

# STEM 011 Bar table

design RODOLFO DORDONI

## DESCRIPTION

Bar table for outdoor use

## STRUCTURE

Powder coated steel cleaned and treated with an electrolytic process of hard iron phosphatisation. This pre-painting guarantees a higher resistance to corrosion and it removes polluting substances. Its effect is reinforced with a following nanotechnology anticorrosive treatment and with an electrostatic powder painting with polyester base that gives more protection from scratches and also the final coloring to the product.

## TOP

**TEAK:** Teak wood contains a natural oily resin which makes it extremely resistant to weather, temperature, parasite attacks and insects. The exposure outdoor creates a 1/2 mm-thick oxidation patina on the wood surface which favors its discoloration to a silver-grey color; this change does not affect its original characteristics in any way. The grey patina can be avoided or removed with the correct maintenance.

**HPL (High pressure laminate):** of a great quality with a characteristic black heart, very resistant to wear and tear, humidity, steam, UV, fungi, spores and mould. It is self-extinguishing and it is class 2 fire resistant; it does not contain chlorine or asbestos and it is certified by Fira Institute for coming in contact with foodstuff.
