

Dining table.

Top: aluminium honeycomb veneered with Abonos™ ash wood.

Top edge: dyed oak heartwood.

Legs core: steel, matt-varnished in grafite colour.

Legs covering: dyed oak heartwood.

Notes:

Legs covering in dyed heartwood fully hides their steel core.

Abonos™ is a wood of fluvial origin characterized by a thousand-year permanence in the water, where it was transformed through the action of sediments such as gravel, sand and clay. The series of chemical mutations, to which it has been subjected by nature has made each trunk a unique piece, in colour and design, without this affecting its structural qualities of hardness and resistance.

The ash wood Abonos™ is treated with a transparent acrylic varnishing cycle.
