

Gon

design : G. e O. Buratti

Dining table with round top and base.

Base: turned steel, gloss varnished of finished Ornué. Plastic spacers.

Top: turned steel, gloss varnished of finished Ornué.

Notes:

The varnishing of the Gon table is a mechanical industrial process. The colours of the Mano Lucida samples are therefore only chromatic references: the mechanical finish of Gon does not reproduce the texture obtained through the manual varnishing typical of the products finished Mano Lucida.

The Ornué finish is made by De Castelli on an exclusivity base.
