

Hana-arashi | baskets with base

design : Nendo

Cone-shaped baskets available in three dimensions.

Support structure: gloss-varnished stainless steel AISI 316 (reference colours: Mano Lucida wood sample collection). Plastic spacers.

Basket: made of two layers of Maris fabric joined by welded elements.

Notes:

The two layers of Maris fabric are joined by welded elements, some of which decorated with further inlays in the same fabric.

The material originates from the recovering of offcuts from previous production processes. The combination of colours produces different chromatic results each time. Each basket is edged with a cord in Twiggy yarn, equally recovered.
