Command Barcode

Scanning the **Enter Setup** Code can enable the engine to enter the setup mode. Then you can scan a number of command codes to configure your scanner. To exit the setup mode, scan the **Exit Setup** code.

Enter Configuration

Exit Configuration

Important Notes:

All configurations need to go through below steps except Factory Defaults. Scan “Enter Setup” → “Command Barcode” → “Exit Setup”

Restore Factory Default Configuration

1. Enter Configuration

2. Restore Factory Default Configuration

3. TTL232

4. 19200

5. Exit Configuration

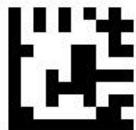

%#IFSNO\$B

Factory Set

Enable All Symbolologies

If Enable All Symbolologies feature is enabled, the scanner will not be able to read any non-programming barcodes except the programming barcodes.

Enable All Symbolologies

Enter Configuration

Exit Configuration

Scanning Mode

Trigger Mode (Default)

Scanning this bar code will enable the scanner to enter manual trigger mode.

**Trigger Mode

Auto Sense Mode

Scanning this bar code will enable the scanner to enter auto sense mode.

Automatic Scanning Mode

Continuous Mode

This mode enables the engine to scan/capture, decode and transmit over and over again.

Continuous Scanning Mode

Enter Configuration

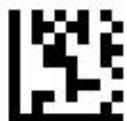

Exit Configuration

USB Interface (Optional)

USB COM Port Emulation

If you connect the scanner to the Host via a USB connection, the USB COM Port Emulation feature allows the host to receive data in the way as a serial port does. A driver is required for this feature

USB Virtual COM Port

Enter Configuration

Exit Configuration

Terminator Configuration

The scanner provides a shortcut for configuring the terminating character suffix to CR or CRLF and enabling it by scanning the appropriate barcode below.

No terminator

**CR/Enter

Tab

Enter Configuration

Exit Configuration

Convert Case

Example: When the **Convert All to Upper Case** feature is enabled, barcode data "AbC" is transmitted as "ABC".

** No Case Conversion

Convert All to Upper Case

SYMOLOGIES

UPC / EAN , 2/5 Add-On Code

An UPC / EAN barcode can be augmented with a two-digit or five-digit add-on code to form a new one. In the examples below, the part surrounded by blue dotted line is an EAN-8 barcode while the part circled by red dotted line is add-on code.

EAN-8 With Add-On 5 Digits

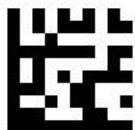

Enter Configuration

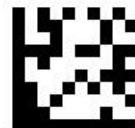

Exit Configuration

Configure decoding length for different types of barcodes

Configure one decoding length.

For example:

Configure scanner to decode Code 128 with the length of 14 characters

1. Scan Enter Configuration
2. Scan Code128 " Configure one decoding Length"
3. Scan 1 from ASCII Code Table
4. Scan 4 from ASCII Code Table
5. Scan Exit Configuration

Configure 2 different decoding lengths.

For example:

Configure scanner to decode Code 128 with the length of 2 and 14 characters

1. Scan Enter Configuration
2. Scan Code128 " Configure Two Decoding Length"
3. Scan 0 from ASCII Code Table
4. Scan 2 from ASCII Code Table
5. Scan 1 from ASCII Code Table
6. Scan 4 from ASCII Code Table
7. Scan Exit Configuration

Configure Decoding Length Range.

For example:

Configure scanner to decode Code 128 within the length from 8 to 14 characters

1. Scan Enter Configuration
2. Scan Code128 " Configure Decoding Length Range"
3. Scan 0 from ASCII Code Table
4. Scan 8 from ASCII Code Table
5. Scan 1 from ASCII Code Table
6. Scan 4 from ASCII Code Table
7. Scan Exit Configuration

Enter Configuration

Exit Configuration

Configure Decoding Any Length

For example:

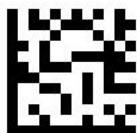

Configure scanner to decode Code 128 with any length

1. Scan Enter Configuration
2. Scan Code128 " Decode Any Length"
- 3.Scan Exit Configuration
