

EXPANSION MODULE

CO2 Regulator

EXPANSION MODULE

- Includes a bubble counter and needle valve
- For use with single and dual stage regulators
- Easy to install

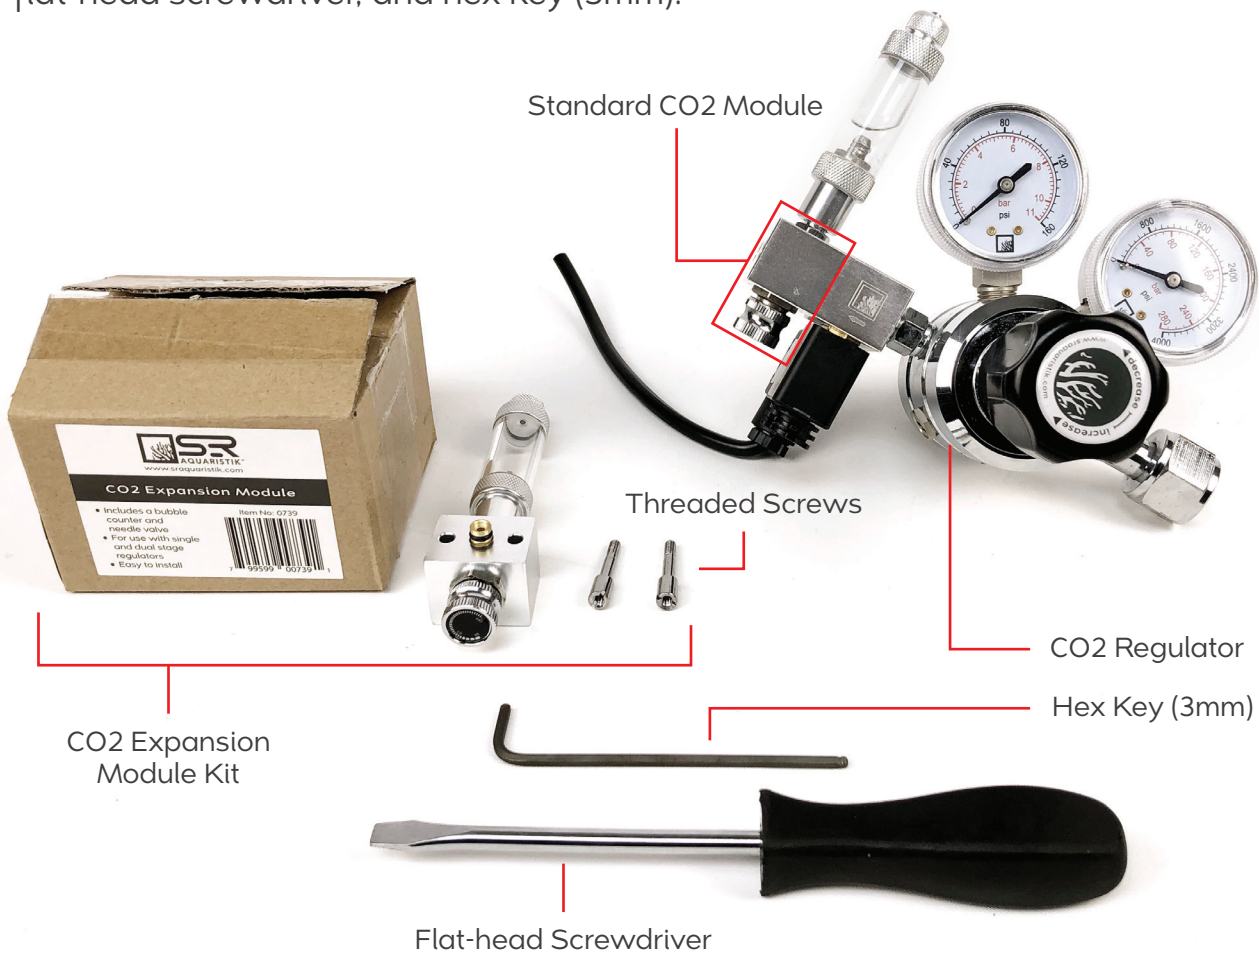

Assembly Instruction Guide

Assembly Instruction Guide

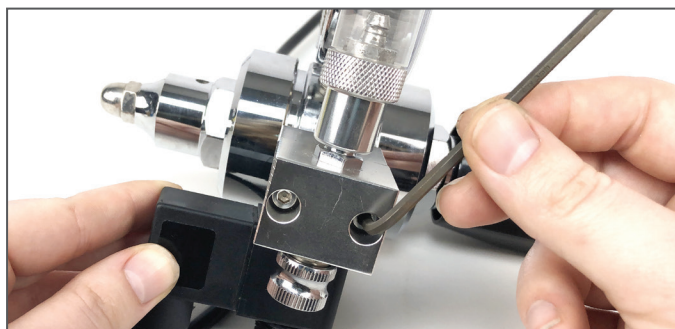

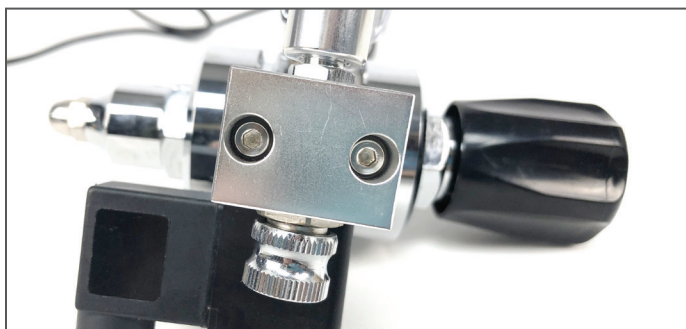

STEP 1

Unpack and prepare your CO2 Regulator Expansion Module, CO2 Regulator, flat-head screwdriver, and hex key (3mm).

STEP 2

Remove the Standard CO2 module by removing the hex screws.

MODULE PLACEMENT

Standard CO2
Module Kit

CO2 Expansion
Module Kit

This module should be placed between the
CO2 Regulator and the Standard CO2 Module

This module should be placed last / after
adding new Expansion Module(s).

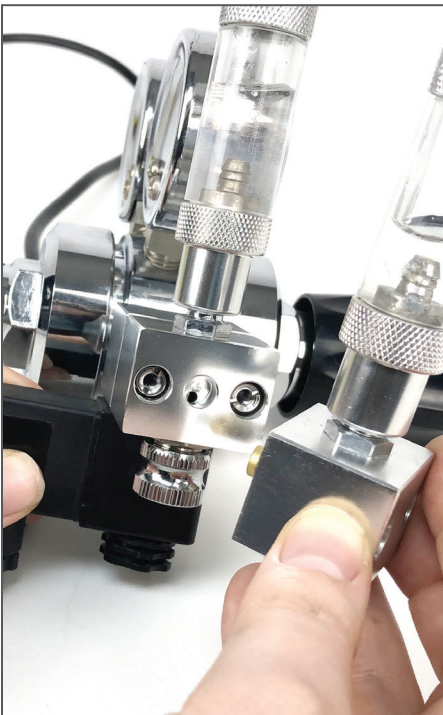

STEP 3

Mount the CO2 Expansion Module in place and use the threaded screws included in the package. Tighten the screws using a flat-head screwdriver. Repeat this step if you have multiple expansion modules to attach.

STEP 4

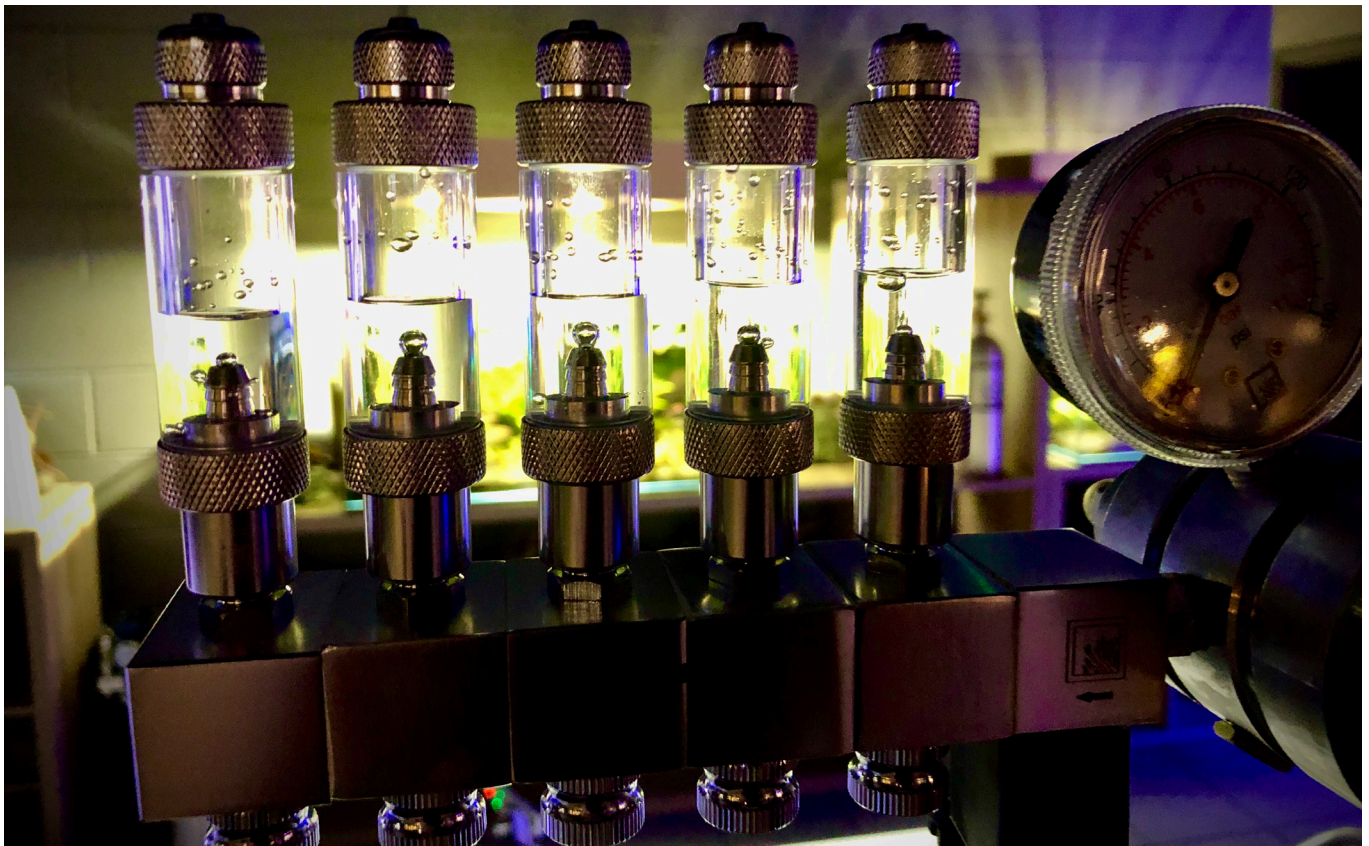

Attach the Standard CO2 module after adding the Expansion Module(s) and screw it using the hex screws you removed on Step 2.

Assembly Instruction Guide

DONE!

Your upgraded CO2 Regulator is now ready to use!

The SR Aquaristik CO2 Regulator Expansion Module is ideal for hobbyists who want to run more than one aquarium with one regulator. This simple to install independent control makes it quick and easy to expand your new or existing regulator.
