

A SCHOOL-READY DEVICE THAT WORKS FOR PARENTS, CHILDREN AND TEACHERS!

SPACETALK® with **School Mode** is a secure, school-ready wearable safety device that keeps young students free from distraction and focused on learning during school hours.

Designed in Australia specifically to keep kids protected and connected with their families, SPACETALK incorporates a high-quality phone, SOS alert service and GPS tracker within a wristwatch sized device.

Parents control **School Mode** in the **AllMyTribe** guardian app to switch features on or off during set times such as classroom periods: incoming and outgoing calls, messaging, step counter, location and stopwatch.

In **School Mode**, SPACETALK behaves just like a wristwatch, without any of the risks associated with smartphones. Teachers can see that a watch is in School Mode simply by looking at the screen.

IS MY CHILD'S SMART DEVICE SECURE AND SAFE?

The SPACETALK ecosystem has been internationally accredited by cyber security experts for best practice, including authenticated and encrypted communications.

✗ Smartphone RISKS

Cyber bullying impacts self-esteem and learning.

Internet and camera access means children can access or share **inappropriate** images, videos and other content.

Children may be prey to unwanted calls or unwanted advertising.

Many smart devices allow children to turn GPS off which means parents **cannot find their child**.

Children's data is unprotected and used by **hackers and profilers**.

Phone calls and messages cause **distractions in class**, but are useful at other times.

✓ SPACETALK BENEFITS

'No Social Media Access' eliminates bullying via the device.

No Internet Access and **No Camera** means no opportunity to send or receive inappropriate content.

Parents define Caller and Blocked List. Only trusted people can message your child.

Parent can quickly find their child, or last location of SPACETALK if he or she doesn't turn up at school or at the expected location.

All data is stored in Australia by an Australian company, never used for advertising or profiling and **protected by Australian child safety legislation**.

Parents use **School Mode** to enable or disable features at set times.
