etric glassware complies with Class Annee with ASTM E 542 and NIST Properties and temperature probed according to master documents thistory for each lot manufactured. Specific Gravity @ 25 °C	socedure NBSIR 74-461. Balances are calibrates are calibrated before first use and recalibrated hat assure manufacture according to validated. Specifica	ed regularly with weights certifi- ted regularly with a thermomet d methods. Batch records docur fion	ed traceable to the NIST national mass sta er traceable to NIST standards. All produc nent raw material traceability and product Result

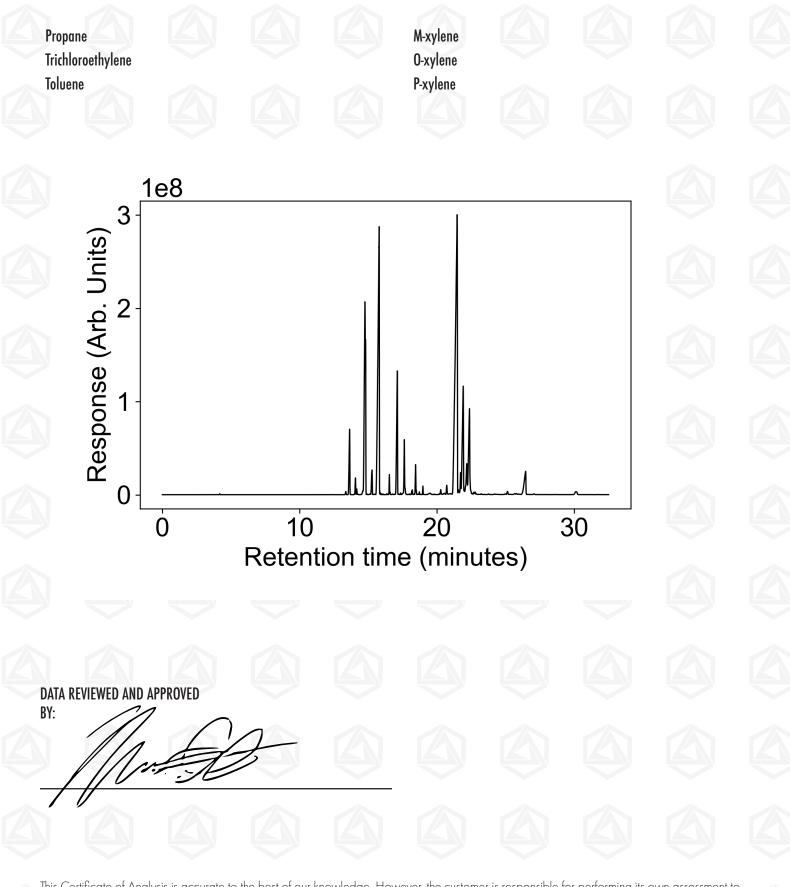

Chloroform Ethanol

Ethyl Acetate

Methanol

Pentane

Methylene Chloride

This Certificate of Analysis is accurate to the best of our knowledge. However, the customer is responsible for performing its own assessment to ensure that the material is suitable for its intended applications, including compliance with all pertinent legal requirements. The expected shelf life is calculated from the original manufacture date and is based on unopened containers stored under proper conditions. Once containers have been opened, maintaining minimal headspace and storing under appropriate conditions will aid in preserving the product's integrity.
