THE

BEATO BOOK 3.0

A CREATIVE APPROACH TO MUSIC THEORY
AND IMPROVISATION
FOR GUITAR AND OTHER INSTRUMENTS

BY RICK BEATO
The Beato Book
This book is dedicated to my Mom and Dad.

Special thanks to my wife Nina and our three beautiful children Dylan, Lennon and Layla; my brothers and sisters Pat, Nancy, Mike, Lou, Ray and Jon; and my teachers and friends Steve Brown, Mick Goodrick, Glen Cummings, Paul Smith, Pat Ryan, Tom Wadsworth, Keith Williams and Ken Lanyon.

A very special thanks to my dear friend and never-ending source of musical inspiration Aydin Esen.

Additional thanks to Christian Lamby, Michelle Taylor, Aaron Shah, Rhett Shull and Carol Kuswanto for making this book and my YouTube channel possible.

Cover design by Michael Murray

I would also like to thank all of you out there that have supported me through this journey!

Rick
Author's Note

I have spent many hours compiling this book in order to give my students a comprehensive reference source from which to draw. Since this book is not copy-protected it would be easy to make a photo copy of it for one of your friends. **Please don’t.** I make a small living as a musician and am making even less from the sale of this book. I appeal to you as a fellow musician to respect the work of others, whether it’s written material or recorded works. If one of your friends is interested in checking out the book, let them borrow it for a couple of days to get a feel for it. If they like it, encourage them to pick up a copy. When a book or recording is illegally copied, the publisher or record company has no way of monitoring interest in the project. This not only steals from the artist but may prevent them from having an opportunity to again express themselves in that medium. Good luck!
Table of Contents

Author's Note .................................................................................................................. 3
Chapter 1: Theory and Harmony ...................................................................................... 6
  Interval Names and Symbols ....................................................................................... 7
  Naming Intervals ........................................................................................................ 8
  Enharmonic Intervals .................................................................................................. 10
  Chords and Their Formulas ...................................................................................... 11
  Building Diatonic Triads ........................................................................................... 12
  Building Diatonic Seventh Chords ............................................................................ 13
  Major Scale (Triads & Seventh) ................................................................................ 14
  Natural Minor Scale ................................................................................................... 15
  Melodic Minor Scale .................................................................................................. 16
  Harmonic Minor Scale ............................................................................................... 17
  Harmonic Major Scale ............................................................................................... 18
  Double Harmonic Major Scale .................................................................................. 19
  More About Seventh Chords ..................................................................................... 20
  Suspended Triads and Other Three Note Structures ............................................... 21
  Chord Scales ............................................................................................................... 23
  Chord Families and Their Scales .............................................................................. 25
  Scale Degree Names and Basic Progressions ............................................................ 28
  More About Roman Numeral Analysis .................................................................... 32
  Cycle of Fifth and Back Cycling ............................................................................... 34
  Roman Numeral Analysis and Chord Scale Choice .................................................. 35
  Basic Rules for Chord Substitutions ........................................................................ 37
  Triads over Bass Notes ............................................................................................. 51
  Triad and Seventh Chords over Bass Notes and Polychords ..................................... 54
  Reharmonization and Chord Substitutions ................................................................ 60
  Advanced Reharmonizations ...................................................................................... 62
  Reharmonization of Standard Forms ........................................................................ 75
  Common Tone Reharmonization .............................................................................. 77
  Modal Harmony and Theory ..................................................................................... 80
  Sharp and Flat Direction Modal Modulation .............................................................. 82
  Resolution Tendencies Between Modal Groups ....................................................... 88
  Voice Leading ............................................................................................................. 89
Chapter 2: Chord Forms ................................................................................................. 92
  Triad (and Suspension) Chord Forms ....................................................................... 93
  Drop Voicings ........................................................................................................... 101
  Triads Over Bass Notes ............................................................................................ 174
  Spread Triads Over Bass Notes ............................................................................... 193
  Quartal Voicings ........................................................................................................ 215
  Skipped String Voicings ............................................................................................ 234
  Open String Voicings ............................................................................................... 239
  Polychords (Triads over Triads) ................................................................................ 250
  Using Compiling Voicings in New Ways ................................................................. 253
  Constructing Chord Scales ....................................................................................... 254
  Diminished Scale Voicings ....................................................................................... 264
  Stretch Voicings ........................................................................................................ 268
  Chordal Lines (ii° V° Imaj°) ..................................................................................... 272
Chapter 3: Scales and Arpeggios
- Mode (Scale) Practice
- Close Position Fingerings
- Scales With Two Notes Per String
- Diatonic Intervals
- Diatonic Arpeggios
- Seventh Chord Arpeggios
- Seventh Chord Arpeggios Root 6
- Seventh Chord Arpeggios Root 5
- Bitonal Arpeggios
- Seventh Chord Arpeggios Root 7
- More About Practicing Scales and Arpeggios

Chapter 4: Linear Studies
- ii V I Progressions
- ii7 V7 I Substitution Patterns
- Turnarounds Over Four Measures
- Turnaround Substitutions
- Cycle of Fifths
- Cycle of Fifth Exercise
- Pentatonic Scales
- Triadic Superimposition
- Seventh Chord Superimposition
- Hybrid Arpeggios
- Playing Over Unusual Resolutions
- Melodic Ideas
- Modes: Linear Approach
- Modal Mixture
- Using One Interval Set Over Many Chords
- Outside Playing Over One Chord
- Chromaticism And Twelve Tone Applications
- Twelve Tone Triadic Formulas
- Modal Shapes
- Unorthodox Left Hand Techniques
- Modern Linear Examples
- Pedal Point Soloing

Chapter 5: Technique and Practice
- Bass Lines
- Comping Rhythms
- Solos Over Standard Forms
- Practicing
