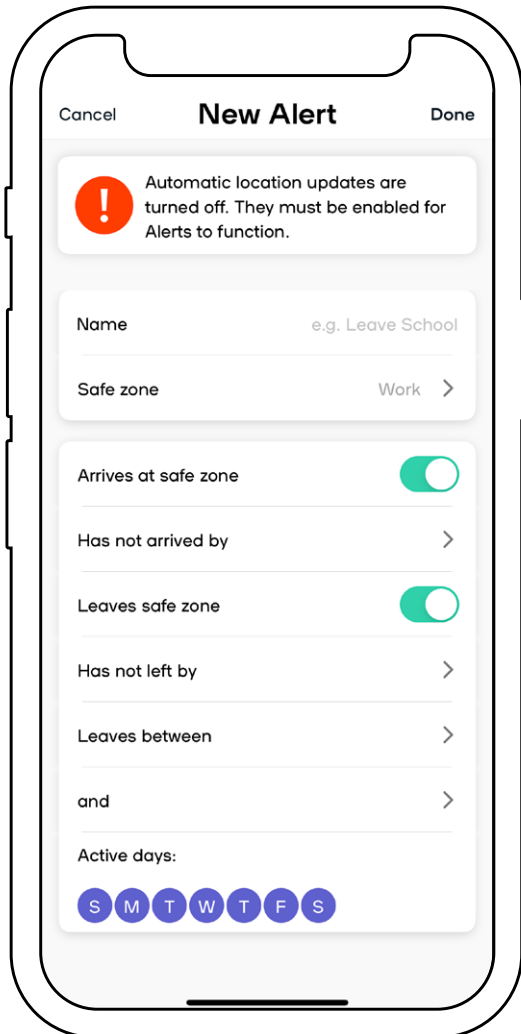

Reporting of location intervals:  
This sets the time in between each automatic GPS location.

The more frequent the intervals, the more battery life your device will consume

The longer the duration between intervals, the more battery life you will get from your device.

Turning this feature off will provide optimal battery life however safe zones will stop working. You will continue to be able to use 'locate me' though

# Safe Zone alerts

Set a Safe Zone to keep you notified when your watch enters a particular area.

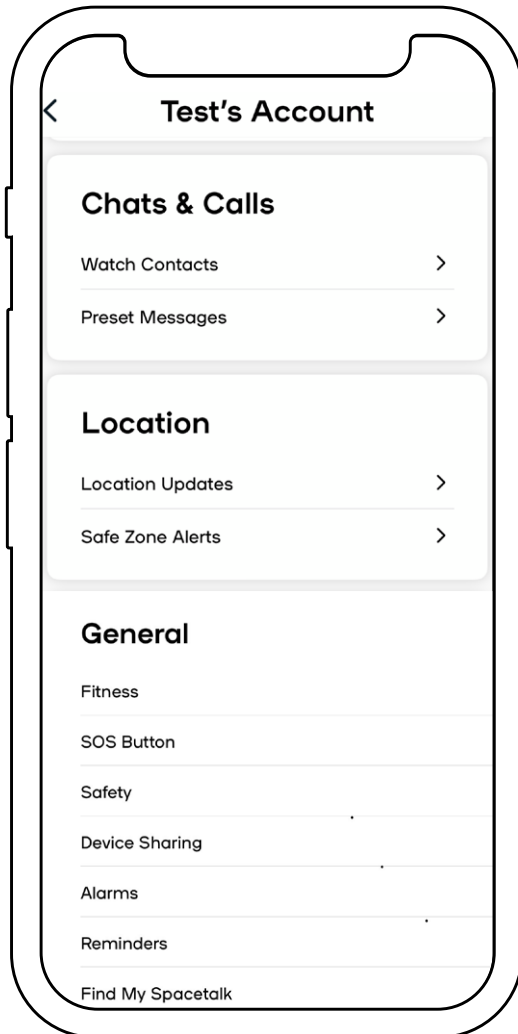

You can set as many Safe Zones as you like, however this location will be influenced by location update intervals.

Set a radius and name for each specific Safe Zone location.

**Please note:** Turning location updates off will prevent Safe Zones from working

# Safety settings

## Setting up Fall Detection and Medical ID

- The 'Safety' settings menu is used to initially setup Fall Detection and Medical ID
- Once the setup process is completed in the Spacetalk app, the watch will be able to use the 'Fall Detection app' to access Medical ID and adjust Fall Detection sensitivity

**Note:** Answering questions as accurately as possible, ensures the recommended fall detection sensitivity is selected. Answers that are skipped may alter the sensitivity

# Safety settings

**Fall Detection Setup**

**When a fall is detected**

Spacetalk sounds an alarm, vibrates and asks if you're okay.

**If you're unable to respond**

Spacetalk will automatically call and message emergency contacts with your location.

**Begin Setup**

Set up later

# 3

# Safety settings

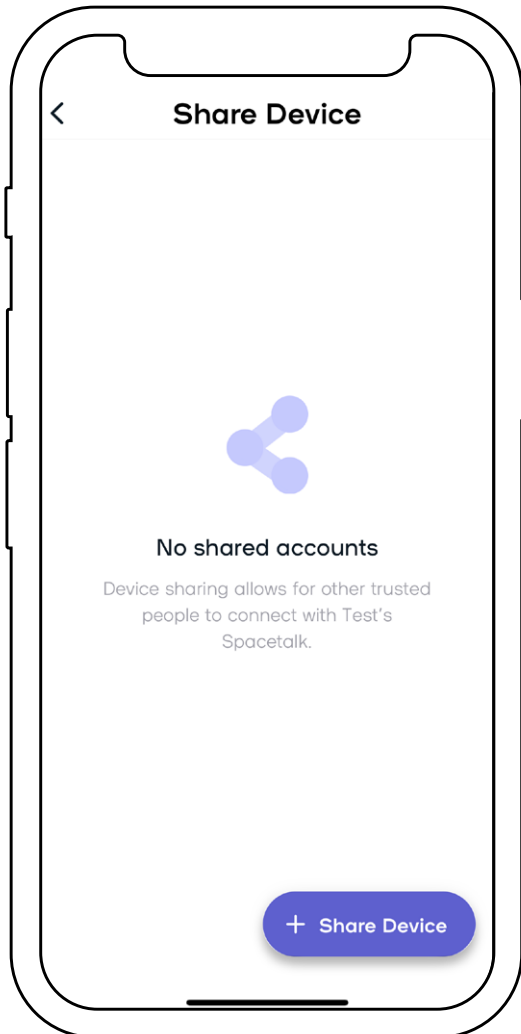

# Safety settings:

All Fall Detection and Medical ID settings can be found in the 'Safety' menu of your device in the Spacetalk app

# Set up device sharing

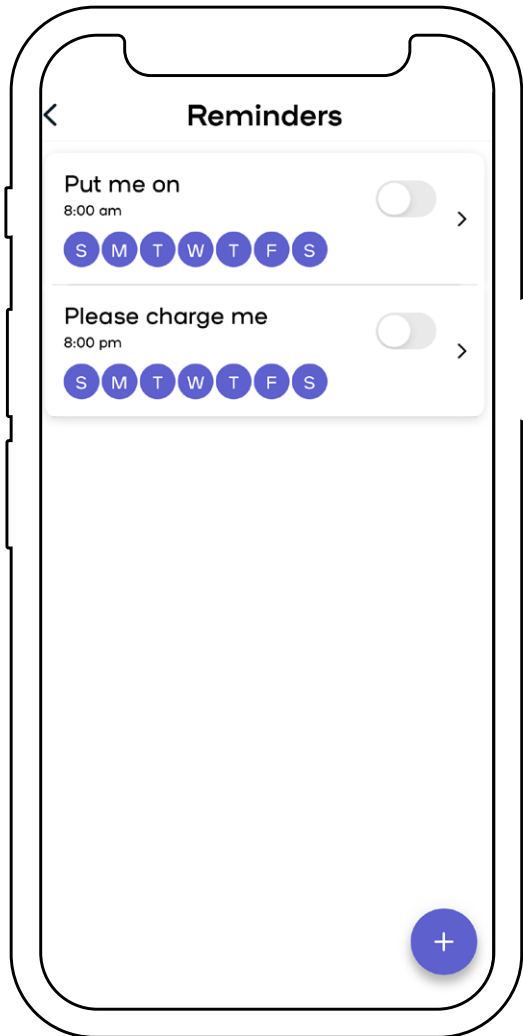

Sharing a device allows gives another account access to control the Spacetalk app.

making sure to type the account email address when sending a request is crucial in this process as typing this incorrectly will mean no invitation will be sent.

Sharing the device with another account doesn't require an extra subscription to be purchased as long as the primary account is holding an active subscription.

# Set up reminders

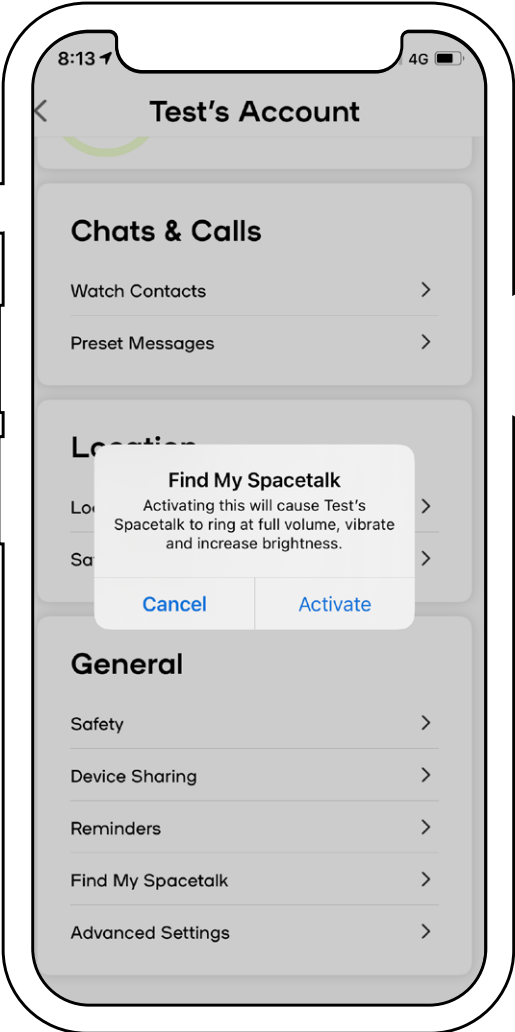

Reminders are set from the Spacetalk app and cannot be altered from the Spacetalk device like alarms can be.

As default 'Put me on' and 'Please charge me' are added upon pairing your device.

You can add as many reminders as you like and even remove the default ones that come programmed on the device.

# Find my Spacetalk

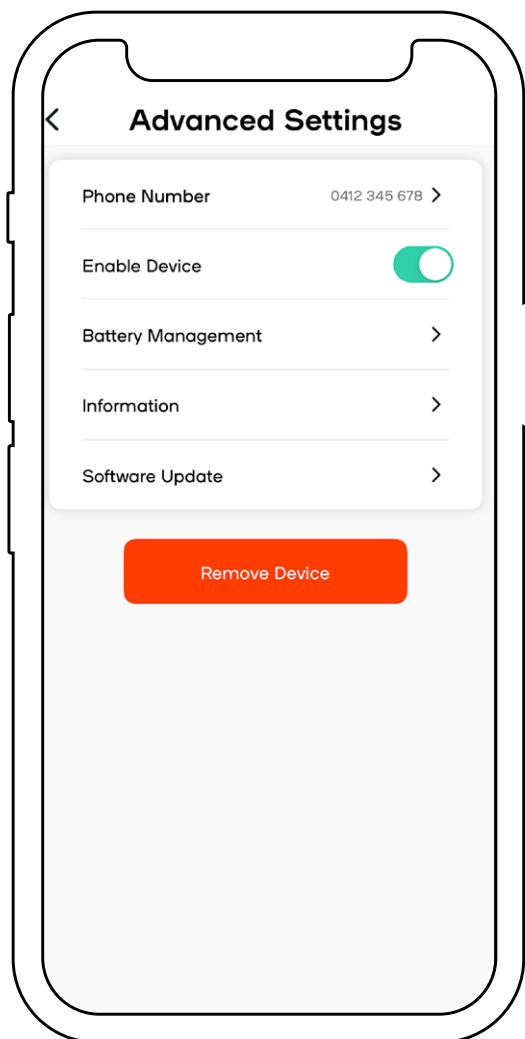

Activating Find My Spacetalk sends a tone to the watch will continue to get louder until the device is found and 'cancel' is pressed.

This feature only works if the watch is on and has sufficient credit on the SIM card

# Advanced settings

**Phone Number:** Change the devices phone number if you have changed the Spacetalk's SIM card

**Enable Device:** Enabling a device should happen automatically when a subscription is active

**Battery Management:** Choose a time to be notified if the Spacetalk watch isn't on charge

**Information:** Information data for your device including IMEI and build number

**Software Update:** Perform a manual update check from the Spacetalk app

# Quick guide for carers and loved ones

# Pairing the device

(For Family Members or Carers)

## 1 Select a SIM provider

## 2 Activate your SIM Card

Your Nano SIM card should have calls, texts and at least 500mb of data per month

## 3 Charge your device

## 4 Install the SIM Card

It is important to only install the SIM card after activation is complete

## 5 Turn on your device

Hold the power button until the 'Spacetalk' Logo appears on the watch face

Spacetalk Life model SP-L4G-1 is tuned to work on 4G LTE B28A+B & B3 also 3G WCDMA B5.

Use of a SIM Card provider not listed above is not recommended.

<sup>(1)</sup> Compatible with the Telstra™ 4GX network. Use of a Telstra branded SIM may also provide access to 4G VoLTE calling.

<sup>(2)</sup> Spacetalk does not warrant nor guarantee the listed network provider's suitability, provision of service or inclusions.

Please note, some providers may not alert when a pre-paid sim card is low on credit. Sufficient call and data credit is required to access device functionality, including the SOS button. Please ensure sufficient credit is always available on pre-paid

# 6

## Check for available update

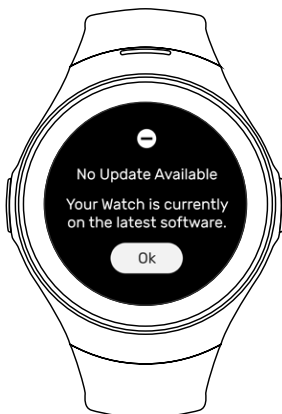

- Press power button
- Tap on watch screen so that the app menu appears- Swipe from right to left
- Tap on the blue 'settings' menu

- Swipe from bottom to top on the screen until you see 'Watch Update'

### Watch Is Up-to-date

### Watch Requires Update
