

Triathlon Wetsuit Care Guide

Never store the suit tightly folded, Instead let the suit air dry and hang it on a broad, wide shouldered hanger away from direct heat.

Rinse the suit off with clean and fresh water after swimming in a pool or salt water.

When you pack your suit in a race bag, carry it inside out (nylon side out) to avoid chipping the smooth neoprene skin.

Pack loosely and be sure it is dry. A light coating of bar soap on the zipper can make it work smoothly, but washes off quickly.

When drying, make sure the suit is inside out. Avoid direct sunlight. Do not fold, roll, or better yet, keep on a plastic hanger to avoid creasing.

Want to make the most of your hire?

If you are pleased with you wetsuit you can purchase it.
We will subtract the hire fee from the total price.
